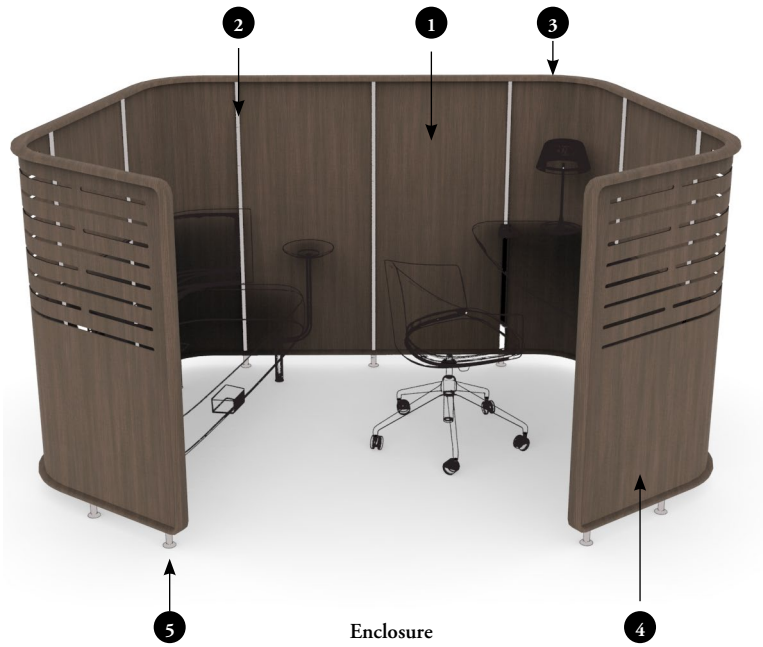
understanding enclosures

understanding enclosures

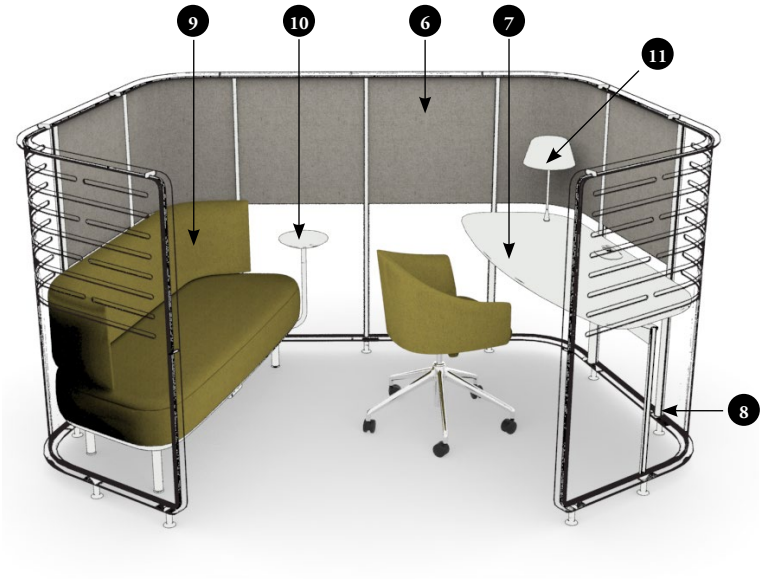
Zones Enclosures and Screens consist of screen segments and trims that Flat Fabric Buffers, Quilted Fabric Buffers, Worksurfaces, Seating, Lighting and Accessories attach to. The Enclosure or Screen is specified as one complete unit. Buffers, Worksurfaces, Supports, Seating and Accessories are specified separately.



Enclosure

1. **Screen segment:**
   - Constructed of laminated plywood, 6mm thick
   - Secured to the vertical metal trim and wood enclosure and screen segment trims
   - All screen segments are included, the Enclosure or Screen type will determine the size and number required
2. **Vertical metal trim:**
   - Painted aluminum extrusions that are bonded to the screen segment
3. **Enclosure and Screen trim:**
   - Constructed of solid beech, 20mm thick
   - Wraps around the top, bottom and ends of an Enclosure or Screen
   - All segments of trim are included, the Enclosure or Screen type will determine the location and number required
4. **Wing segment:**
   - Provides various levels of privacy
   - Available with or without partial heights slots
5. **Feet:**
   - Elevate the Enclosure or Screen 64mm for a visual lightness
   - Provide 38mm of leveling
   - Enable casual power routing under an Enclosure or Screen

understanding enclosures (continued)



Enclosure

6 Flat and Quilted Fabric Buffers

- Provide a textured visual softness and an implied acoustic feel
- Available partial or full height for Flat Fabric Buffers
- Available partial height for Quilted Buffers
- Available for interior and exterior applications

7 Worksurfaces:

- Size and shape are specific to each Enclosure
- Attach directly to the screen segment with brackets or are mounted to a support kit in freestanding applications

8 Support kits:

- Clamp onto the vertical metal trim to provide semi-suspended support to worksurfaces
- Include a power cable manager
- Ordered as kits, the Enclosure type will determine the number and type required

9 Soft Seating:

- Provides a freestanding sofa within an Enclosure or Screen
- Does not offer structural support to the Enclosure or Screen

10 Sofa tablets:

- Constructed of birch plywood finished with Zones laminates or veneers
- Attach to sofas and provide a secondary surface for coffee and notebooks
- Do not attach to the Enclosure or Screen

11 Lighting

- Table Lamps can be freestanding or can be mounted through the worksurface
- Sconces attach to the vertical metal trim

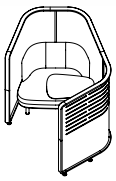
enclosures overview

Zones offers two Enclosure styles that provide spaces for heads down work or for collaboration.

Focus

- An area for retreat, heads down or individual work
- Provides a compact and semi-private workspace, capable of supporting touchdown and shared environments and a degree of privacy for people working in the open office

Focus Zone – Solo (shown)



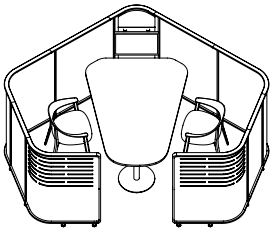
Lounge Zone – Solo

enclosures overview (continued)

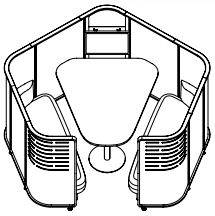
Zones offers two Enclosure styles that provides spaces for heads down work or for collaboration.

Collaboration

- An area for a small group to retreat and collaborate or to do heads down work together
- Supports a group within the semi-enclosed Enclosure with options for Soft and Multi-Use Seating, worksurfaces, and the ability to mount monitors, allowing for multi-use spaces



Task Digital Meeting Zone – Four (MZNCAD)



Digital Lounge Meeting Zone – Four (MZNCAN)

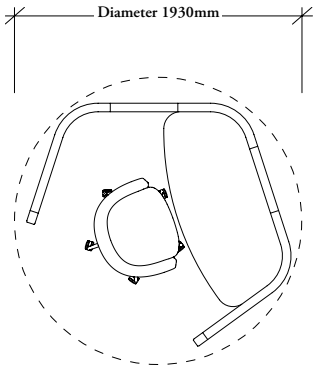
focus zone – solo basics

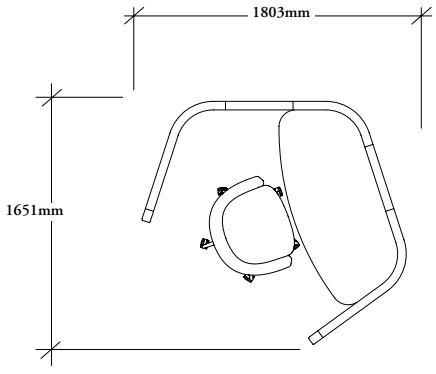
MZNCFS

The Focus Zone – Solo is a functional working space for a single user to focus for a whole day or to concentrate on working tasks without being disturbed. It is a space to pop in and out of during the day that can easily accommodate the use of personal technology and other tools.

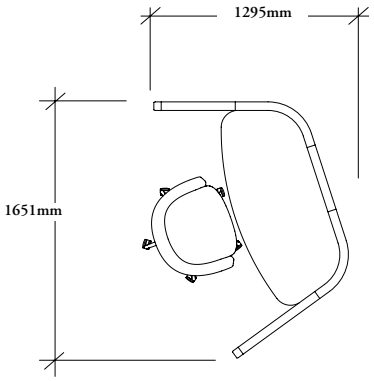
- Designed to be used for 1-8 hours
- 1397mm high for seated privacy
- Optional Wing Panel is available with partial height slots
- Available with the option for a partial height interior Flat Fabric Buffer and full or partial height exterior Flat Fabric Buffer
- Available with the option for a partial height Quilted Fabric Buffer on the interior
- Accommodates a semi-suspended worksurface with optional Power Box (MZNBL4 only) and Table Lamp cut outs

Focus Zone – Solo Enclosure with left partial slots
- Flat Fabric Buffer partial height interior
- Flat Fabric Buffer full height exterior





With optional wing



Without optional wing

focus zone – solo basics (continued)

The following outlines the steps and options that must be considered when specifying a Focus Zone – Solo Enclosure.

		Options	As shown in rendering
1	Enclosures and slots (MZNCFS) (N) (L/R) (A) *Wing Panel Partial Slots, Right shown	Wing Panel: A = No wing panel, no slots N = Wing panel, no slots L = Wing panel, partial slots, left R = Wing panel, partial slots, right	MZNCFS55L Partial left slots

5	Specify accessories  (ZNEP) (ZNETL) *Wire management is available to route Power Boxs and Table Lamp cables, see Power Cable Manager (MZNEN) in the Lighting, Electrics and Wire Management section	MZNBL4 = Power Box ZNETL = Table Lamp	ZNEPSA120 One power, one USB module ZNETL2 Through-mount

lounge zone – solo basics

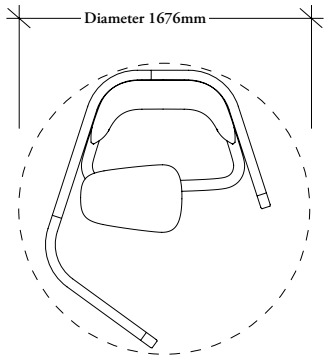
MZNCGS

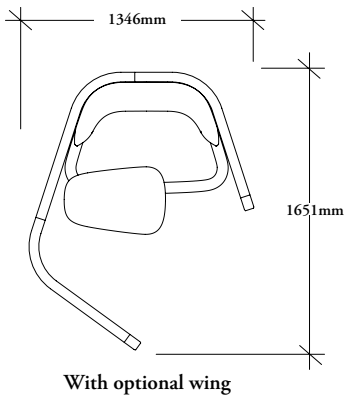
The Lounge Zone – Solo is a place to take a break and work privately. The compact footprint provides easy access to the tools a user needs while still providing easy access to the rest of the office.

- Designed to be used for 5 minutes to 2 hours
- 1397mm high for seated privacy
- Available with or without a wing panel
- The optional Wing Panel is available with partial height slots
- Available with the option for a full or partial height Flat Fabric Buffer on the interior or exterior
- Available with the option for a partial height Quilted Fabric Buffer on the interior
- Accommodates an In-The-Zone Sofa – 1-Seater with optional tablet worksurface and integrated power

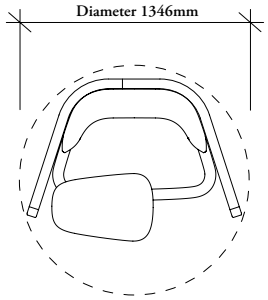
Lounge Zone – Solo Enclosure with wing left panel with partial slots

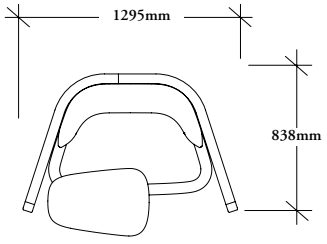
- Flat Fabric Buffer partial height interior
- Flat Fabric Buffer full height exterior





With optional wing





Without optional wing

lounge zone – solo basics (continued)

The following outlines the steps and options that must be considered when specifying a Lounge Zone – Solo Enclosure.

		Options	As shown in rendering
1	Enclosures and slots (MZNCGS)  (A N) (N L/R) (P L/R) *Left wing panel shown, right available	Wing panel: A = No wing panel N = Wing panel no slots P = Wing panel, partial slots Orientation: N = Not available L = Left R = Right	MZNCGS55PL Wing panel partial left slots
2	Interior and exterior Fabric Buffer (MZNCBFGS Flat) (MZNCBQGT Quilted):  (N P N) (N F N) (N P X) (N F X) Entire Enclosure including wing panel (three buffers)  (L/R P N) (L/R F N) (L/R P X) (L/R F X) Entire Enclosure excluding wing panel (two buffers) *Left wing panel with flat buffer shown, right available *Quilted Buffers available partial height	Coverage orientation : N = Entire Enclosure including wing panel L = Entire Enclosure excluding left wing panel R = Entire Enclosure excluding right wing panel Configuration: P = Partial height F = Full height Application: N = Interior X = Exterior	MZNCBFGS55LPN Left wing panel, left slots, Flat Fabric Buffer covering entire Enclosure excluding left wing panel, partial height interior MZNCBFGS55LFX Left wing panel, left slots, Flat Fabric Buffer covering entire Enclosure excluding left wing panel, full height exterior

task digital meeting zone – four basics

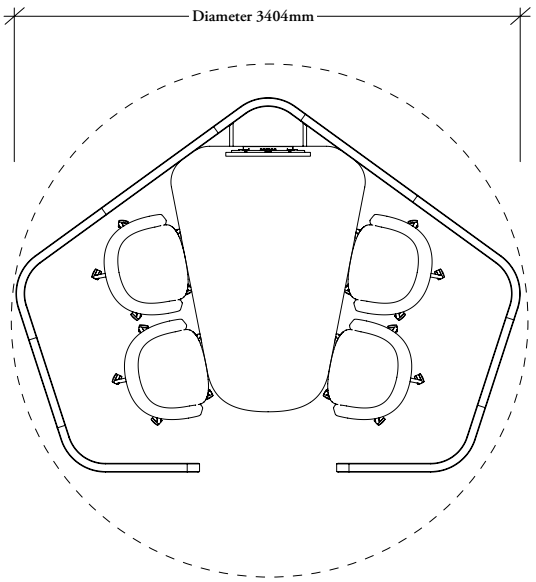
MZNCAD

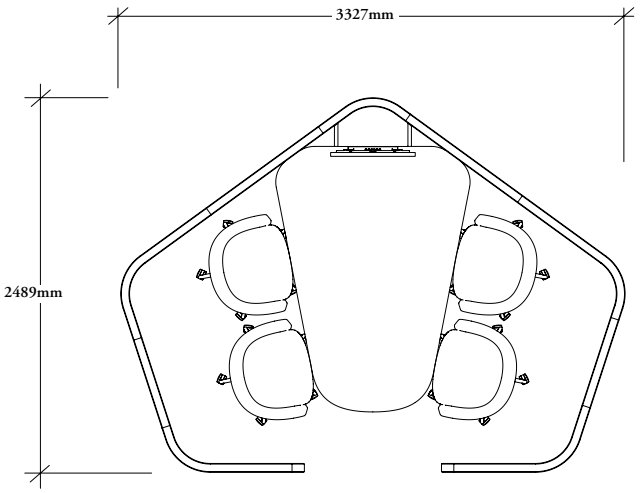
The Task Digital Meeting Zone – Four provides a task height private space for four people to meet. The Enclosure is ideal for digital meetings and presentations and the table provides power and data for laptops and connectivity to the screen.

- Designed to be used for 30 minutes to 4 hours
- 1375mm high for seated privacy
- Available with or without partial height slots on the wings
- Available with the option for a full or partial height Flat Fabric Buffer on the interior or exterior
- Available with the option for a partial height Quilted Fabric Buffer on the interior
- Accommodates multi-use seating and a task height semi-suspended worksurface with a monopod leg and a Monitor Tower

Task Digital Lounge Meeting Zone – Four Enclosure with partial slots

- Flat Fabric Buffer partial height interior
- Flat Fabric Buffer full height exterior





task digital meeting zone – four basics (continued)

The following outlines the steps and options that must be considered when specifying a Task Digital Lounge Meeting Zone – Four Enclosure.

