teknion

Inspired by the definitive patterns of the urban landscape, Cityline EZ is based on the concept of planning for a workplace as diverse and dynamic as a modern city. Like the public and private places where city dwellers work and play, Cityline EZ offers a highly active setting that allows people to dock, divide and define space as desired. Cityline EZ's unique design employs a beam framework that maximizes office connectivity. The beam serves both as a structural spine and as an avenue for data and power to and through work and social zones across the office. A dynamic program of accessories and screens enables people to work efficiently and effectively, while also creating a destination and a distinct work culture.

Expansion Cityline EZ offers a versatile fence solution able to create applications from simple power distribution to multifunctional workstations. As a freestanding structure, the fence features a distinctive design with a light, elevated look.

When used with the Upper Structure, it allows for space division up to 66 inches high while maintaining a sense of openness. Storage and accessories, such as shelves, book displays and planter boxes install on the Upper Structure for built-in vertical functionality.

The Upper Structure's unique A-Frame integrates with the beam and leg, accommodating space division at both seated and standing height privacy. Lift & Drop tiles personalize the workspace and define function with

an assortment of materials including felt, glass, metal, wood, fabric and whiteboard. A complete offering of screens mount on the fence or worksurface, bringing a mix of heights and aesthetics to a work environment.

As a power distribution fence, the Expansion Cityline EZ beam integrates with Teknion's height-adjustable hiSpace and Navigate tables, allowing alternate configurations that serve performance, comfort and well-being. Suspended storage secures personal belongings and also allows users to charge their phones.

In addition to creating fixed workstations, the Expansion Cityline EZ fence offers a choice of two different heights that can be used alone, with Add-on Screens or the Upper Structure with Lift & Drop tiles and accessories to achieve variable degrees of space division. Utilization

of the Upper Structure with the media center and whiteboards creates an activity-based zone in open plan settings, while workstations are dressed with storage and screens for individual functionality

low height fence

height: 457mm
width: 1400mm - 2000mm
