size selection

The following should be considered when selecting the size of a table.

considerations for selecting a size of table

- Size of room
- Number of people to be seated

size of room:

To put the largest table in a given room size you need to know the required clearance between room furniture and architectural features.

$$\begin{aligned} \text{Table size} &= \text{room size} - \text{furniture size} - \text{seat clearance} \\ x &= 15' - 2' - 2(4) \\ x &= 5' \end{aligned}$$

number of people:

- Based on a 30" diameter seat width
- Values range between how many can sit around the table and how many can squeeze in

shapes selection

The following should be considered when selecting a shape of table.

* Above 90", 3 people will comfortably fit on each side

Circular or Square Tables

- Fit better in square rooms
- Circular tables offer equality and collaboration with better circulation around the table
- Square tables above 60" can seat more than one person comfortably along a side
- Circular tables under 54" will comfortably fit more people than square of the same size
- Above 60" square and circular tables fit the same number of people
- Square tables have more surface area than circular tables of the same size

Rectangular Boat or Oval Tables

- Work better in larger rectangular shaped rooms
- Boat and Oval tables allow better circulation around the tables
- They Instill a 'head of the table' effect
- Rectangular tables offer the most surface area

Things to consider for video conference room layouts:

- Orient a table with the wide end facing a clean wall for a presentation board or wall (focus) board
- Have the door to access the room behind the table or at the narrow end of the table
- Pedestal bases may be more appropriate for video conference tables due to the electronics and A.V. equipment wire management
- Video conference shaped tables are directional, for optimized-viewing angle, of a presentation surface
- Normally people do not sit at the wide end of a video conference table during a presentation

wood finish details

The following provides details on Teknion's Flintwoods and Natural Veneers.

flintwood & natural veneer

Different wood species offer unique texture and grain. Due to the natural properties of wood, grain pattern and finish color variation can be expected. Teknion provides a coordinated color match between individual product lines.

The variation in technology between Teknion's wood manufacturing facilities and the veneers that are utilized will cause fluctuation in the fill rates and sheen levels. All Flintwood worksurfaces and storage tops are closed pore. All Flintwood used in a vertical application is open pore (Table base infill, Storage Units Case, Focus Board). Natural Veneer in all applications is open pore.

Exposure to direct sunlight should be avoided as UV rays may cause the veneer color to change. Adding new product to an existing installation might result in color variations due to light exposure and aging of the original product. For more information on Teknion wood and cleaning instructions please see Teknion's Fabrics and Finishes program.

grommet locations

Grommets on Work Tables are located along one width of the Work Table surface and are ideally suited for single person usage of the table. In shared applications, Grommets are not recommended.

wood finish details

The following provides details on Teknion's Flintwoods and Natural Veneers.

flintwood & natural veneer

Different wood species offer unique texture and grain. Due to the natural properties of wood, grain pattern and finish color variation can be expected. Teknion provides a coordinated color match between individual product lines.

The variation in technology between Teknion's wood manufacturing facilities and the veneers that are utilized will cause fluctuation in the fill rates and sheen levels. All Flintwood worksurfaces and storage tops are closed pore. All Flintwood used in a vertical application is open pore (Table base infill, Storage Units Case, Focus Board). Natural Veneer in all applications is open pore.

Exposure to direct sunlight should be avoided as UV rays may cause the veneer color to change. Adding new product to an existing installation might result in color variations due to light exposure and aging of the original product. For more information on Teknion wood and cleaning instructions please see Teknion's Fabrics and Finishes program.

FOCUS WALL™ BASICS	78
DRYWALL RESTRICTIONS	79
ADJACENCY CONDITIONS	80
FOCUS WALL™ LINKING STRIPS	81
FOCUS BOARD™ BASICS	82

focus wall™ basics

Focus Walls provide a vertical writable or tackable surface for collaborative environments.

- The 48" height matches up with the datum heights of the Altos working wall for applications where dry wall meets perpendicular to an Altos wall
- The 42" height is most appropriate for use in private dry wall offices and can be mounted from worksurface height to line up with casegood datum lines

drywall restrictions

The following illustrations demonstrate installation restrictions and are necessary to know in order to accurately specify Focus Wall lengths appropriate for each room and conditions.

The distance between the end of the Focus Wall and the perpendicular wall should be a minimum of 3"

When two Focus Walls are mounted on perpendicular walls, both must be placed a minimum of 5" from the wall

adjacency conditions

Focus Walls can be specified with a variety of combinations of Tackboards and Whiteboards.

When specifying the Focus Wall Tackboard (AFWT), adjacency conditions must be specified to ensure that the appropriate amount of linking strips is provided for the application desired

Full Tackboard

When a full tackboard is desired, Adjacency Condition "N" (Not adjacent to another Whiteboard or Tackboard) should be selected

* Linking Strips provided if 144" Tackboard (AFWT144) is selected
 AFWF48144 (Frame)
 AFWT48144_N (Tackboard)

Tackboard/Whiteboard Combination (or Tackboard/Tackboard combination of two different fabrics)

When a combination Tackboard/Whiteboard/Tackboard is desired (with Whiteboard the middle), Adjacency condition "S" (Adjacent to one Whiteboard or Tackboard of another fabric) should be selected for each tackboard.

Note: When separated by a Whiteboard, each tackboard should be specified separately (For example 2 x 48" not 96")

focus wall™ linking strips

The following chart indicates the number of panels and linking strips provided.

Although the maximum width available for both the Focus Wall Whiteboard (AFWW) and Focus Wall Tackboard (AFWT) is 20' (240"), the maximum width of a single panel of whiteboard is 8' (96") and of a tackboard is 4' (48"): Larger sizes comprise of various sized panels totaling the width specified in the product code: Linking strips are required to connect these panels together and automatically come with the order when the Whiteboard or Tackboard is specified in sizes larger than 96" (Whiteboard) or 48" (Tackboard).

Whiteboard (AFWW)

Specified Width	Panels Provided	Linking Strips Provided
24" – 96"	1 Panel	none
102" – 192"	2 Panels of equal width	1

The Focus Board is a self-contained, closeable, whiteboard which provided a writable work tool.

Focus Board (AFWB)

- No other components within this section (Frame, Whiteboard, Tackboard etc) need to be specified for the Focus Board to function
- A blocking arm comes on each door to lock it into a 180° position when open
- Has an aesthetic tie to the *Audience* Boardroom furniture