			Options	As shown in rendering
1	Enclosures and slots (MZNCAD)  (N) (P)		Slot option: N = No slots P = Partial slots	MZNCAD55P With slots
2	Interior and exterior Fabric Buffer (MZNCBFAD Flat) (MZNCBQAD Quilted):  (N P N) (N F N) (N P X) (N F X) Entire Enclosure including wing panel (nine buffers)  (Y P N) (Y F N) (Y P X) (Y F X) Entire Enclosure excluding wing panel (seven buffers) *Quilted Buffers available partial height		Coverage orientation: N = Entire Enclosure including wing panels Y = Entire Enclosure excluding wing panels Configuration: P = Partial height F = Full height Application: N = Interior X = Exterior	MZNCBFAD55YPN Flat Fabric Buffer covering entire Enclosure excluding wing panels, partial height interior MZNCBFAD55YFN Flat Fabric Buffer covering entire Enclosure excluding wing panels, full height exterior

5	Accessories  (MZNBL4)	*Wire management is available to route Power Boxs and Table Lamp cables, see Power Cable Manager (MZNEN) in the Lighting, Electrics and Wire Management section	MZNBL4 = Power Box	MZNBL4LB120 Three power, one USB module

digital lounge meeting zone – four basics

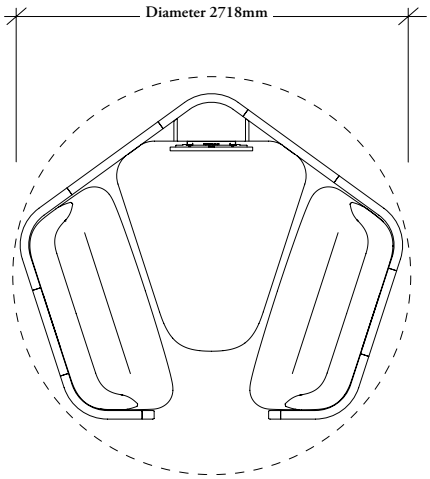
MZNCAN

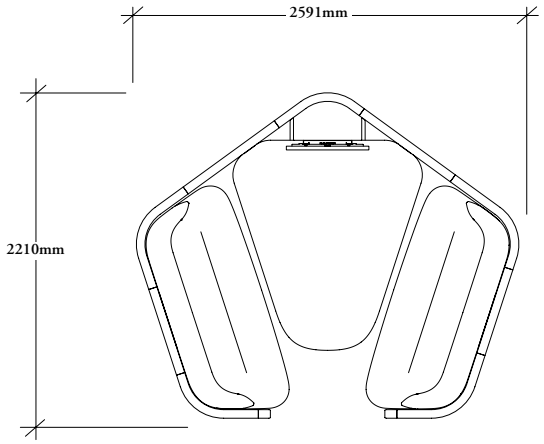
The Digital Lounge Meeting Zone – Four provides a lounge height, private space for four people to meet. It is ideal for digital meetings and presentations and the table provides power and data access for laptops and connectivity to the screen.

- Designed to be used for 30 minutes to 4 hours
- 1397mm high for seated privacy
- Available with or without partial height slots on the wings
- Available with the option for a full or partial height Flat Fabric Buffer on the interior or exterior
- Available with the option for a partial height Quilted Fabric Buffer on the interior
- Accommodates In The-Zone Sofa – 2 Seater, a seated height semi-suspended worksurface with a monopod leg and a Monitor Tower

Digital Lounge Meeting Zone – Four Enclosure with partial slots

- Flat Fabric Buffer partial height interior
- Flat Fabric Buffer full height exterior





digital lounge meeting zone – four basics (continued)

The following outlines the steps and options that must be considered when specifying a Digital Lounge Meeting Zone – Four Enclosure.

		Options	As shown in rendering
1	Enclosures and slots (MZNCAN)  (N) (P)	Slot options: N = No slots P = Partial slots	MZNCAN55P With slots
2	Interior and exterior Fabric Buffer (MZNCBFAN Flat) (MZNCBQAN Quilted):  (N P N) (N F N) (N P X) (N F X) Entire Enclosure including wing panels (nine buffers)  (Y P N) (Y F N) (Y P X) (Y F X) Entire Enclosure excluding wing panels (seven buffers) *Quilted Buffers available partial height	Coverage orientation: N = Entire Enclosure including wing panels Y = Entire Enclosure excluding wing panels Configuration: P = Partial height F = Full height Application: N = Interior X = Exterior	MZNCBFAN55YPN Flat Fabric Buffer covering entire Enclosure excluding wing panels, partial height interior MZNCBFAN55YFN Flat Fabric Buffer covering entire Enclosure excluding wing panels, full height exterior
3	Seating (MZNSD)  (N N) (N U)	Small tablet option: N = No tablet Electrical option: N = No electrical module U = One simplex and 2 USB	MZNSDNU x 2 One simplex 2 USB

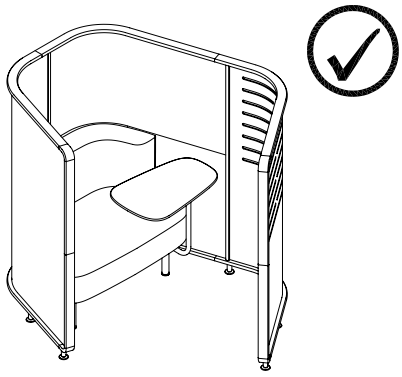
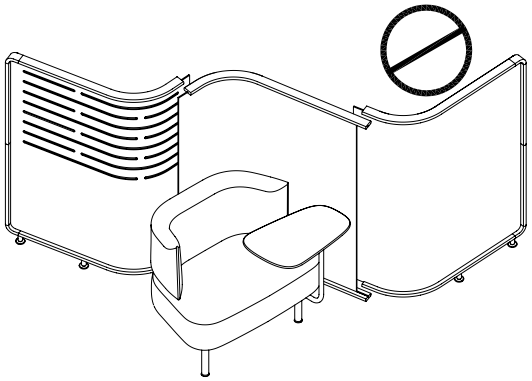
5	Supports (MZNWSAN) and Monitor Towers (MZNET)  (MZNWS) (MZNET) *Kit includes: One monopod leg	Supports height: T = Task Monitor Tower configuration: T = Task Corner	MZNWSANT Task height MZNETT Task Corner

planning with enclosures

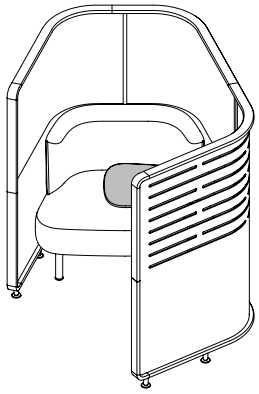
The following should be considered when planning with Enclosures.



Enclosures are specified as complete units. All screens and vertical metal trims are pre-assembled into modules.



Custom configurations are not possible.

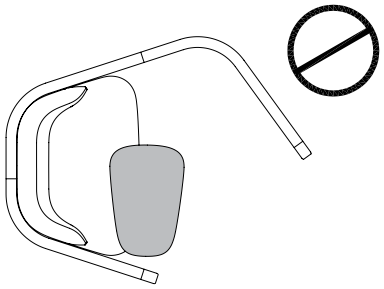


Right handed (shown)

The handedness of an enclosure is determined by the location of the slots on the wing as seen when looking into the Enclosure from the entrance.

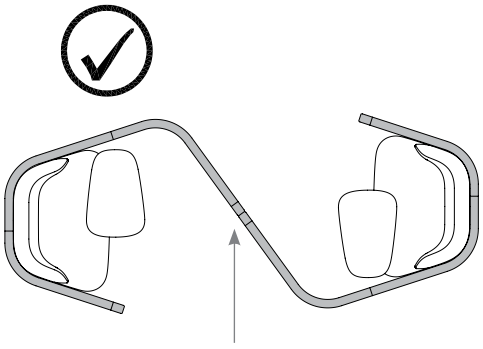
If no slots are specified, the handedness is determined by the "Wing Panel" relative to the entrance of the Enclosure.

Applies to:
- Lounge Zone -Solo
- Focus Zone - Solo



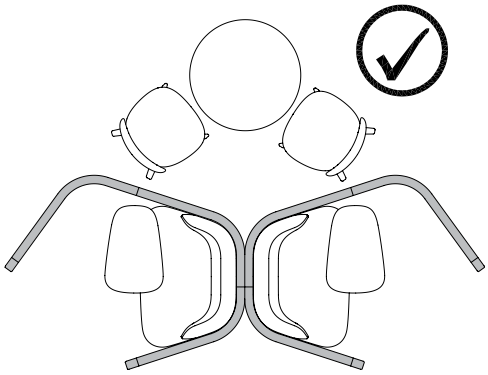
When a In-The-Zone Sofa – 1-Seater is specified with a tablet, it is recommended that the tablet position not be on the outer side of the Enclosure as it will interfere with entry

Applies to:
- Lounge Zone - Solo

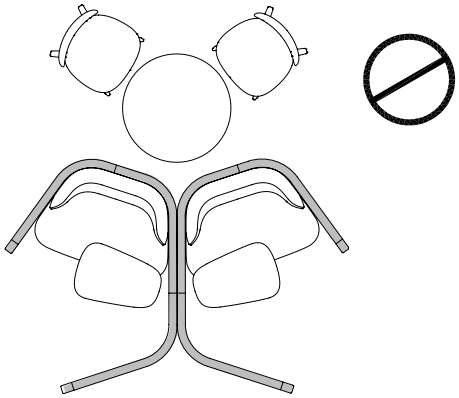


Enclosures **cannot** be attached to each other. They are designed to be stand alone enclosures. Two individual enclosures can be placed end to end in an application so that an "S" configuration is formed.

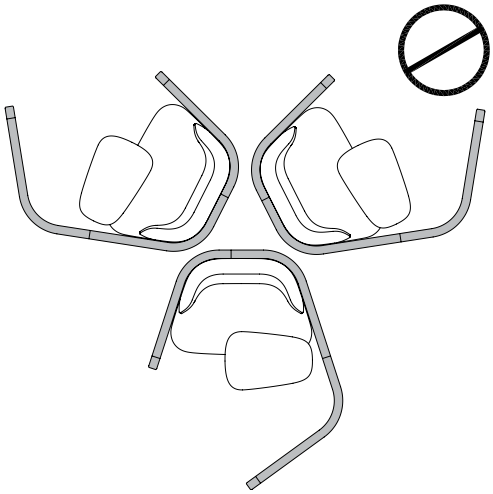
planning with enclosures (continued)



If planning Enclosures back-to-back, it is recommended that the shorter lengths be back-to-back together, so that the outsides can be used for other functions such as small meeting areas.



If planning Enclosures back-to-back, it is **not** recommended that the longer lengths be back-to-back together, as it does not allow space for small meeting areas.

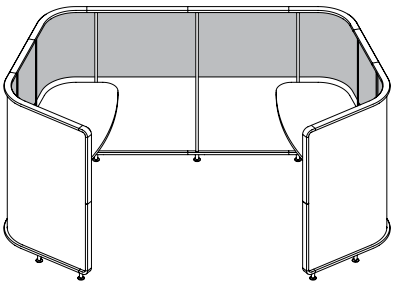


It is not recommended that the Enclosures be clustered, the 108˚ angle does not nest efficiently.

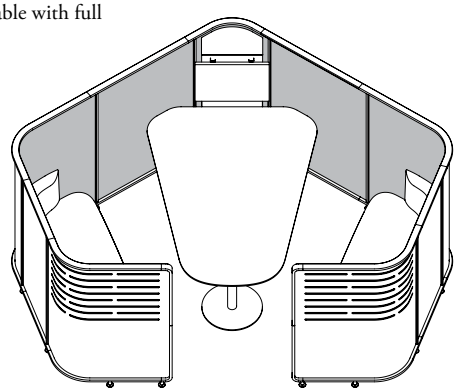
planning with buffers

fabric buffers

- Flat Fabric Buffers can be specified on the interior and exterior of an Enclosure
- Quilted Fabric Buffers can be specified on the inside of an Enclosure
- Buffers are not specified individually for each section of the Enclosure, they are specified as one complete unit
- Flat Fabric Buffers are available full or partial height, however not all configurations are available with full height on the interior
- Quilted Fabric Buffers are available partial height



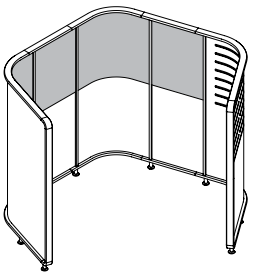
Partial height

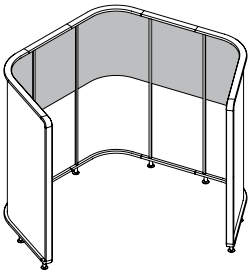


Full height

When a worksurface requires brackets for mounting to the segment, a partial height buffer must be used, as the full height buffer will interfere with the brackets.

The following Enclosures can accommodate a full height interior buffer because the worksurface is semi-suspended from the Monitor Tower and does not require brackets:
- Digital Lounge Meeting Zone-Four
- Task Digital Meeting Zone - Four
- Bar Digital Meeting Zone -Four



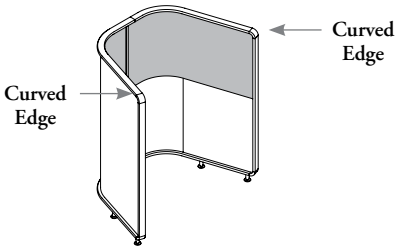


End screen segments can be specified with or without slots. If specified without slots, the Flat Fabric Buffer or Quilted Fabric Buffer will wrap all of the way around the inside of the Enclosure.

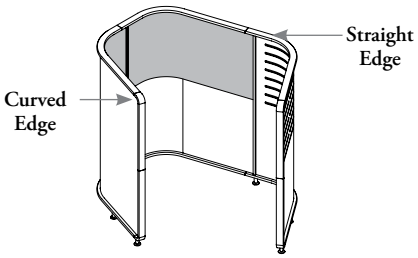
wing panels

Some Enclosures are available with options for:
- No wing panels
- Optional wing panels with or without slots

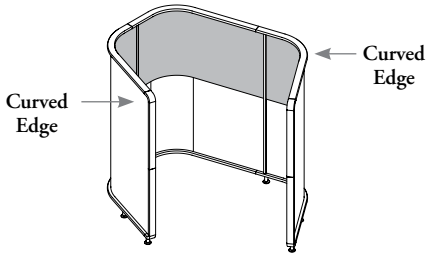
These include:
- Focus Zone - Solo
- Lounge Zone -Solo
- Lounge Zone - Twin



When a Flat Fabric Buffer or Quilted Fabric Buffer for Enclosure with No Wing Panel (A) is required, two buffer sections are included, both will have curved edges.



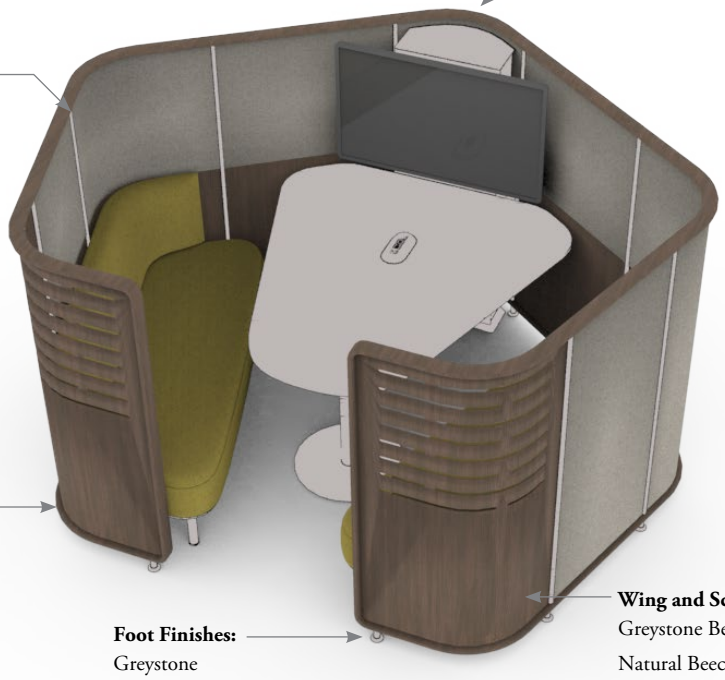
When a Flat Fabric Buffer or Quilted Fabric Buffer for Entire Enclosure Excluding Wing Panel (R or L, right shown above) is required, two buffer sections are included, one will have a curved edge, and one will have a straight edge where it meets the wing panel with slots.



