

# fractals nook

## fractals nook product information

---

Fractals Nook, an extension of the Fractals Seating product, uses an organic high shell with an added worksurface to create an intimate desk carrel for heads down work. Fractals Nook allows for users to create a distraction free zone for work. The natural curves of Fractals create unique space planning capabilities for social spaces that require the need for privacy. The addition of the Fractals Nook now allows for new planning scenarios for the complete Fractals line. It offers the ability to intertwine high back lounge pieces with high desk nooks.

Fractals Nook allows the same broad canvas of the lounge series for the selection of multiple fabrics and finishes to create your own distinctive look. Powdercoat finishes on both the legs and the inner frame are chosen individually as well as inner and outer fabric selection for those environments that encourage space division emphasized by finish.
