

# LUUM

## General Care + Maintenance

- Clean stains and spots promptly
- Always test the cleaning agent in an inconspicuous area of the fabric first
- Do not over saturate with liquid
- Follow cleaning product instructions
- Vacuum regularly with a proper upholstery attachment

## Cleaning Codes

- W** Clean with a water-based cleaning agent. Do not use solvent products.
- S** Clean with a dry cleaning or solvent-based cleaning agent. Do not use water-based cleaning products.
- WS** Clean with either a water-based or solvent-based cleaning agent.

## Care for High Performance

### Polyurethane Upholstery:

### Meta Texture

### Monotex

### Perilune

### Synaptic

These fabrics feature Cleangene technology. Cleangene is a stain inhibiting polymer inherent to the material make-up. Unlike topical treatments it does not wear off. These fabrics have been tested using the following cleaners:

- No Effect** No change in color or surface finish.
- Slight Effect** A change in color or surface finish only visible at certain angles.
- Moderate Effect** A change in color or surface finish visible from all angles and directions, but does not appreciably alter the original condition of the material.
- Severe Effect** A change in color or surface finish, which obviously and markedly alters the original condition of the material.

The above evaluations are indicators after laboratory testing performed with proper cleaner/disinfectant usage. After each application, the surface must be wiped with clean water and dried with a clean towel to remove any chemical residue. Improper use of cleaners/disinfectants can expedite a product failure and void warranty.