When a Flat Fabric Buffer or Quilted Fabric Buffer for Entire Enclosure, including Wing Panel (N) is required, a third buffer section to cover the wing is included. Two buffer sections will have curved edges and one will have a straight edge.

enclosure finishes

Zones offers a unique finish palette that complements Teknion's product portfolio. The following outlines the finishes and materials available on all Enclosures.



Vertical Metal Trim:
Greystone
Crisp Grey

Trim Finishes:
Solid Greystone Beech
Solid Natural Beech

Foot Finishes:
Greystone
Crisp Grey

Fabric Buffer Finishes:

Panel Fabric:
Grade A, Grade 1, Grade 2, Grade 3, Grade 5, Grade 7, COM
(Selected offering)

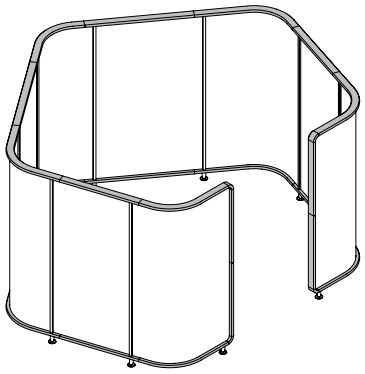
Upholstery Fabric:
Grade 1, Grade 2, Grade 3, Grade 4, Grade 5, Grade 6, Grade 7, Grade 8, Grade 9, Grade 10 and Fabric COM
(Selected offering)

Quilted Fabric Buffer Finishes:

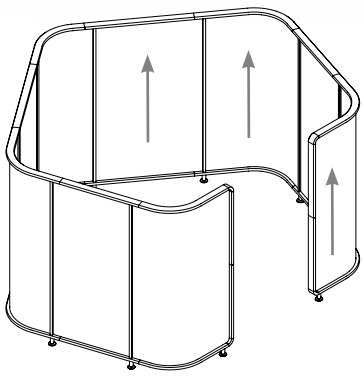
Upholstery Fabric:
Grade 1, Grade 2, Grade 3, Grade 8, Grade 9, and Fabric COM
(Selected offering)

Wing and Screen Finishes:
Greystone Beech Laminate
Natural Beech Laminate
Grey Stone Laminate
Crisp Grey Laminate
Pure White

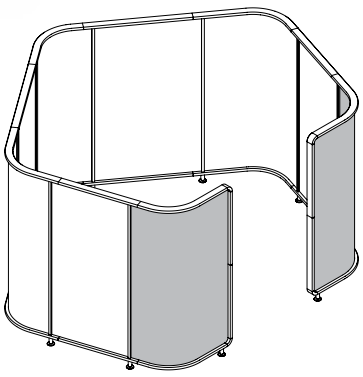
grain direction



The woodgrain direction on the trim does not bend around the curves. It is a random match.



The woodgrain on screens runs vertical on all Enclosures.



Wing Panels are the screen sections at the end of an enclosure where slots or no slots can be specified. These wing panels can be specified in a different finish.

Enclosure Finishes

Trim Finishes:

Solid Natural Beech | Solid Greystone Beech

Wing and Screen Laminate (HPL):

Greystone Beech Laminate | Natural Beech Laminate | Crisp Grey Laminate | Greystone Laminate

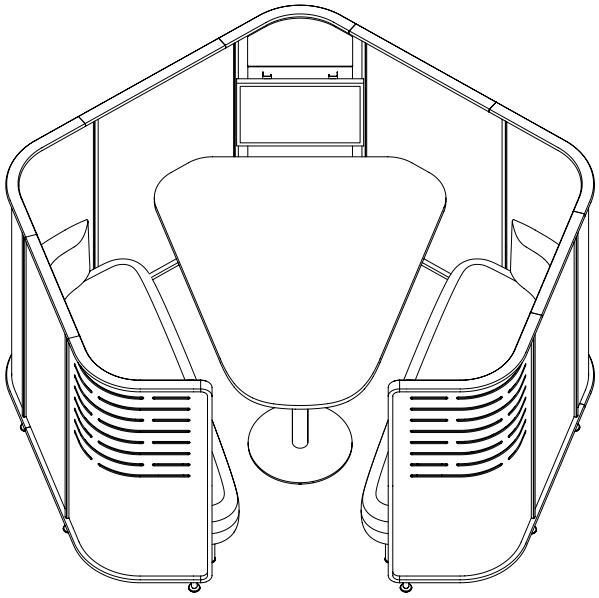
worksurface basics

Zones worksurfaces are specific to each Enclosure, only one size is available for each Enclosure type.



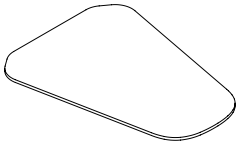
Digital Lounge Meeting Zone – Four (shown)

Zones Worksurface (MZNWW)

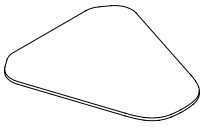
Worksurfaces are specific to each Enclosure type, they are available in one size only for each Enclosure.

Cut-outs for International Electrics is also available.

Focus Zone – Solo (FS)



Task Digital Meeting Zone – Four (AD)

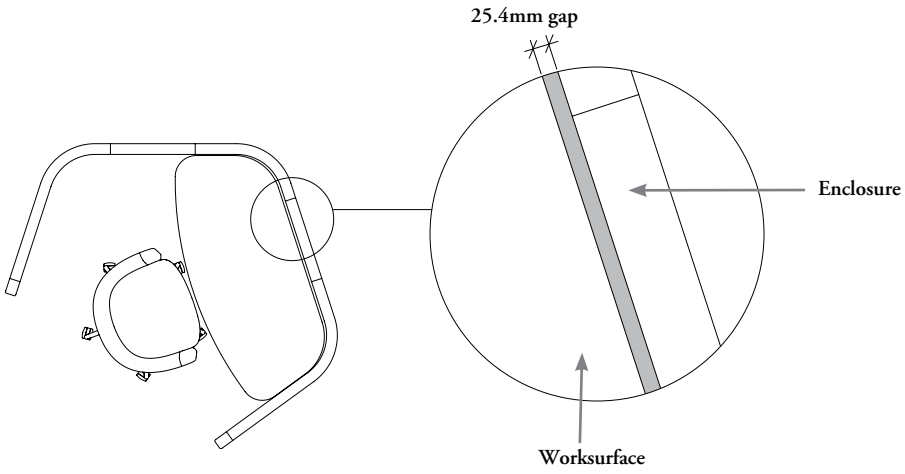


Digital Lounge Meeting Zone – Four (AN)

planning with worksurfaces

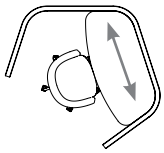
The following should be considered when planning with Zones worksurfaces.

There is always a 25.4mm wire gap between the Enclosure Screen and the worksurface for wire management.

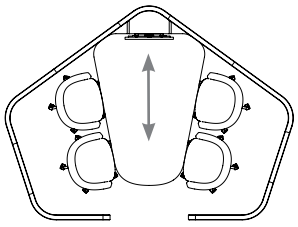


grain direction

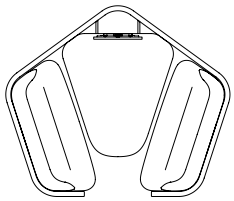
The woodgrain direction on all worksurfaces runs parallel to the length of the worksurface.



Focus Zone – Solo



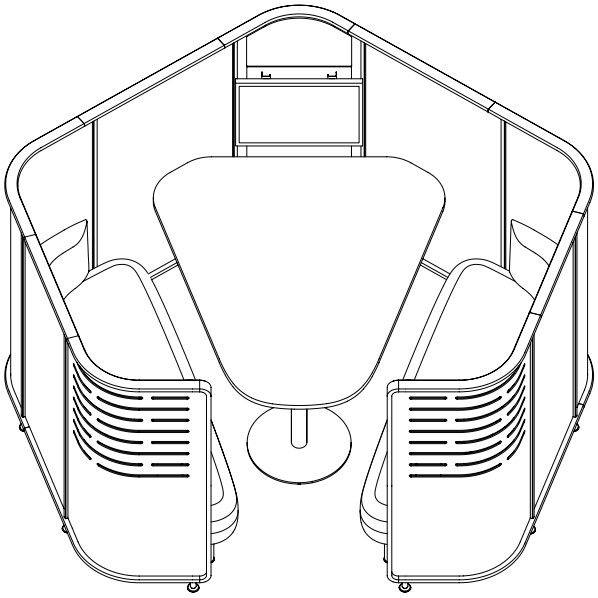
Task Digital Meeting Zone – Four



Digital Lounge Meeting Zone – Four

worksurface support basics

Zones worksurface supports are specific to each Enclosure type, and are specified as kits.



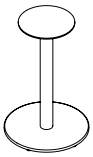
Digital Lounge Meeting Zone – Four (shown)

Kit of Worksurface Supports (MZNWS)

- Each Enclosure Worksurface requires a different combination of supports
- By specifying which type of worksurface is required, the correct number of supports will be included in each kit
- Kits can consist of the following components
- Configurations with a Cantilever assembly (FS) will also include a clip-on vertical wire manager for each pair of Cantilever assemblies provided

Cantilever:

- Mounts to the vertical metal trim of the Enclosure
- Available 737mm high



Monopod Leg:

- Mounts to the underside of the Worksurface and is always used with a Monitor Tower (MZNET)
- Available 737mm high

planning with worksurface supports

The following chart outlines the amount and type of supports included for each support kit.

understanding tables

understanding tables

Zones Tables are designed for both work spaces and casual spaces. All tables have rounded edges to provide a warm curved wood aesthetic.

work tables

canteen tables NA

- Provide an informal non traditional meeting space
- Suitable for 3-6 people
- Available in task, counter and bar height
- Curved leg detail

dynamic cubby table N

- Made up of two layers, one acting as a working surface and the other to create a storage niche
- Suitable for 3-6 people
- Available in bar height
- Canteen style legs on casters provide easy mobility in dynamic work areas

workshop tables N

- Ideal for group settings that fully engage participants in project centered work
- Suitable for 4-10 people
- Straight turned wood leg
- Optional integrated electrics runner is available on Dialogue and Task height rectangular tables
- Available in three heights to support a variety of postures
  - Lounge height, 406mm high
  - Dialogue height, 660mm high
  - Task height, 740mm high
- Long Workshop Tables are available and can accommodate up to 20 people

bistro tables NA

- Ideal for casual lounge or cafeteria settings
- Suitable for 2-4 people
- Available in task and bar height
- Available in 4-star metal base

N North America only | A Asia Pacific only NA Both

understanding tables (continued)

work tables (continued)

ledge tables NA

- Provide additional surface area-optimized to support casual touch down areas around the modular sofa. With its tall, and shallow depth at bar height, the Ledge Table is perfect for additional guests to perch or stand
- Suitable for 2-4 people
- Start, Middle and End tables can be specified to create longer runs up to 18' long
- Curved Ledge Tables are available

casual tables

casual tables NA

- Ideal for lounge and casual settings
- Available with a variety of styles and heights

zones laptop tables NA

- Offer a new approach to how one organizes their items around a small pull-up table

N North America only | A Asia Pacific only | NA Both

understanding tables (continued)

The following chart outlines the heights of all tables within the Zone's family.

Casual Tables • Low Tea Tables – 406mm high • High Tea Tables – 483mm high • Coffee Tables – 453mm high • Laptop Table – 660mm high	 * **483mm high table (shown)**	 Low Tea Tables (Round and Square) (MZNTSR/NZNTSS)	 High Tea Tables (Round and Square) (MZNTTR/MZNTTS)

canteen table basics

Zones Canteen Tables have a curved leg aesthetic and are ideal for touchdown or hot-desking settings.

- Available in the following heights:
  - Task height (740mm)
  - Counter height (914mm)
  - Bar height (1067mm)
- Available in the following styles:
  - Soft Rectangular
  - Soft Square
  - Round

Soft Square Canteen Table (MZNTCS)

- Available in three sizes
  - 914mm deep
  - 1067mm deep
  - 1218mm deep

Round Canteen Table (MZNTCR)

- Available in four sizes, depending on height
  - 762mm diameter
  - 914mm diameter
  - 1057mm diameter
  - 1218mm diameter

Soft Rectangle Canteen Table (MZNTCC)

- Available in three sizes
  - 762mm deep x 1828mm wide
  - 914mm deep x 1828mm wide
  - 914mm deep x 2438mm wide
- Bar height table available with casters

planning with canteen tables

The following should be considered when planning with Canteen Tables.

Canteen Tables are available in a variety of heights and shapes to provide several planning options.

	740mm high datum	914mm high datum	1067mm high datum	1092mm high datum
Soft Square	914mm wide 1067mm wide 1218mm wide	914mm wide 1067mm wide 1218mm wide	914mm wide 1067mm wide 1218mm wide	n/a

Soft Rectangle	762mm deep x 1828mm wide 914mm deep x 1828mm wide 914mm deep x 2438mm wide	762mm deep x 1828mm wide 914mm deep x 1828mm wide 914mm deep x 2438mm wide	762mm deep x 1828mm wide 914mm deep x 1828mm wide 914mm deep x 2438mm wide	n/a

datum heights

Canteen Tables are available in task, counter and bar height to allow for different meeting styles.

Task Height
740mm high

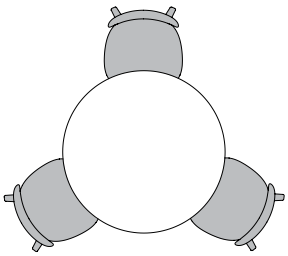
Counter Height
914mm high

Bar Height
1067mm high

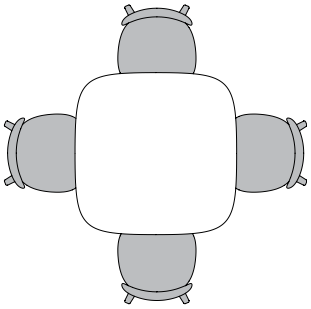
planning with canteen tables (continued)

recommended occupancy

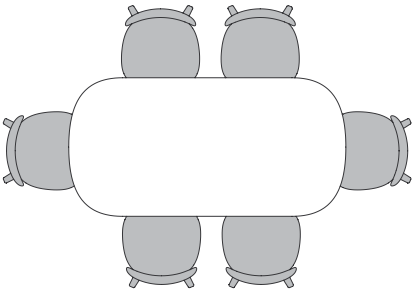
The following demonstrates the recommended table occupancy to allow for adequate personal and working space and proper alignment with the curved legs of the tables.



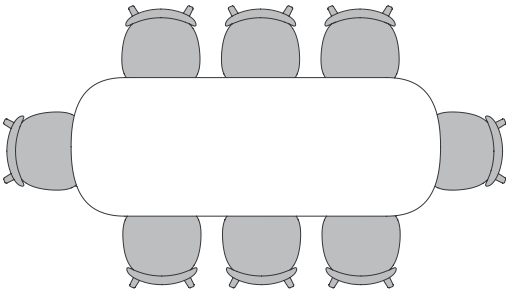
Round Canteen Table
762mm, 36", 1067mm and 1218mm diameter
(1067mm diameter, shown)
3 people maximum



Soft Square Canteen Table
36", 1067mm and 1218mm deep
(1067mm shown)
4 people maximum



Soft Rectangle Canteen Table
36" deep x 1828mm wide (762mm deep also available)
6 people maximum

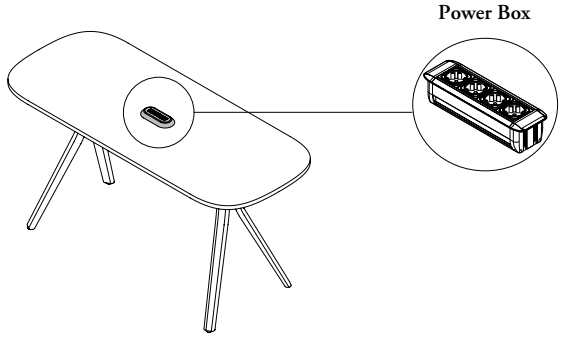


Soft Rectangle Canteen Table
36" deep x 2438mm wide (762mm deep also available)
8 people maximum

planning with canteen tables (continued)

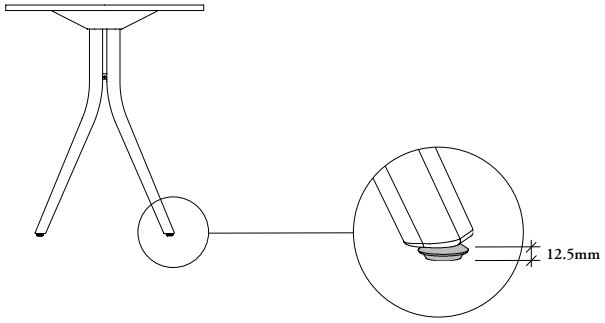
electrics and wire management

The following tables can be specified with a Power Box cut out. The Power Box (MZNBL4 only) must be ordered separately.
- Soft Rectangular Canteen Table (MZNTCC)



762mm deep x 1828mm wide

glides and casters



When a Canteen Table is available with glides, it will have a 12.5mm leveling range.

canteen table finishes

The following outlines the finishes available with Zones Canteen Tables.

