

teknion tek/n

teknion

value without compromise  
Combining durability with elegance, tek/n™ is a clever and economical solution for the office environment. Featuring a linear and minimalist aesthetic, with carefully selected design options, tek/n complements any modern office space. As a small and efficient kit of parts that includes shared components, tek/n can be quickly and easily specified, without compromising function or aesthetics.

#### adaptable workspace

The workplace is rapidly becoming a destination for staff to connect, collaborate and be creative. It is important that space connects users seamlessly across multiple settings so they maximise productivity, have the opportunity to re-energise their mind and have access to the right people and information.

active workspace

An increasingly mobile workforce requires spaces to connect with others, carry out quick tasks and a base for when they are in the workplace. Tek/n helps users touchdown, connect easily and store their belongings short term – promoting connectivity and productivity.

**huddle space**

Mentoring across organisations is key to unlocking the latent knowledge staff hold. Increased learning within organisations is underpinned by a workplace that provides opportunities to share information and ideas, enable learning, mentoring and the cross pollination of ideas with ease.

#### cultural hub

We are social beings! The lines between work and life are blurring more and more and the role of the workplace is changing to support this shift. tek/n provides spaces in the workplace for staff to connect and foster social networks. It is an important role in building a strong culture and sense of belonging for those who work there.

personal workspace  
tek/n can support focus work whether in an enclosed or semi-open environment. It can be easily designed to provide a comfortable place to retreat, supported by storage, ergonomic comfort and technology.

## build-up

Specifying tek/n is intentionally simple, with a method that is common across the range: Durable components and intelligent cable management support multiple reconfigurations, increasing planning flexibility and delivering a sustainable design solution long term.

Generate a variety of layouts from tek/n's selection of worksurface shapes, frame lengths and full-end or intermediate legs.
