tone

set the **tone**

tone /tōn/:

To soften or reduce the intensity of a sound or color. To give a particular intonation or inflection. To assume a pleasing color quality or tint. To blend or harmonize in color.

Visually soft and minimalist, the Tone™ chair is designed to blend seamlessly with its setting. Its rounded frame invites touch and a pure silhouette balances simplicity with superior comfort.

Tone allows for an expressive and efficient use of materials. Two different mesh styles are available in an uplifting color palette.

An innovative knit sleeve, adapted from the organic structure of a leaf, adds texture with minimal fabric waste and environmental impact.

Thoughtful in each detail at an accessible price, Tone marries the needs of people, place and planet in an elegant whole.

q u i e t

yet spirited!

Tone allows for an expressive use of materials with two different mesh styles and sleeve add-ons that provide a visual refresh of the same chair. Performance Mesh features a breathable, open translucent weave. Lifestyle Mesh offers a softer, tighter weave similar to residential fabric.

lifestyle mesh

An innovative knit sleeve, adapted from the organic structure of a leaf, adds tactile softness and comfort to the Tone chair. Artisanal in design and craftsmanship, dual yarn pairings create organic mélange details. Made to fit, the knit sleeve adds texture with minimal fabric waste and environmental impact.

Luum sleeves are tailor fitted to slip over the Tone backrest, utilizing the same chair to refresh a space with minimal additional investment. A curated collection of Luum textiles in a range of colors and patterns expands design options to create a more quiet, or spirited, setting.