Table Top:

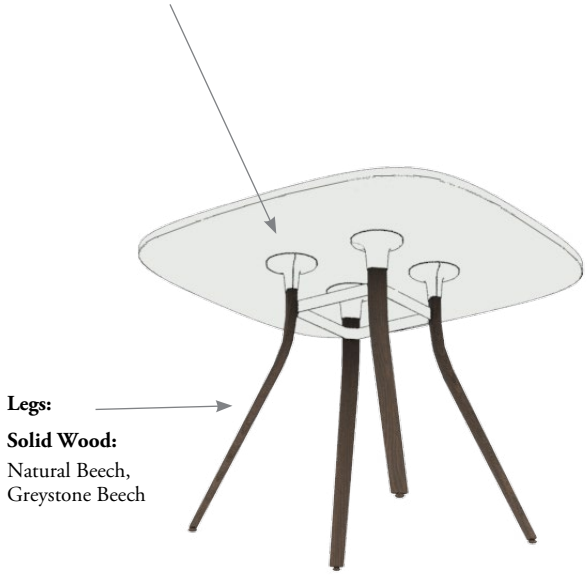
Laminate (HPL):
Very White, Storm White, Sand, Earth, Crisp Grey, Natural Beech and Greystone Beech

Veneer:
Natural Beech and Greystone Beech

Seamless:
Very White, Storm White, Sand, Gris and Crisp Grey

Supports:

Frame Paint Finish:
Greystone, Crisp Grey

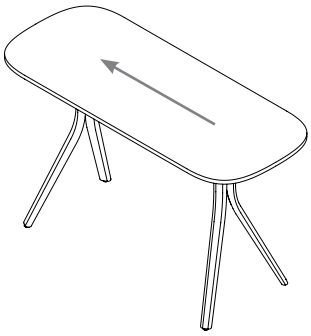


Legs:

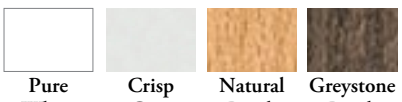
Solid Wood:
Natural Beech, Greystone Beech

grain direction

Woodgrain on all worksurfaces run parallel with the length of the worksurface.



Laminate (HPL):



Pure White | Crisp Grey | Natural Beech | Greystone Beech

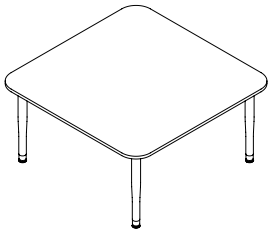
Frame Paint:

Greystone | Crisp Grey

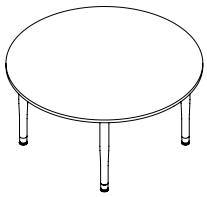
workshop table basics

The Zones Workshop Table can be used for semi-private or semi-formal spaces without having to rely on partitions or the architecture of the space. They serve the needs of classic meeting type environments.

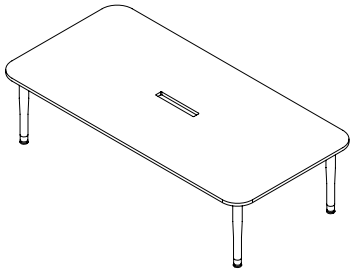
- Available 740mm high
- Available in three styles:
  - Rectangular
  - Square
  - Round
- Available with or without Power Box (MZNBL4 only) or Table Lamp cut outs
- Accommodates User-Edge USB Hub (available from Complements: *Teknion's Ergonomics & Accessories* Program)
- Provides a -12.5mm, + 38.1mm leveling range



Square Workshop Table (MZNTWS)
- 1218mm and 1524mm wide



Round Workshop Table (MZNTWR)
- 1372mm and 1524mm Diameter

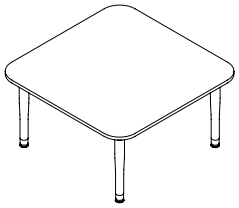


Rectangular Workshop Table (International Cut Out) (MZMTWT)
- 1218mm deep
- Available 2438mm and 3048mm wide
- Available with cut outs to accommodate outlets or Table Lamps in the following configurations:
  - No outlets or Table Lamps
  - Two outlets
  - Two outlets inner, two Table Lamps outer
  - One Table Lamp center, two outlets

dialogue workshop table basics

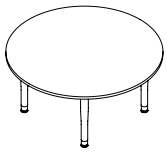
The Zones Dialogue Table is similar to the Workshop Table however it has a more casual posture for informal settings at 25" high.

- Available 635mm high
- Available in three styles:
  - Rectangular
  - Square
  - Round
- Available with or without Power Box (MZNBL4 only), Table Lamp cut outs
- Accommodates User-Edge USB Hub (available from Complements: *Teknion's Ergonomics & Accessories* Program)
- Provides a -12.5mm – +38.1mm leveling range



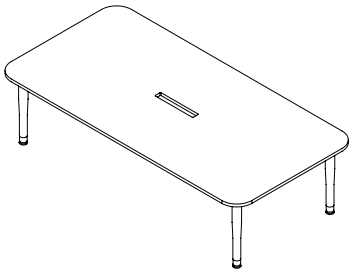
Square Dialogue Workshop Table (MZNTWB)

- 1218mm wide



Round Dialogue Workshop Table (MZNTWD)

- 1372mm Diameter



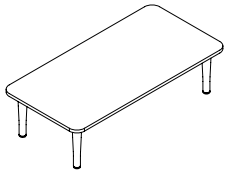
Rectangular Dialogue Workshop Table (International Cut Out) (MZMTWA)

- 1218mm deep
- Available 1828mm and 2438mm wide
- Available with cut outs to accommodate outlets or Table Lamps in the following configurations:
  - No outlets or Table Lamps
  - One outlet center
  - Two outlets
  - Two outlets inner, two Table Lamps outer
  - One Table Lamp center, two outlets

lounge workshop table basics

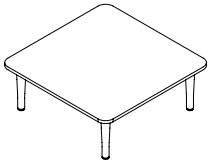
The Zones Lounge Workshop Table is a lounge height work table conducive to work meetings at a flexible posture of 16" high.

- Available 406mm high
- Available in three styles
  - Round
  - Square
  - Rectangular
- Available with or without Center Power Box (MZNBL4 only) and International cut out



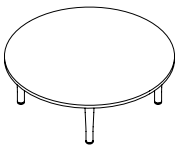
Rectangular Lounge Workshop Table (MZNTWG)

- Available in the following sizes:
  - 762mm deep x 1218mm wide
  - 762mm deep x 1372mm wide
  - 762mm deep x 1524mm wide
  - 762mm deep x 1676mm wide
  - 762mm deep x 1828mm wide



Square Lounge Workshop Table (MZNTWE)

- Available in the following sizes:
  - 1067mm deep x 1067mm wide
  - 1218mm deep x 1218mm wide



Round Lounge Workshop Table (MZNTWC)

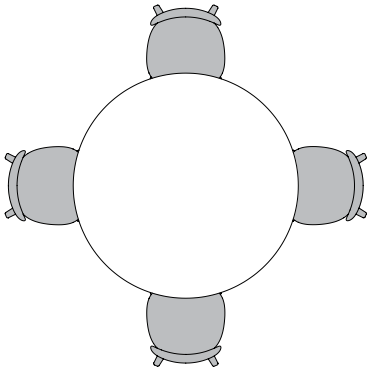
- Available 1218mm diameter

planning with workshop tables

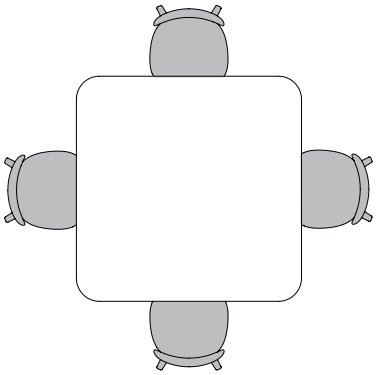
The following should be considered when planning with Workshop Tables.

recommended occupancy

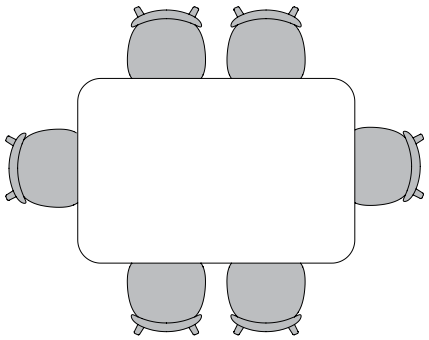
The following demonstrates the recommended table occupancy to allow for adequate personal and working space on Workshop and Dialogue Workshop Tables.



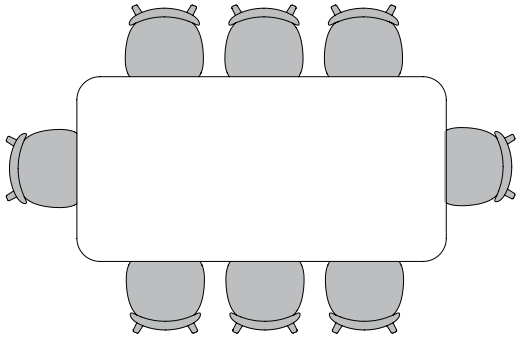
Round Workshop Table 1372mm and 1524mm diameter
4 people maximum



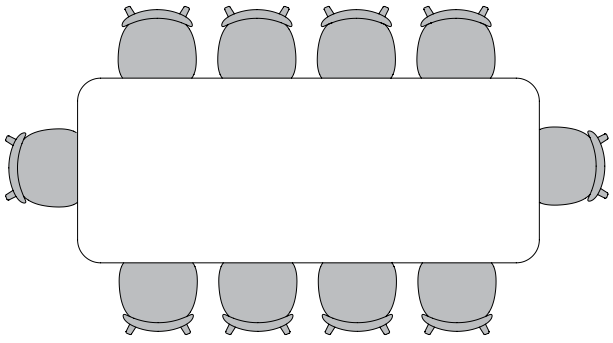
Square Workshop Table 1218mm deep and 1524mm wide
4 people maximum



Rectangular Workshop Table
1218mm deep x 1828mm wide
6 people maximum



Rectangular Workshop Table
1218mm deep x 2438mm wide
8 people maximum

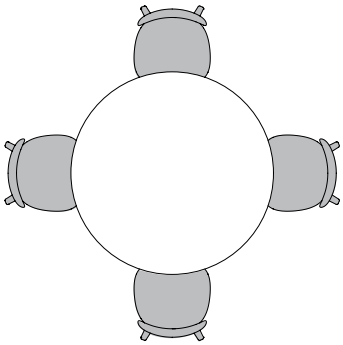


Rectangular Workshop Table
1218mm deep x 3048mm wide
10 people maximum

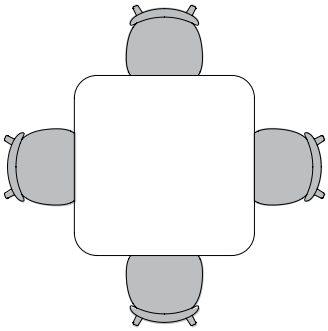
planning with workshop tables (continued)

recommended occupancy (continued)

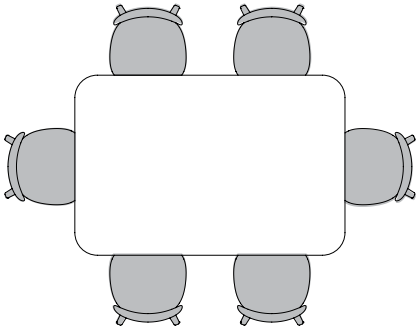
The following demonstrates the recommended table occupancy to allow for adequate personal and working space on Dialogue Workshop Tables.



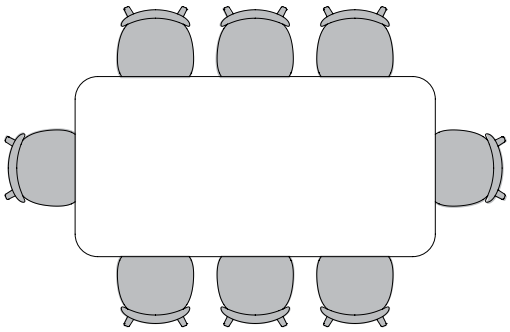
Round Dialogue Workshop Table
1372mm diameter
4 people maximum



Square Dialogue Workshop Table
1218mm deep x 1218mm wide
4 people maximum



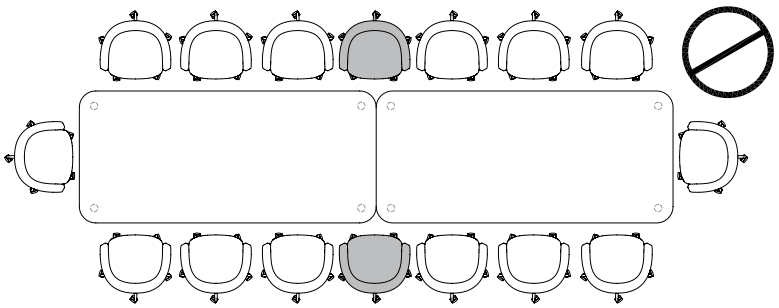
Rectangular Dialogue Workshop Table
1218mm deep x 1828mm wide
6 people maximum



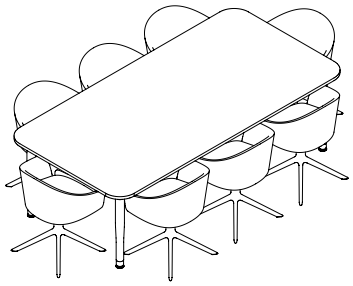
Rectangular Dialogue Workshop Table
1218mm deep x 2438mm wide
8 people maximum

planning with workshop tables (continued)

Zones Rectangular Tables should not be ganged together, the leg location may interfere with the chair placement.

