Earthly Artifacts Collection by Luum

The world is shaped by the way we move. *Earthly Artifacts* is a collection by Suzanne Tick that features four textiles inspired by the physical impressions left by humans on the earth — and the patterns created in the process.

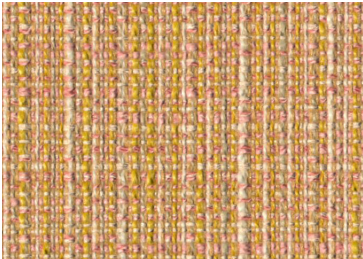

Drawing from shared elements across art, anthropology and geology, *Earthly Artifacts* examines the impact and expression of nature’s organizing principles: discernable up close and undeniable at scale. Made with a variety of high-performance, recycled materials selected for multi-purpose and indoor/outdoor use — such as high-UV polyester, high-UV polypropylene, and 100% recycled polyester — Geoglyph, Pebble Melange, Particulate and Megacheck reflect our continuous desire to immerse ourselves in nature. These textiles feature layered fields of multi-color materials that create complex earthen shades, reminiscent of contemporary art and archaeological remnants.
