teknion

aarea conference chair

Tailoring meets engineering, innovated through second-life materials.

Designed by PearsonLloyd for Teknion, Aarea unites the concept of circularity and the simple reality of human needs. Aarea is familiar and welcoming in aspect, intuitive and ergonomic in use, and made with a minimum of components and materials, which speaks to the ingenuity and intelligence of the chair's design. The conference chair promotes changing postures from upright to relaxed for social and formal settings.

Aarea's mélangé knit back is fabricated from retrieved ocean litter to minimize virgin materials and waste. The knit back is flexible and readily conforms to the shape of the body, creating seamless support through the tensions inherent in the knit. The knit back is made to size, creating no additional cut off waste. A cushioned seat and angled armrests further enhance comfort and wellbeing for all users throughout a workday.

01 Angled arm rest for relaxed support
02 Curved contours with embedded ergonomics engineered into the knit

- 01 Adjustable height and tilt with intuitive, convenient controls
- 02 Integrated mobile device ledge
- 03 Wire management cutouts

cosi laptop table

The Cosi laptop table offers proof that work tools designed for utility can be elegant as well. The worksurface adjusts to provide angled positions that support intensive tasks or visibility during video calls, while a clever front lip secures the laptop and an integrated device stand keeps a phone at hand.

Intuitive and easy to adjust, Cosi places height and tilt controls directly under the worksurface. The base moves easily into the position desired, while maintaining clearance around chair bases and feet. At an accessible price point, Cosi is built to support you, your posture and your work, wherever you are.

open bookcase

Filling needs for storage, decor and space division all at once, the Open Bookcase is adaptable to a multitude of spaces. Available in varying heights, widths and stackable configurations, this stylish solution offers a casual, visually appealing way to define space for work and social interaction. Place alongside conference tables to support team collaboration; frame out a lounge area for social connections; or intersperse between workstations to enhance individual focus.

Customize your layout by tethering together multiple units to create an informal dividing wall. Stackable units designed to be placed on top of credenzas add storage, privacy and visual interest.

Inviting personalized display and playful styling, Open Bookcases can be further accessorized with complementary planters, bookends, fabric tiles, metal or fabric dividers, and integrated under-shelf lighting.

district open frame sliding screen

Our innovative new add-on is designed to seamlessly integrate with 29" high District/Power Spine panels. The open frame allows for easy user adjustment, in heights of 51" or 57", providing the perfect balance between openness and seclusion.

Available in fabric or smooth felt to suit your aesthetic preference and functional needs. Transform your workplace into a haven of productivity and comfort.

freestanding fabric shade screen

The freestanding Shade Screen puts privacy wherever it's needed. Appealingly simple with soft rounded corners and a calm character, Shade's slim profile allows for casual space division in any setting, from compact and cozy to wide open and airy. The upholstered panel can be covered in nearly any Luum upholstery fabric; whether it blends into the background or adds a playful pop is up to you.

The Shade Screen is available in two heights and two widths, with minimal hardware that maintains its sleek look. Optional clamps allows two screens of any size to be joined in a L-shaped configuration, creating a corner office just about anywhere.

 05 Bucket Accessory

complements accessories

Elevate your office or workspace with our new line of planters, buckets, hooks, and organizers, available in a wide range of sizes and customizable with or without perforations. Crafted in all our signature metal paint colors, these versatile components are designed to mount effortlessly to District/Power Spine panels, solid lateral screens, or simply placed atop any worksurface.

studio tk
bevy mobile

Bevy Mobile allows for fluid multipurpose design with easily movable, change-friendly tables that you arrange to your space needs of the moment. Equipped with 4"/100 mm wheels to one side, Bevy Mobile is easily reconfigured by a single person to be grouped together for collaboration or broken apart for individual focus time. Each corner is enhanced with a bag hook for easy access to personal items while keeping them lifted off the floor. Available as a square, round or rectangular worksurface, Bevy Mobile features hardwood legs for a crafted charm and painted accents for a custom touch.

loria chair

Whether it's encouraging innovation within a fluid workplace setting or cultivating meaningful connections in corporate boardrooms, Loria seamlessly adapts to meet the demands of modern work. Available in innumerable iterations suited to varied contexts and uses, the chair's elegance enhances the ambiance of any space, elevating the overall experience for those who interact with it. Loria represents sophistication and style, a reflection of discerning taste and uncompromising quality.

cmf refresh

The realm of nature and the narrative of design are at the core of Teknion's range of coordinated finishes, drawing from timeless landscapes and the classic palettes of modern décor. Speaking to new directions in contract interiors, these fresh, uplifting colours create a sense of calm and comfort that promotes vitality, wellbeing and a deeper, more grounded connection to the natural world.

Updated finishes encompass warm neutrals, soft pastels, and accent colors that make it easy to play with layers and add dimension, to build contrast or create balance and harmony in a space.

within baffles + louvres

Transform your space with WithIn, adding privacy and functionality with Baffles and Louvres. These cohesive designs integrate into the WithIn system, providing a unified look while offering flexibility in sound and lighting. Easy to install, they can be added to existing WithIn structures as a retrofit feature.

Enhance acoustics with felt Baffles, reducing sound reverberations in large open spaces. They also offer a practical solution for concealing ceiling utilities and visual clutter. Baffles create a lowered ceiling effect, providing the perception of a smaller, cozier space with soft and natural textures.

The dynamic Louvre system offers privacy and visual interest, with pivoting slats that can be easily adjusted for varying degrees of privacy and visual variety. Louvres also allow control over natural light, adding to the space's ambiance and functionality.