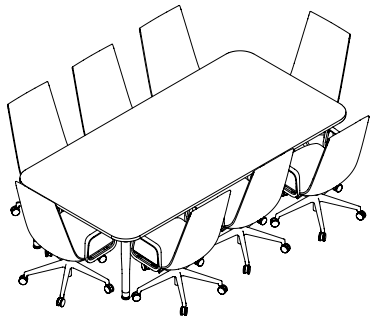


workshop tables vs. dialogue vs. lounge workshop tables heights



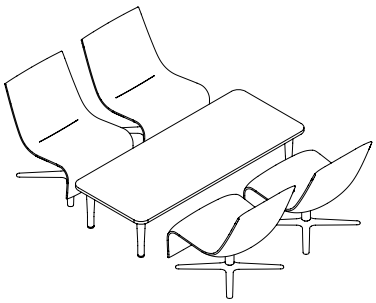
Workshop Table:

- 736mm high, ideal for meeting and formal spaces
- Multi-use and Task Chairs should be used with this table



Dialogue Workshop Table:

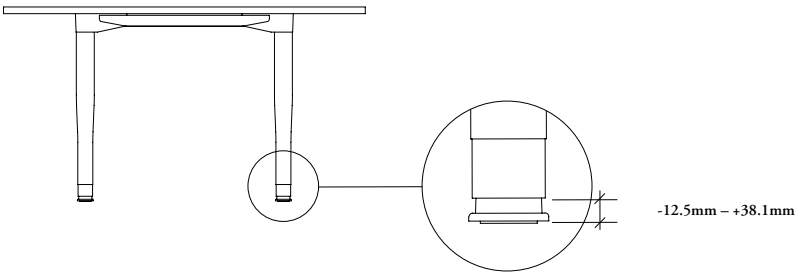
- 635mm high, ideal for casual and informal spaces
- The Zones Compact Lounge Chair and other Teknion and StudioTK casual seating should be used with this table



Lounge Workshop Table:

- 406mm high, ideal for informal spaces
- Multi-use and Task Chairs should be used with this table

leveling range



Workshop and Dialogue Tables have a -12.5mm – +38.1mm leveling range.

planning with workshop tables (continued)

table runner

- Mounts to the top of a rectangular Workshop Table or Dialogue Workshop Table
- Available in three sizes to match table lengths
- A variety of cut out configurations are available to accommodate the Power Box (MZNBL4 only) or Table Lamp

For 1828mm wide tables, one Table Runner (914mm wide)

Two Power Box, One Table Lamps

Two Power Box

No Cut Outs

For 2438mm wide tables, one Table Runner (1218mm wide)

Two Power Boxs, One Table Lamp

Two Power Boxs, Two Table Lamps

Two Power Boxs

No Cut Outs

For 3048mm wide tables, one Table Runner (1828mm wide)

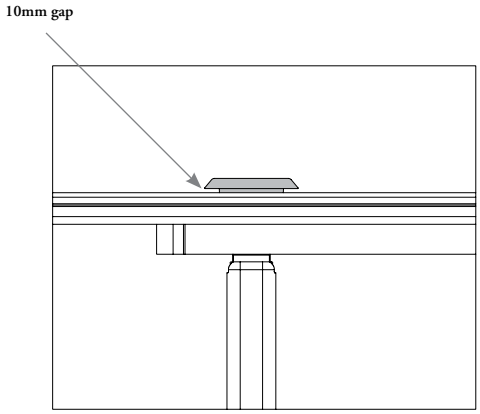
Two Power Boxs, One Table Lamps

Two Power Boxs, Two Tables Lamps

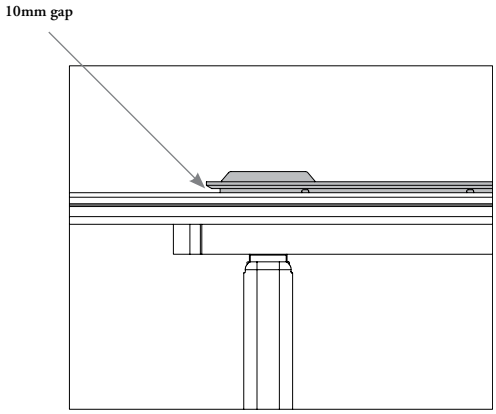
Two Power Boxs

No Cut Outs

When Power Boxs are used, there will always be a 10mm gap for cable routing.



When a Power Box is specified on a table without a Runner, the 10mm gap will be between the Power Box and the top of the table.



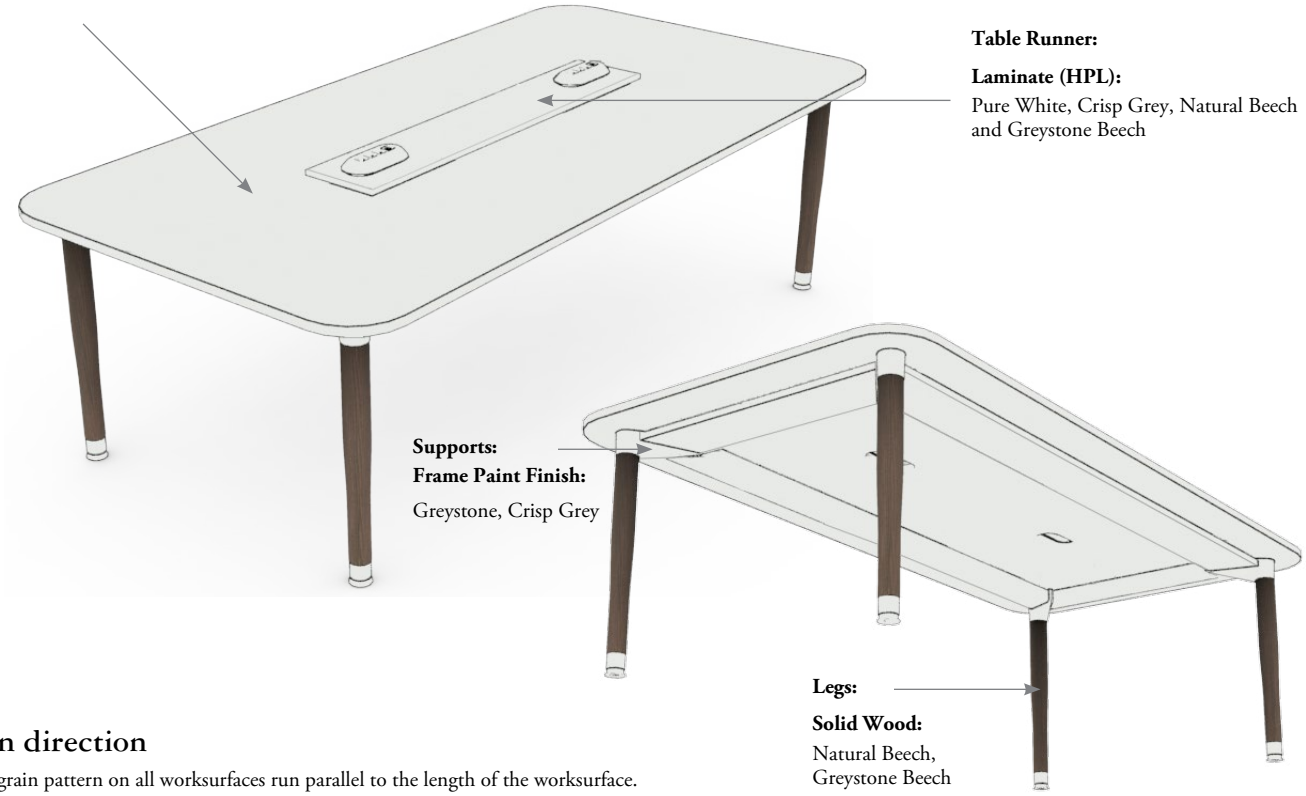
When a Power Box is specified on a table with a Runner, the 10mm gap will be between the Runner and the top of the table.

workshop table finishes

The following outlines the finishes available with Zones Workshop Tables.

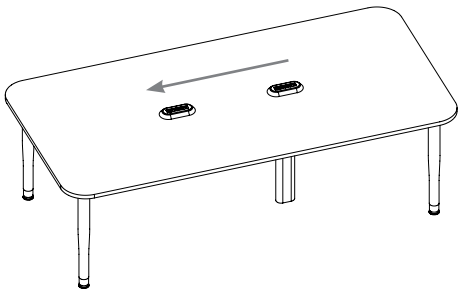
Table Top:

Laminate (HPL):
Pure White, Crisp Grey, Natural Beech and Greystone Beech



grain direction

Woodgrain pattern on all worksurfaces run parallel to the length of the worksurface.



Laminate (HPL): Available on all worksurfaces

Frame Paint:

understanding table electrics

Zones Tables are available with options for lighting, above worksurface power, USB hubs and cable management. The following outlines the various options available.

Further details on all of these products are available in the Lighting, Electrics & Wire Management section. Options are shown on the Workshop Table, however some options are also available on Canteen Tables.

Table Lamps[N] and Power Boxs can be mounted on either a Table Runner or directly to the table.

USB Hubs[N] mount to table edges for easy access, cable managers are available to route cables below the table.

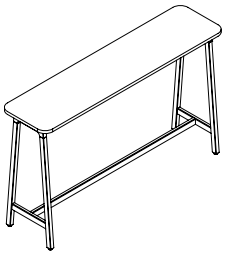
Caution is required when pushing a chair underneath the table to prevent damage to the USB unit.

Under Worksurface Cable Management allows for a clean aesthetic below the table and to the floor.

N North America only | **A** Asia Pacific only **NA** Both

ledge table basics

The Zones Ledge Table can be used with Modular Seating or independently. It's narrow depth is ideal for casual touch-down meetings or lounge settings.



Ledge Table – Straight (MZNTLS)

• Available in the following sizes:
- 457mm deep x 1218mm wide
- 457mm deep x 1524mm wide
- 457mm deep x 1828mm wide

• Available 1067mm high

• Available with options for:
  - For additional information please see the *Lighting, Electrics & Wire Management section*

When incorporating Ledge Tables – Straight with Modular Seating, please see the *Zones Modular Seating section.*

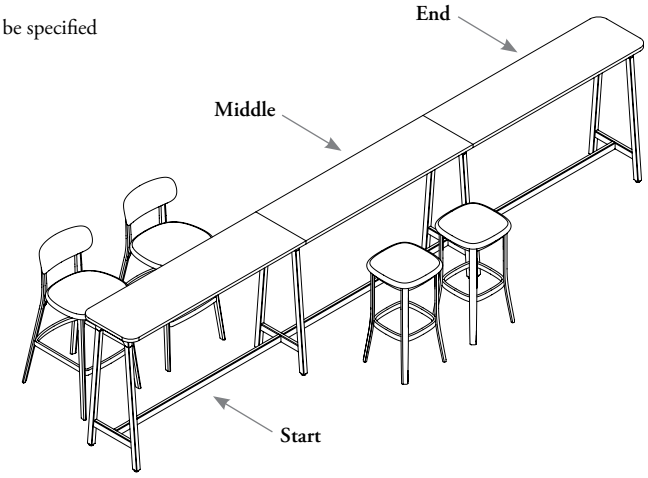
planning with ledge tables

The following should be considered when planning with Ledge Tables.

Curved Ledge Tables can be specified freestanding or linked together to form longer runs.

- The maximum span for Ledge Tables is three tables, to a maximum length of 18 feet
- To create longer configurations a combination start, middle and end tables can be specified

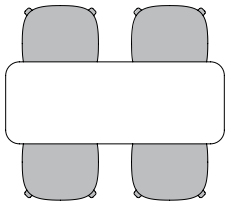
Freestanding Ledge Tables – Straight



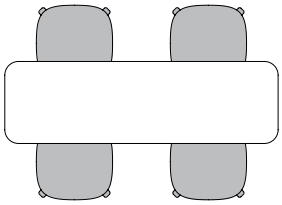
Linking Ledge Tables- Straight

recommended occupancy

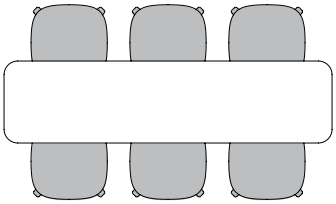
The following demonstrates the recommended table occupancy to allow for adequate personal and working space.



Freestanding Rectangular Ledge Table 457mm deep x 1218mm wide, Four people maximum



Freestanding Rectangular Ledge Table 457mm deep x 1524mm wide, Four people maximum



Freestanding Rectangular Ledge Table 457mm deep x 1828mm wide, Six people maximum

edge trim style overview

Trim style and desk finish applications are summarized in the chart below.

Shading indicates the user edge

	Foundation Laminate Surface

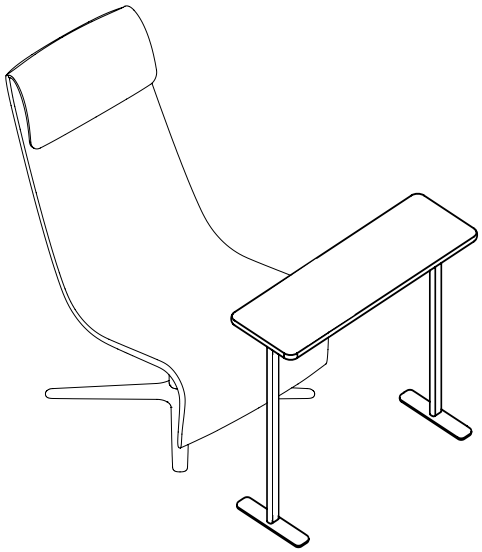
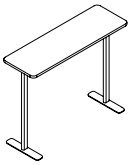
Page 115

laptop table basics

The Zones Laptop Table allows a user to organize their items around a small pull-up table.

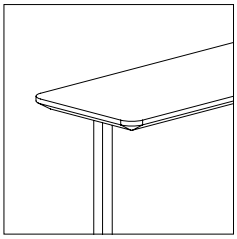




Laptop Table (MZNTLT)

- Available 279mm deep x 838mm wide
- Available 660mm high

Zones laptop table is available in knife edge profiles:



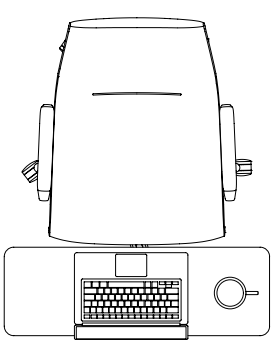
Laminate with Knife Edge

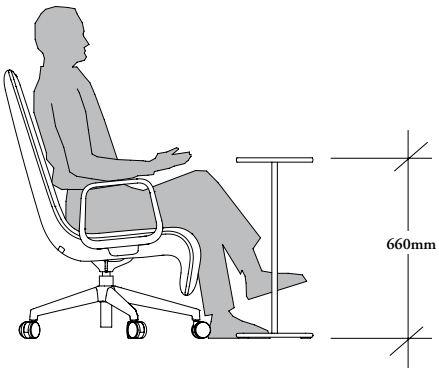
- Available:
  - All standard worksurface laminate finishes
  - Legs: Painted

planning with laptop tables

The following should be considered when planning with Laptop Tables.

The Zones laptop table offers a new approach to how one organizes their items around a small pull-up table.



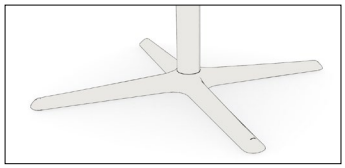


By re-orienting the surface area to be shallow but wide, people can place their personal items such as drinks, phone and notebooks beside their laptop for easy reach. They don't have to be placed behind or crowded in front of their laptop.

tea table basics

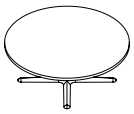
Zones Tea Tables have a metal star base leg and are ideal for lounge settings.

High Round Tea Table



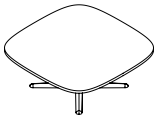
Low Round Tea Table Base

- Available in two styles:
  - Low Tea Tables 406mm high, Four-Star Base similar to Club Chair
  - High Tea Tables 483mm high, Four-Star Base similar to Solo Chair



Low Round Tea Table (MZNTSR)

- Available 1067mm diameter



Low Soft Square Tea Table (MZNTSS)

- Available 1067mm deep

High Round Tea Table (MZNTTR)

- Available 762mm and 914mm diameter

High Soft Square Tea Table (MZNTTS)

- Available 762mm and 914mm deep

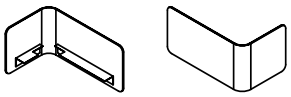
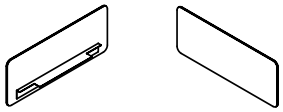
MZNDCF Corner Desk Edge Screen – Fabric

Page 127



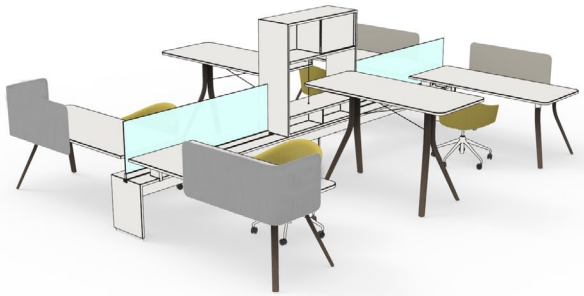
MZNDSF Straight Desk Edge Screen – Fabric

Page 128



understanding workstation integration

Zones offers a collection of screens, worksurfaces with canteen legs, and tables that can be integrated into the Teknion portfolio of products.

