

## multi-purpose spaces: two towers

Using two Towers expands the functionality of multi-purpose rooms. Similar applications as one Tower spaces can be achieved on a larger scale, while the additional components allow for peripheral furniture to be built and augment a space. Teknion Bene Box easily assembles and disassembles by hand in a few quick steps. Build and rebuild, mix and remix to create just the right setting.

## teknion bene box

Simple building blocks, Teknion Bene Box functions as the ideal multi-functional modular furnishing system – it configures into desks, tables, stools, benches, lecterns, platforms, shelving units, storage towers and more to create versatile options for any room and for an entire floor plan.

## the tower

The Teknion Bene Box collection is available as a complete tower, packaged for easy storage and mobility. The Tower comprises various components from which endless configurations are achievable with the use of either one or two towers.

04 x long tray

04 x long top

06 x seating pad

08 x tray

04 x top

04 x half box

04 x box with two openings

10 x box with one opening

03 x solid box

01 x wheel tray

## multi-purpose spaces: one tower

Versatile by nature, the collection functions equally well as fixed furniture as it does for multi-purpose spaces, shaping a room to support a number of different team tasks. Its flexibility makes it perfect for co-working spaces where tomorrow is always the unknown and activity changes day to day, creating environments that encourage lively dynamics and creativity. Build and rebuild, mix and remix to create just the right setting. Teknion Bene Box is always a work in progress.
