## kiosk additions

The Kiosk collection of freestanding modules that define work hubs and distribute collaborative tools across the office is growing. With the addition of retrofittable components, Kiosk provides even more options for an easy transition between fixed and mobile setups. The new Counter Height Storage, Counter Height Recycle, Open Shelf and Locker Kiosks offer even more options for customization and creating the perfect work environment for your dynamic team.

## kupp tables

Kupp flip-top tables are the perfect companion for the Kupp horizontal nesting chair. Designed to accommodate the needs of any space, Kupp tables feature an intuitive surface-long handle and offer an optional bag hook and modesty available in Smooth Felt, Laminate and Flintwood. Angled legs create straight-line nesting for compact storage, and complement the Kupp chair legs. A linking device connects in all directions. Attention to design is seen with the two-sided worksurface finish, which maintains a clean table aesthetic in the vertical position.

## product spotlight

## what to love about bonds

Inspired by the concept of a Jacob's Ladder, a toy made up of loosely bonded segments, Bonds employs a unique mechanism that connects individual units in countless configurations. The free-form design strikes a balance between playful innovation and simple functionality.

- Softened edges sheathed in fabric that appear to be folded up and over the top of the seat
- Double-stitched seams that add visual and tactile detail
- Creating expression through quiet neutrals or vibrant tones, a smooth hand or deep texture, light or dark wood finishes
- How the Jacob's Ladder concept is enabled with straps attached at the bottom corner, allowing the units to turn a full 180° while remaining attached
- Freedom for users to reconfigure units where and when needed
- It's a collection complete with auxiliary tables that form curves and angles
- Side tables that are available with or without electrics and feature an open bottom to access floor monuments
- Side tables with a sliding literature holder with integrated surface

# around conference chair

The Around Conference Chair joins the Around family of chairs. The upholstered version features a durable plastic shell with a beautiful, embossed honeycomb pattern. The mesh back provides another unique construct and is offered in five colorways. Frames are available in Ebony or Gris. The chair features integrated loop arms, seat height-adjustability and a swivel-tilt mechanism that can be locked in an upright position.

## soft systems

The office is softening its look and purpose, and so too are Teknion's systems. Meeting the needs of a high-performance workstation while also providing the feel of a welcoming and inviting space, Soft Systems offers a range of new options – from the Smooth Felt Hoodie with Patterned Back, to curved felt Drop Off Storage cubbies, Side Saddles and Floating Desk Shelf. These user-centric components create furniture that is not merely utilitarian, but also responsive to the evolving needs of employees.

# pod - tek work

Tek Work is the latest addition to the POD (privacy on demand) product line. Tek Work is designed to support individual private work sessions in an open plan environment. Its universal approach to planning works with a wide variety of freestanding Teknion furniture and can easily be grouped with other POD products such as the Tek Booth or Tek Room.

The Tek Work height-adjustable worksurface option improves user ergonomics, allowing for longer working sessions with overall improved comfort. Tek Work offers multiple lighting options. The task light improves illumination of the worksurface for focused work and a ceiling light serves as the general spatial light. The optional face light provides users with a high quality on-screen video call appearance. All lighting options can be dimmed for maximum control.

## markerboards

The Architectural Complements program comprises elements used to enhance and augment existing wall systems within Teknion's Architectural Interiors portfolio. New Markerboards expand these opportunities. The Markerboard program allows for specification at the planning stages of a project or as a retrofit option, offering the flexibility to decide when and where to add it to a space.

The Markerboard is available framed or frameless, and offers a broad range of aesthetics, sizes, colors and frame finish options. Back painted glass, trims and framing can be coordinated to match existing site color palettes. Specific sizes and orientations integrate with the existing Altos walls and POD Tek Room product lines.

## studio tk – artifort compass

The Artifort Compass table pairs harmoniously with Studio TK’s chairs, lounges, sectionals and sofas. Its low-profile base slips conveniently under most sofas or chairs while its cantilevered design brings the surface comfortably close. Available in two wood finishes,

Artifort Compass can be rotated to one side, positioned in front, or hovered over your lap, providing the perfect stable surface for a drink or the ideal position for your laptop.