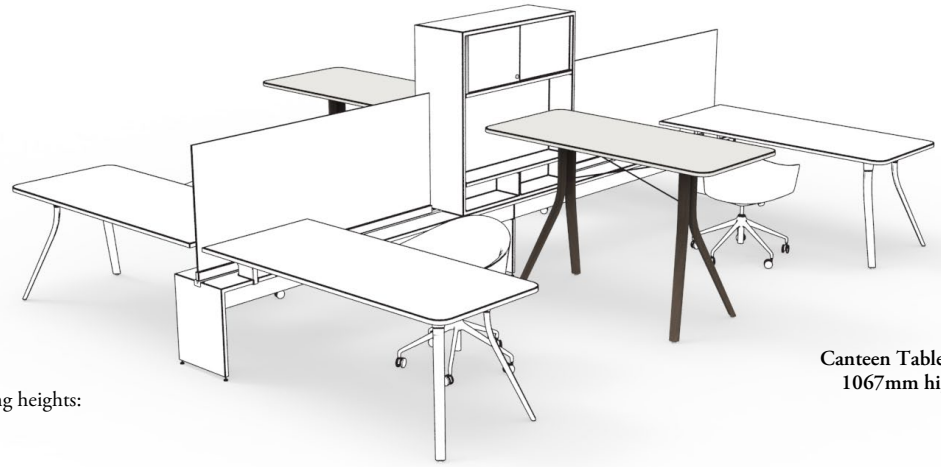


desk edge screens

- Available for flat or corner desk applications
- Available in fabric or wood (fabric shown on flat application and wood shown on corner application)
- Can be mounted to semi-suspended or freestanding desks
- 1067mm datum height

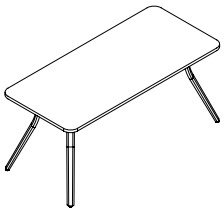
systems canteen table basics

The Zones System Canteen Table integrates into District or upStage workstations planned with Semi Supported Worksurfaces. The 3" corner radius match the radius of Semi-Supported worksurfaces.



Canteen Table Bar Height - 1067mm high (shown)

- Available in the following heights:
  - Task Height (740mm)
  - Bar Height (1067mm)
- Available with 76.2mm radius corners



Systems Canteen Table –Task Height (MZNTCT)

- Available in following sizes:
  - 610mm, 762mm, and 914mm deep
  - 1524mm, 1676mm and 1828mm wide
  - 740mm high
- Available with the following cut out options:
  - District round grommet centered on back
  - upStage rectangular cut out centered on back (grommet is not included, and must be order from the upStage catalogue)
- Available in the following edge styles:
  - Double eased edge
  - Knife edge
  - Flat edge

Systems Canteen Table –Bar Height (MZNTCB)

- Available in following sizes:
  - 762mm and 914mm deep
  - 1524mm, 1676mm and 1828mm wide
  - 1067mm high
- Available with the following grommet options:
  - District round grommet top centered
  - upStage rectangular cut out top centered (grommet is not included, and must be order from the upStage catalogue)
- Available in the following edge styles:
  - Double eased edge
  - Knife edge
  - Flat edge
- Available with or without options for:
  - International electrics

datum height

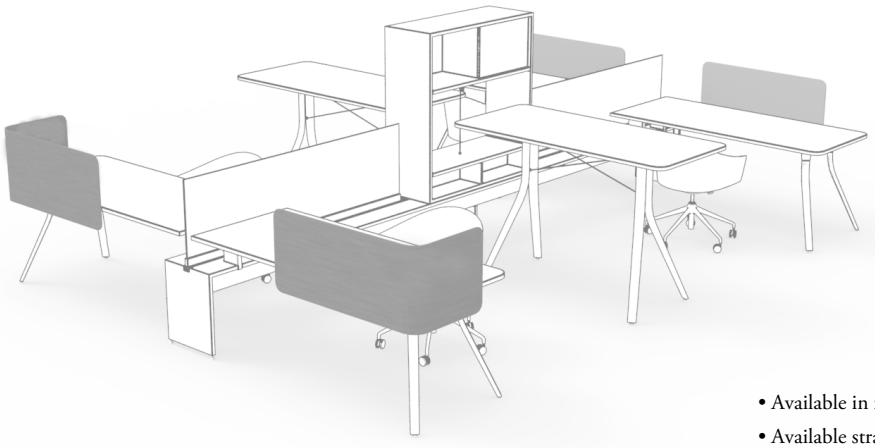
Systems Canteen Tables are available in task and bar height to allow for different meeting styles.

Task Height, 740mm high

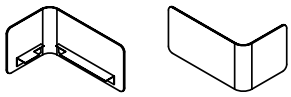
Bar Height, 1067mm high

desk edge screen basics

Zones Desk Edge Screens mount to Semi-Supported Worksurfaces to provide seated privacy.

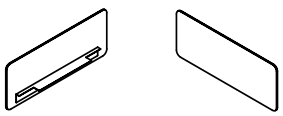


- Available in fabric
- Available straight and cornered



Corner Desk Edge Screen -Fabric (MZNDCF)

- Available in the following sizes:
  - 508mm, 740mm, 889mm and 1041mm wide
  - 508mm deep
  - 483mm high (1067mm datum)
- Material options available:
  - Fabric without slots



Straight Desk Edge Screen -Fabric (MZNDSF)

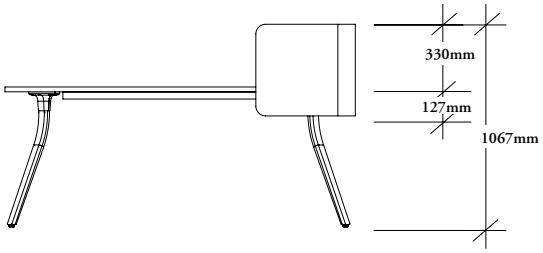
- Available in the following sizes:
  - 915mm, 1067mm, 1219mm and 1372mm width
  - 1067mm high
- Material options available:
  - Fabric without slots

planning with desk edge screens

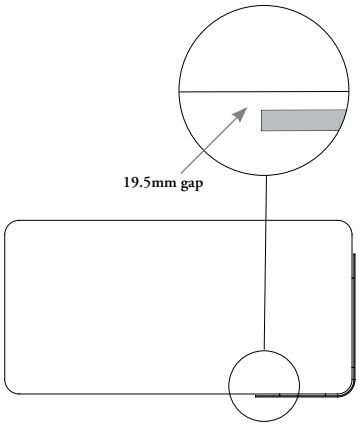
The following should be considered with planning with Desk Edge Screens.

corner desk edge screens

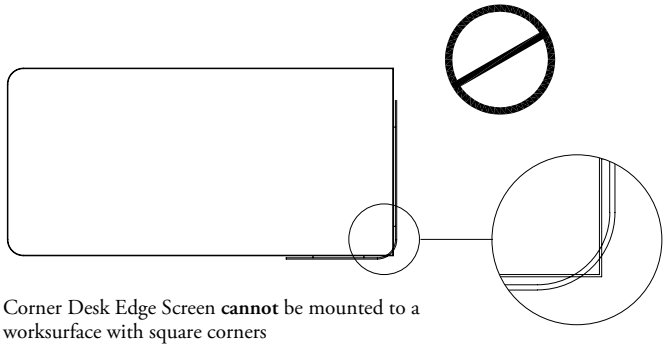
Mounts to semi-suspended worksurfaces or freestanding desks.



- 1067mm high datum (127mm below worksurface modesty)
- It is recommended that the desk edge screen be 152mm inset from either side to avoid interference with leg brackets



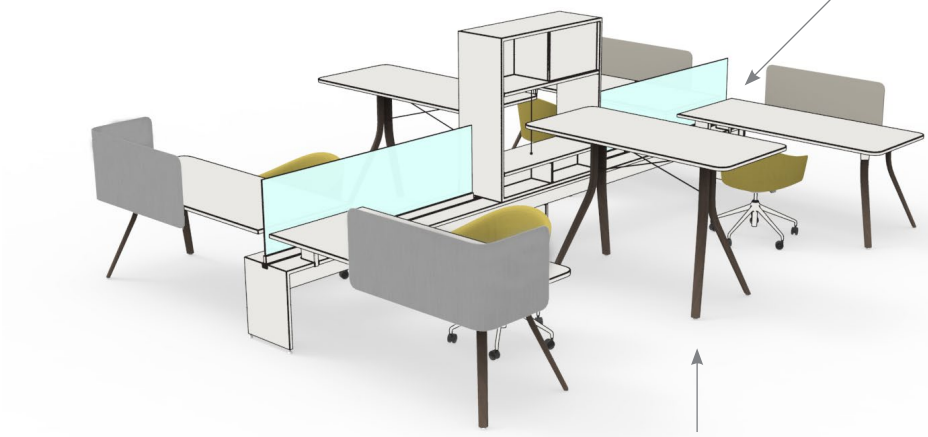
- There is a 19.5mm wire gap when mounted to a worksurface



- Corner Desk Edge Screen **cannot** be mounted to a worksurface with square corners

workstation integration finishes

The following outlines the finishes available with Zones Workstation Integrated products.



Worksurface:

Laminate (HPL):
Crisp Grey, Greystone Beech, Natural Beech, Pure White

Laminate Screens:

Laminate (HPL):
Crisp Grey, Greystone, Greystone Beech, Natural Beech

Supports:

Wood Leg Finishes:
Natural Beech, Greystone Beech

worksurface

Laminate (HPL):

Greystone Beech | Natural Beech | Crisp Grey | Pure White

support

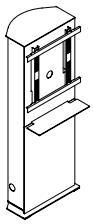
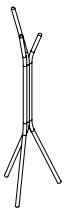
MZNET Monitor Tower

Page 141



MZNAS Coat Stand

Page 142



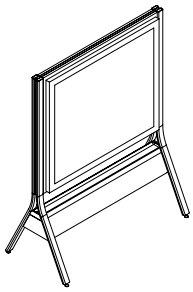
easel basics

Zones Easels can be used in a variety of meeting and lounge settings to provide a writable, tackable surface or add technology functionality.

Tech Easel (shown)

Easel (MZNAE)

- Provides casual space division and a vertical working surface
- Available 914mm, 1219mm and 1524mm wide
- Overall heights include:
  - 1889mm with casters
- Surface finishes include:
  - Whiteboard
  - Chalkboard
- Each side can be specified with a different finish
- Available with or without a flip chart rail
- Caster options include:
  - Casters



Tech Easel (MZNAT)

- Provides casual space division with a vertical mounting surface for a television screen on one side
- Available 1524mm and 1829mm high and 1270mm wide
- Opposite side options include:
  - Whiteboard
  - Chalkboard
- Caster options include:
  - Casters

Paint Finish:

Greystone | Crisp Grey

Wood Finish:

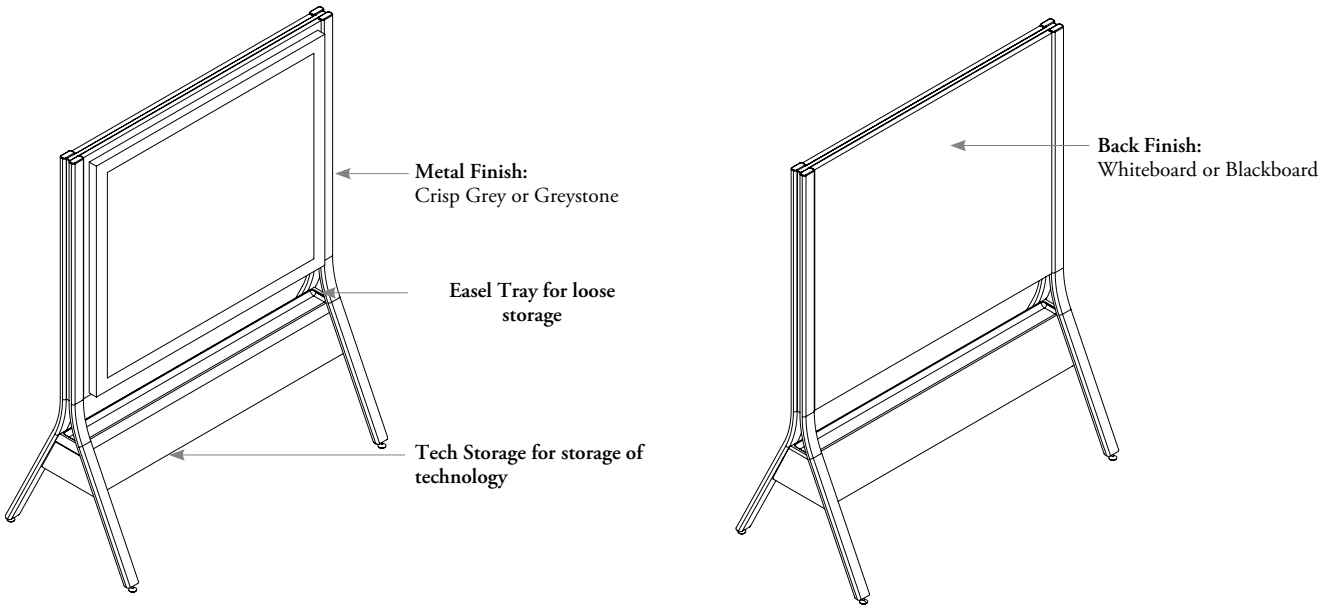
Greystone Beech | Natural Beech

planning with easels

The following should be considered when planning with Zones Easels.

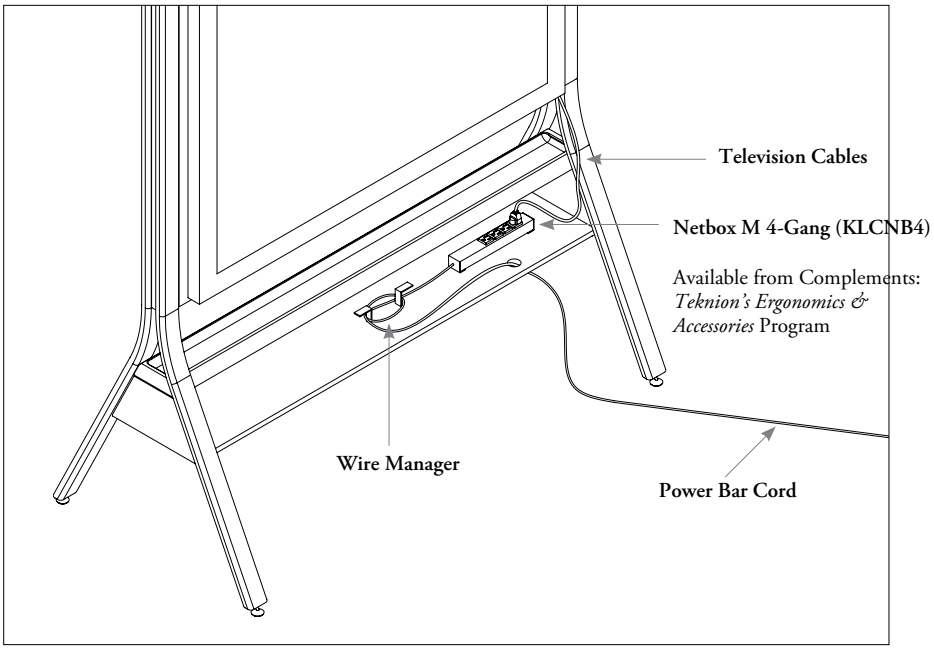
tech easel

The Tech Easel offers the ability to mount a television screen on one side, and a functional surface on the backside.

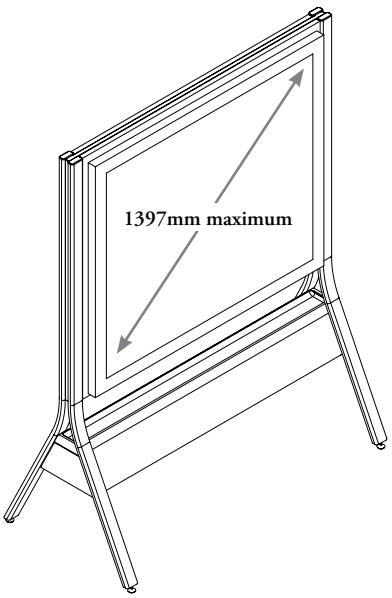


planning with easels (continued)

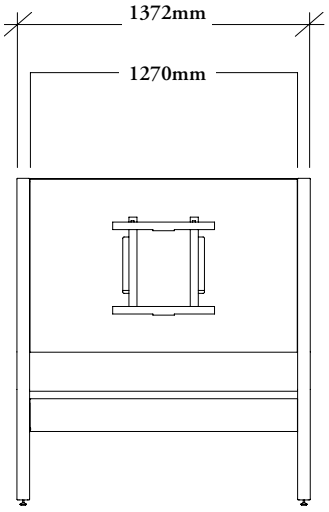
Tech Easels have a lower covered tray which conceals all wire management.
- The Netbox M 4-Gang (KLCNB4) is site installed on the left or right side
- The internal wire manager stores excess Power Bar cables inside of the unit
- There are two access doors fastened by magnets



Television monitors mounted to the Tech Easel **cannot** be more than 1397mm wide or 50 lbs.

