COLLECTION

# WE BELIEVE IN

We believe in the power of design to enhance spaces and lives. Collaborating with some of the world's most accomplished designers, we create beautiful, purposeful, and meticulously crafted furniture. Our pieces are designed to be practical and enduring, maintaining their aesthetic appeal and functional value year after year.

From internationally celebrated designers, to emerging talent, we work with a host of skilled individuals, forging close and lasting relationships that lead to fresh and innovative ideas, the curiosity to explore new materials and techniques and furniture that stands out for the integrity of its design.

Every piece in our collection is the result of a carefully considered brief and a close collaboration between designer and development team, each designer bringing to the table their own singular style and *modus operandi*.

# B CORP

**BEING A B CORP** means we are part of a global movement using business as a force for good - **WE ARE PROUD TO BE GOING BEYOND** 'business as usual'.

**With a purpose greater than simply making a profit, every B Corporation must align its business activities with positive actions for a better world.**

The 'B' in B Corp stands for 'benefit for all'. B Corps, have been verified by the B Lab (an independent, not for profit organisation) to benefit all stakeholders.

Every B Corp has made a commitment to prioritise not just its shareholders, but everyone with a stake in its performance: Workers, customers, suppliers, local communities, wider society and the environment are all on an equal footing with profit. This means business decisions need to factor in impacts on People and Planet as well as Profit and always question whether these decisions align with the fourth 'P' - Purpose.

B Corps are driven by the desire to create an inclusive, equitable, and regenerative economy that benefits all. This purpose informs every aspect of our business, from our daily operations to the highest level of governance.

As social conscience and eco-consciousness become key drivers in consumer decision making, the B Corp logo is a simple stamp of approval that lets customers know that our business plays a positive role in shaping the kind of world we want to live in.