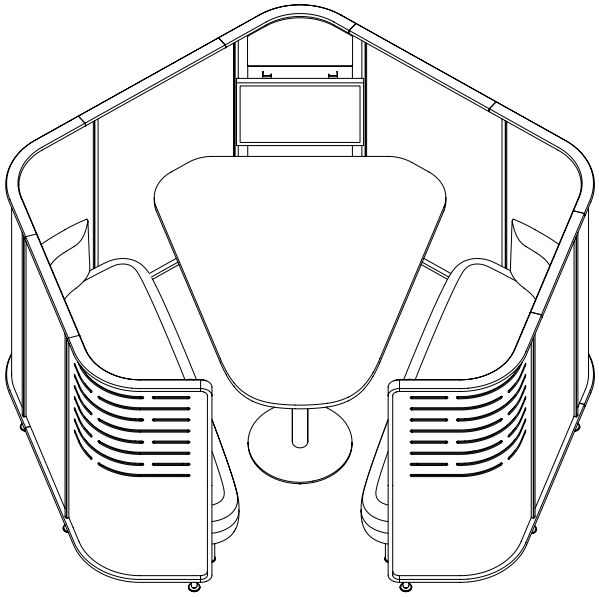


The 1270mm width of the Tech Easel is nominal, the actual width of the easel is 1372mm wide.

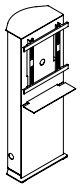


monitor tower basics

Zones Monitor Towers provide a monitor mounting and power routing location in enclosures and screens.



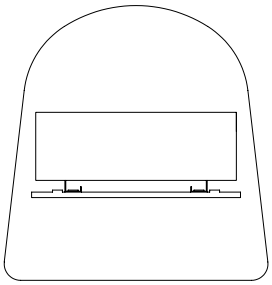
Digital Lounge Meeting Zone – Four (shown)



Task Corner

Monitor Tower (MZNET)

- Provides a monitor mounting and power routing location in semi-suspended applications in both Enclosures and freestanding Screen configurations
- Does **not** mount to an Enclosure or Screen but must mount to a worksurface



Corner

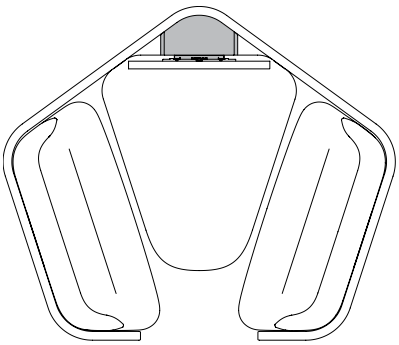
Paint Finish:

Greystone

Crisp Grey

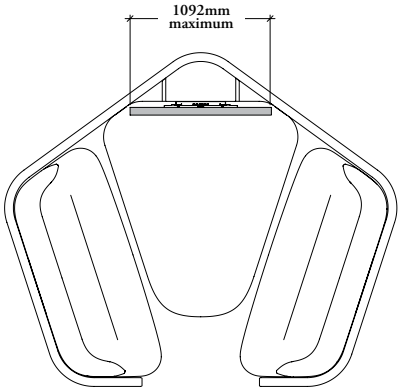
planning with monitor towers

The following should be considered when planning with Monitor Towers.



Monitor Tower (MZNET)

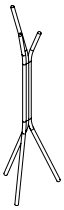
Curved Monitor Towers are designed to be used in the curves of Enclosures and Freestanding Screens.



Monitor Towers can accommodate a television screen up to 1092mm wide when mounted inside an Enclosure. Wider television screens will interfere with the Enclosure screen.

coat storage basics

Zones offers a stationary and portable storage solution for coats and other personal items.



Coat Stand (ZNAS)

- Provides an adaptable solution for coat storage

Paint Finish:

Greystone

Crisp Grey

Wood Finish:

Greystone Beech

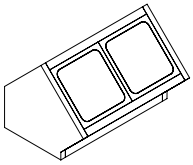
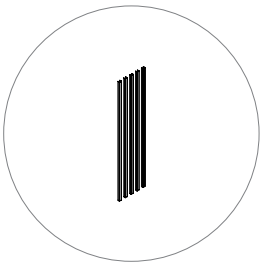
MZNBSM2 Netbox Smart 2-Gang

Page 164



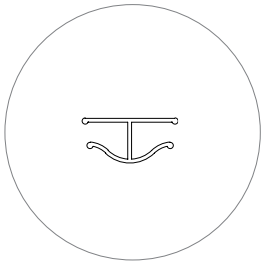
cable management basics

Zones offers a variety of cable management solutions that can be mounted to Enclosures, Screens or Tables.



Power Cable Manager (MZNEN)

- Mounts to the bottom trim on an Enclosure for horizontal cable management or can be used to route cables down a Canteen Table leg
- Available in one, three or five piece configuration
- 609mm long
- Always finished in Black



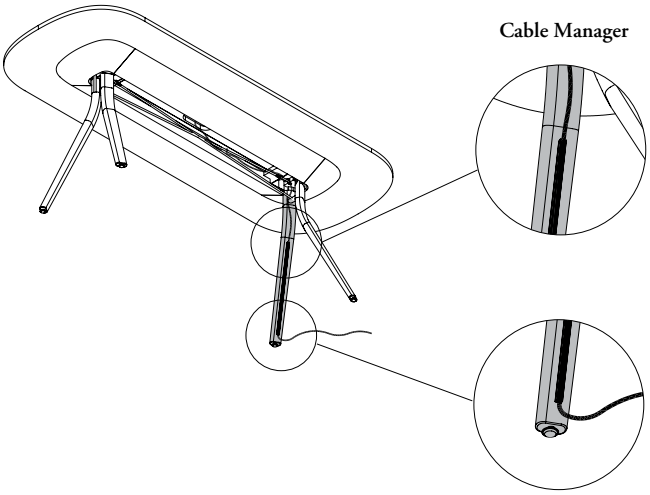
Screen Cable Manager (MZNEM)

- Mounts to the bottom trim on an Enclosure or Screen to route multiple cables along the trim
- Available:
  - Small (8 pieces)
  - Medium (12 pieces)
  - Large (16 pieces)

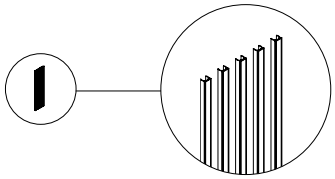
planning with cable management

The following should be considered when planning with Zones cable management.

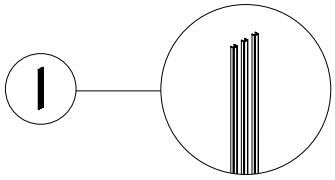
power cable manager



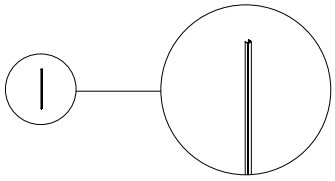
When the Power Box option is selected, a Power Cable Manager (MZNEN) with adhesive back should also be ordered separately. The Power Cable Manager (MZNEN) routes down the inside of the leg.



Five Piece Configuration



Three Piece Configuration

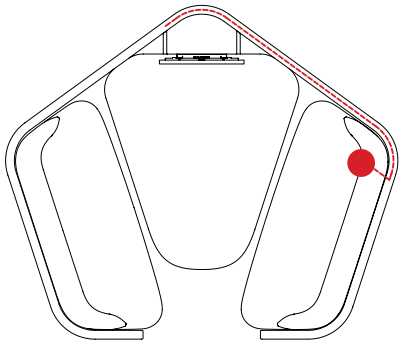


One Piece Configuration

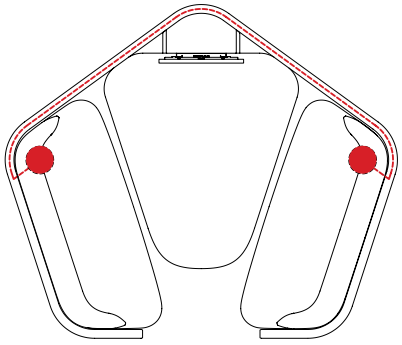
screen cable manager

When planning with the Screen Cable Manager the amount of bends in the Enclosure or Screen will determined what size of Screen Cable Manager is needed.

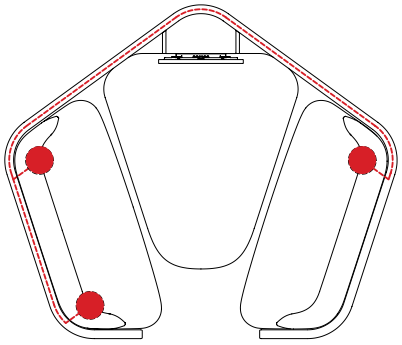
Example: Lounge Meeting Zone-Four (shown)



If cable management is required for two bends, small is required.



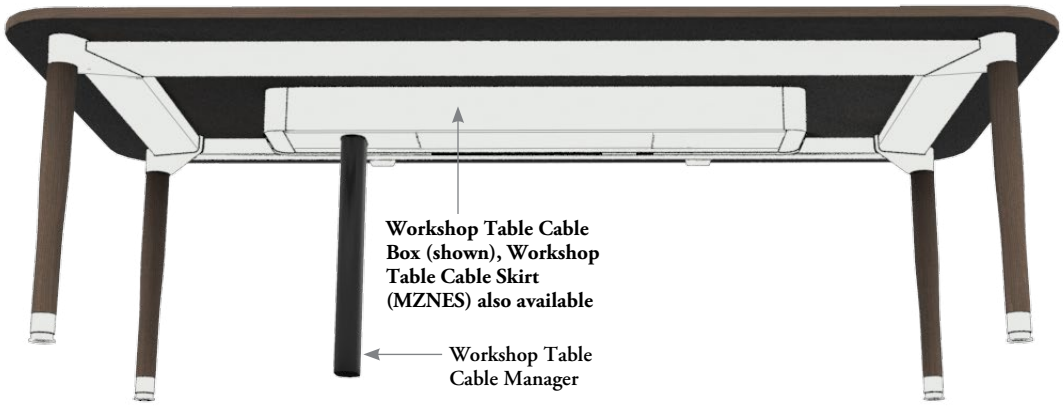
If cable management is required for three bends, medium is required.



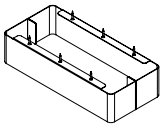
If cable management is required for four bends, large is required.

workshop table electrics basics

Zones below worksurface electrics allow for wire management and below worksurface power.

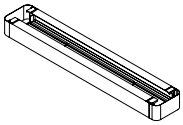


Below worksurface electrics are only available on Workshop Tables.



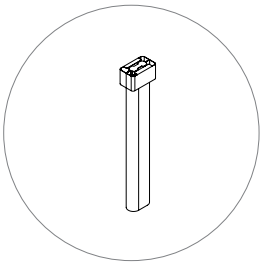
Workshop Table Cable Skirt (MZNES)

- Provides a visual cover for under worksurface electrics and wire management
- Available on all Workshop Tables



Workshop Table Cable Box (MZNEH)

- Provides a higher aesthetic full cover for all under worksurface electrics and wire management
- Available on all Workshop Tables



Workshop Table Cable Manager (MZNEC)

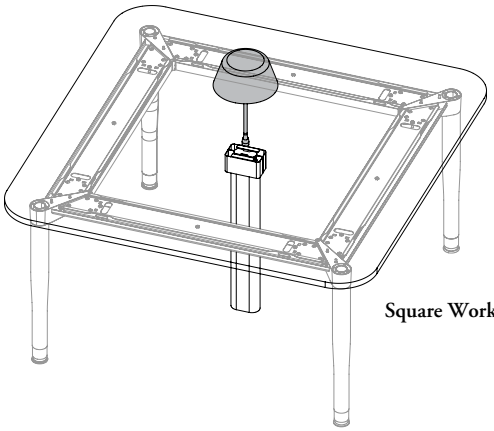
- Used to provide vertical cable management below the worksurface
- Available in all Workshop Tables
- Available in Black only
- Adjustable top mount to accommodate 635mm and 740mm high Workshop Tables

Electrical Finish:

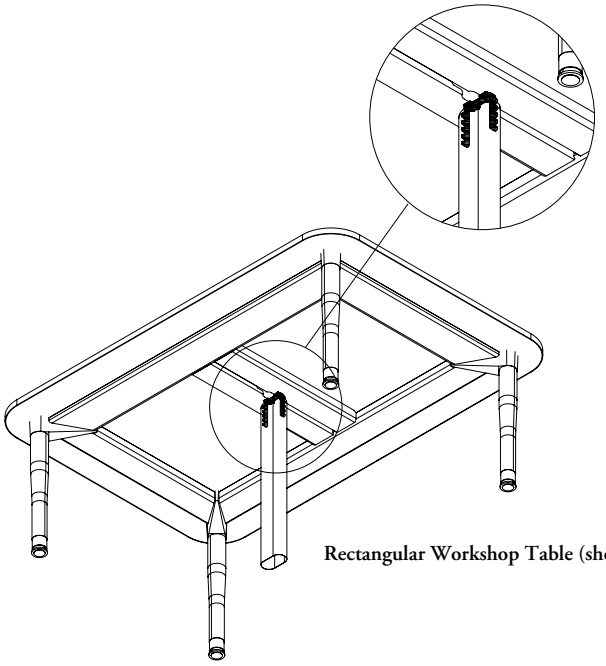
Greystone **Crisp Grey**

planning with workshop table electrics

Workshop Table Cable Manager (MZNEC)



Square Workshop Table (shown)



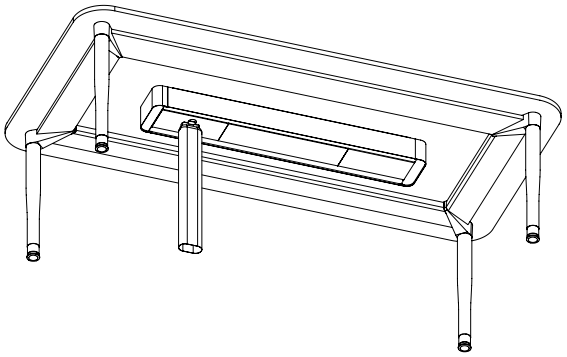
Rectangular Workshop Table (shown)

When the Workshop Table Cable Manager is specified with a Table Lamp, the Workshop Table Cable Manager (MZNEC) includes the brackets required to mount the Table Lamp on to the Square Workshop Tables (MZNTWS).

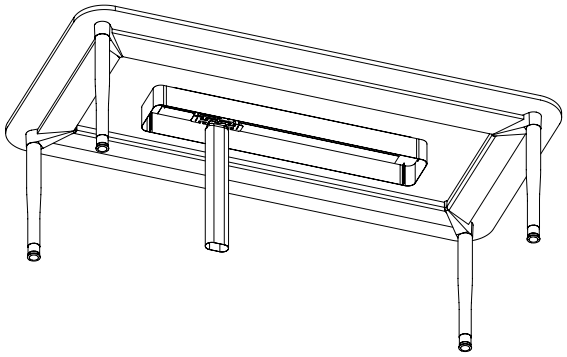
The Workshop Table Cable Manager has top mounting clips to adjust the height to accommodate Dialogue and Task Height Workshop Tables.

Workshop Table Cable Box (MZNEH) and Workshop Table Cable Skirt (MZNES)

At standing or sitting height the aesthetics of the electrical box and skirt look the same, however the Workshop Table Cable Box comes with doors to conceal cables whereas the Workshop Table Cable Skirt does not.



Workshop Table Cable Box (MZNEH)

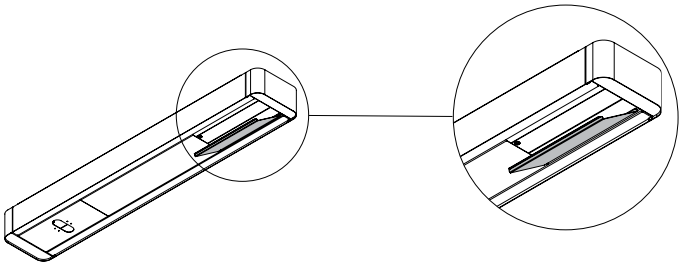


Workshop Table Cable Skirt (MZNES)

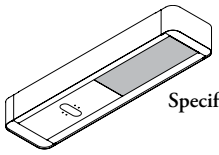
planning with workshop table electrics (continued)

Workshop Table Cable Box (MZNEH)

The Workshop Table Cable Box includes a movable flip down door that is attached with magnets and allows access to the Power Bar mounted inside the box and a movable cable cut out panel that allows cables to route to the floor.

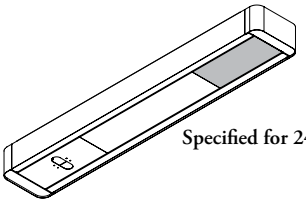


The door and cut out can be in four locations along the box to help align with floor monuments.



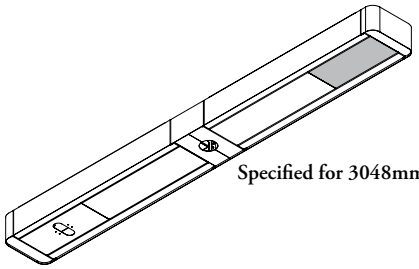
914mm wide x 229mm deep x 114mm high

Specified for 1828mm wide tables



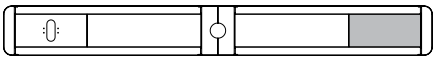
1372mm wide x 229mm deep x 114mm high

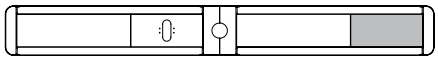
Specified for 2438mm wide tables



1828mmwide x 229mm deep x 114mm high

Specified for 3048mm wide tables





planning with workshop table electrics (continued)

below worksurface

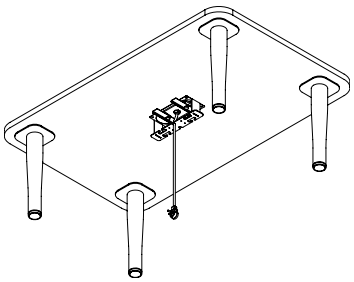
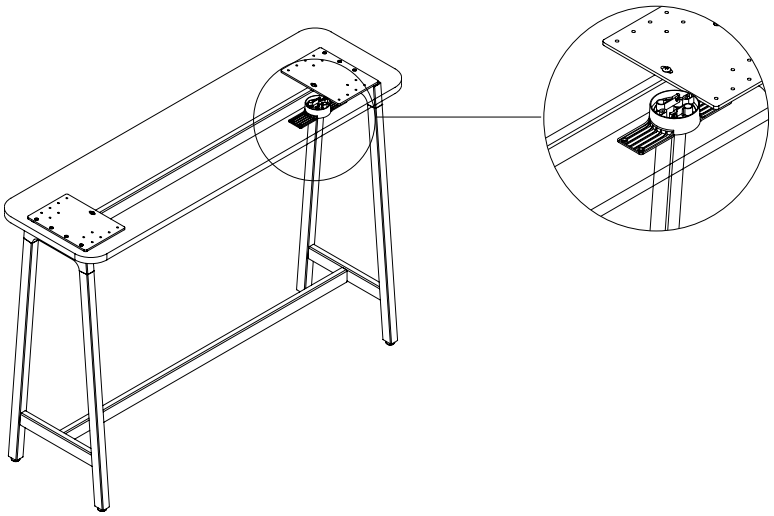
- Lounge Workshop Tables are 16" off of the floor and include wire management cut out if a Power Box is specified.
- The following power and wire management **cannot** be used on the rectangular, square or round lounge workshop table:
  - Workshop Table Cable Manager (MZNEC)
  - Workshop Table Cable Box (MZNEH)
  - Workshop Table Cable Skirt (MZNES)



No cable management, cable will be visible

planning with ledge table electrics

The Zones Ledge Table is available with the options for specifying electrics and cable management.

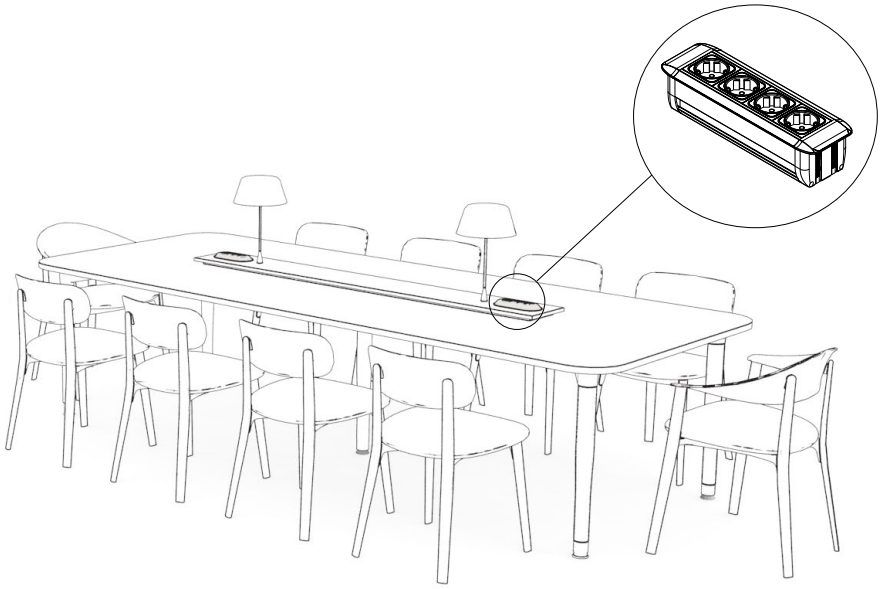


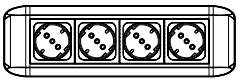
The Ledge Table can be specified with a cable wrap and a wire manager.

casual power basics

Zones provides options for casual power access.

Netbox Line 4-Gang (MZNBL4)



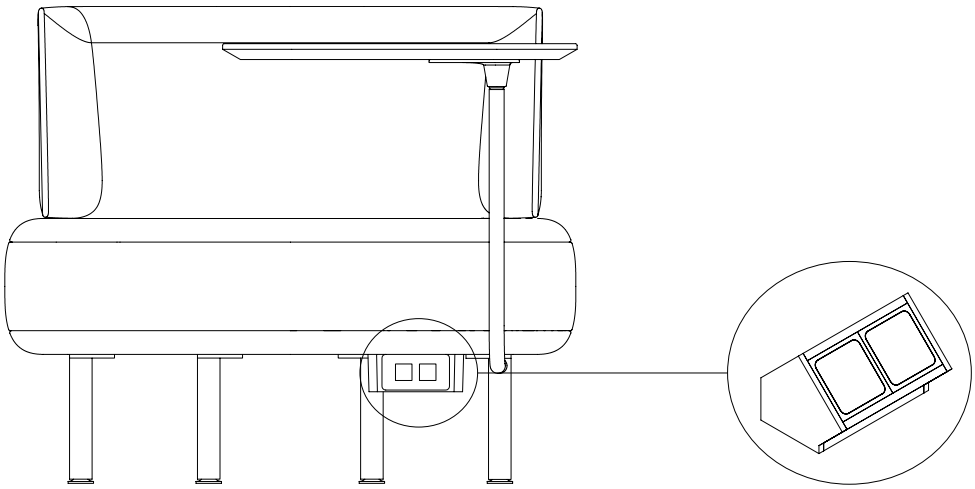


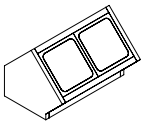
Netbox Line 4-Gang (MZNBL4)

- Provides above worksurface power and USB access
- Can mount to a worksurface, table or a table runner
- Available in three configurations:
  - 2 Power, 4 USB Charger
  - 3 Power, 2 USB Charger
  - 4 Power, 0 USB Charger

casual power basics (continued)

Netbox Smart 2-Gang (MZNBSM2)





Netbox Smart 2-Gang (MZNBSM2)

- Provides power and USB access for soft seating
- Can mount under the soft seating
- Available in three configurations:
  - 0 Power, 4 USB Charger
  - 1 Power, 2 USB Charger
  - 2 Power, 0 USB Charger

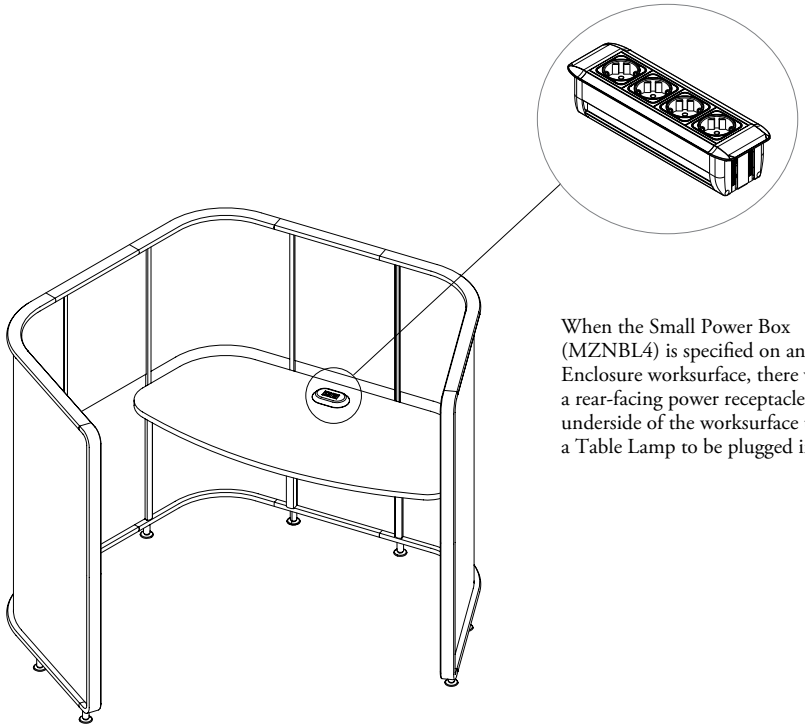
planning with casual power

The following should be considered when planning with Zones electrics.

The Power Box is available in four power configurations and two different sizes that are predetermined depending on the cut out specified.

- Large Power Box are specified on the worksurface in the following Enclosures:
  - Task Digital Meeting Zone -Four
  - Digital Lounge Meeting Zone

- Used on Canteen and Workshop Tables in a Power Box cut-out is specified



When the Small Power Box (MZNBL4) is specified on an Enclosure worksurface, there will be a rear-facing power receptacle on the underside of the worksurface to allow a Table Lamp to be plugged in.

understanding seating

understanding zones seating

Zones is a complete and cohesive collection that populates or pollinates across the entire office landscape. Included are more than 20 seating solutions which individually and collectively reflect Zones' poetic expression of a humanistic work culture.

- Zones seating is proportioned to accommodate the growing needs of the North American market and tested to ANSI/BIFMA standards.
- All Standard Upholstery Fabrics will be applied Off-the-Bolt with the exception of sofas and benches which are applied Railroaded. (See *Fabric Direction Guidelines page in the Textiles & Finishes + Materials* section for more information)

multi-use seating

A collection of benches, arm chairs and stools that can be used in a variety of locations. They are planned around Zones tables, used in Enclosures or blended with other product lines.

arm chair, side chair and side stool

Arm Chairs and Side Chairs reflect Zones' characteristic domesticity and materiality without sacrificing todays need for performance in various work environments.

The Arm Chair is a modern mixed-material interpretation of a classic all-wood chair.

The Side Chair is more casual and appropriate for more compact spaces.

benches

Shared benches convey a sense of community and act as a natural humanizing touch point, best suited around a Workshop Table.

backless stools

Stools at task, bar provide a casual aesthetic to commercial workplaces or hospitality spaces.

Counter and bar height stools allow the user to be at a closer eye level to someone standing.

Mixing seating heights helps to architecturally break up large spaces.

understanding zones seating (continued)

soft seating

A collection of club chairs, sofas and lounge chairs that can be used in a variety of locations. They can be planned around Zones tables or used in Enclosures.

club chairs

There are four variations that integrate while simultaneously answering different functional seating needs for focused and collaborative spaces.

They provide freedom to select multiple coordinating seating solutions across a floorplate.

planning with zones multi-use seating

The beauty of Zones Multi-Use Seating is its ability to mix with Tables or Enclosures to create both formal and casual environments that cater to users functional needs and designers aesthetic visions.

The large variety of Multi-Use Seating options in Zones provides the ability to create both formal and casual environments.

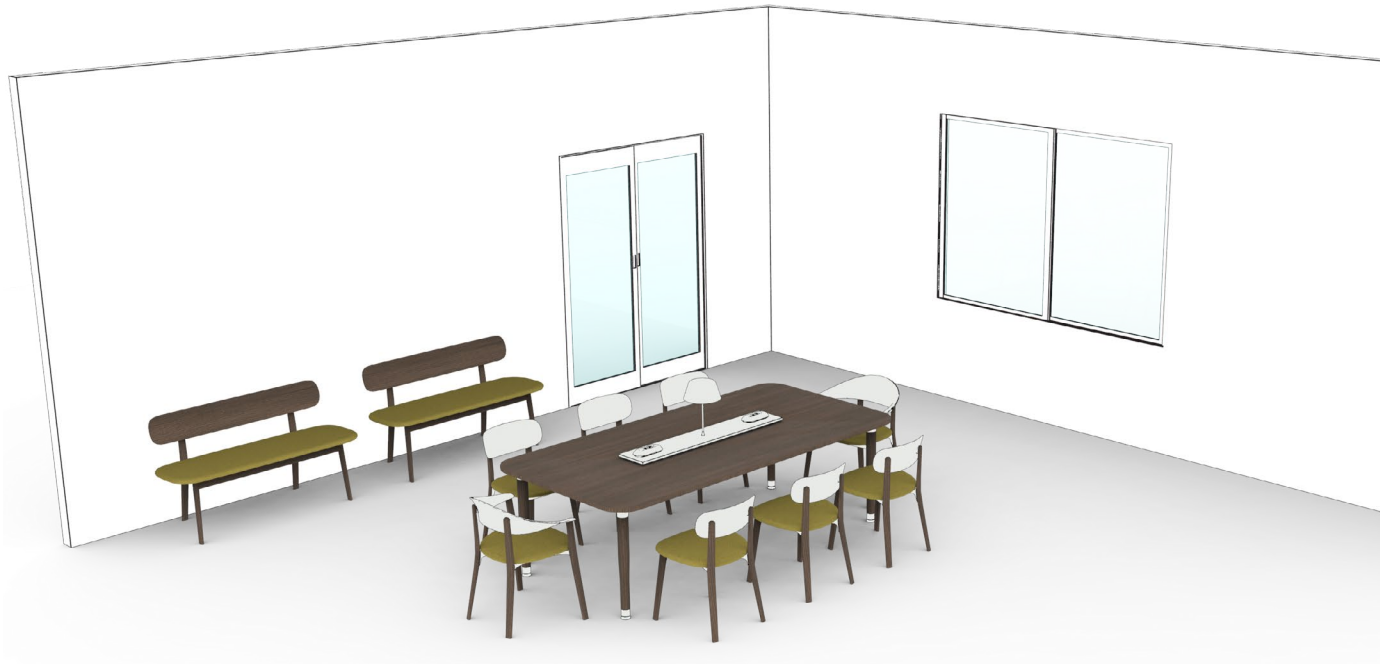
Creating different seating heights in adjacent areas adds variety, depth and delineation of space. The variety of options allows for the expression of an aesthetic vision, the level of formality, the short or long term ergonomics needs, and the desired price point.

Varying landscapes can be created in the open plan by combining work, counter and bar height layouts.

Adding backless stool to the ends of tables provides for larger meetings, for side sitting postures. The visual variety encourages others to join the group.

planning with zones multi-use seating (continued)

Arm chairs provide additional support and substance around a table. Low stacking stools provide casual overflow seating and the all-wood version can double as a quick side-table.



Placing Arm Chairs at the head of the table indicates stature or hierarchy while Side Chairs are used along the table length. Benches can be used at the perimeter wall for over flow seating.

planning with zones soft seating

The beauty of Zones Soft Seating is its ability to mix with Tables, Enclosures and other products to create settings that cater to users functional needs and designers aesthetic visions. The variety of options allow them to be used across an entire floor plate, both inside and outside of Enclosures.

The Club Chair Swivel Tilt with 5-Star Base is height-adjustable which is ideal for touch down stations. Other seating and tables can be used to utilize the space outside of Enclosures.

Club Chairs with 4-Wood Legs are an ideal guest chair solution in private offices.

multi-use seating

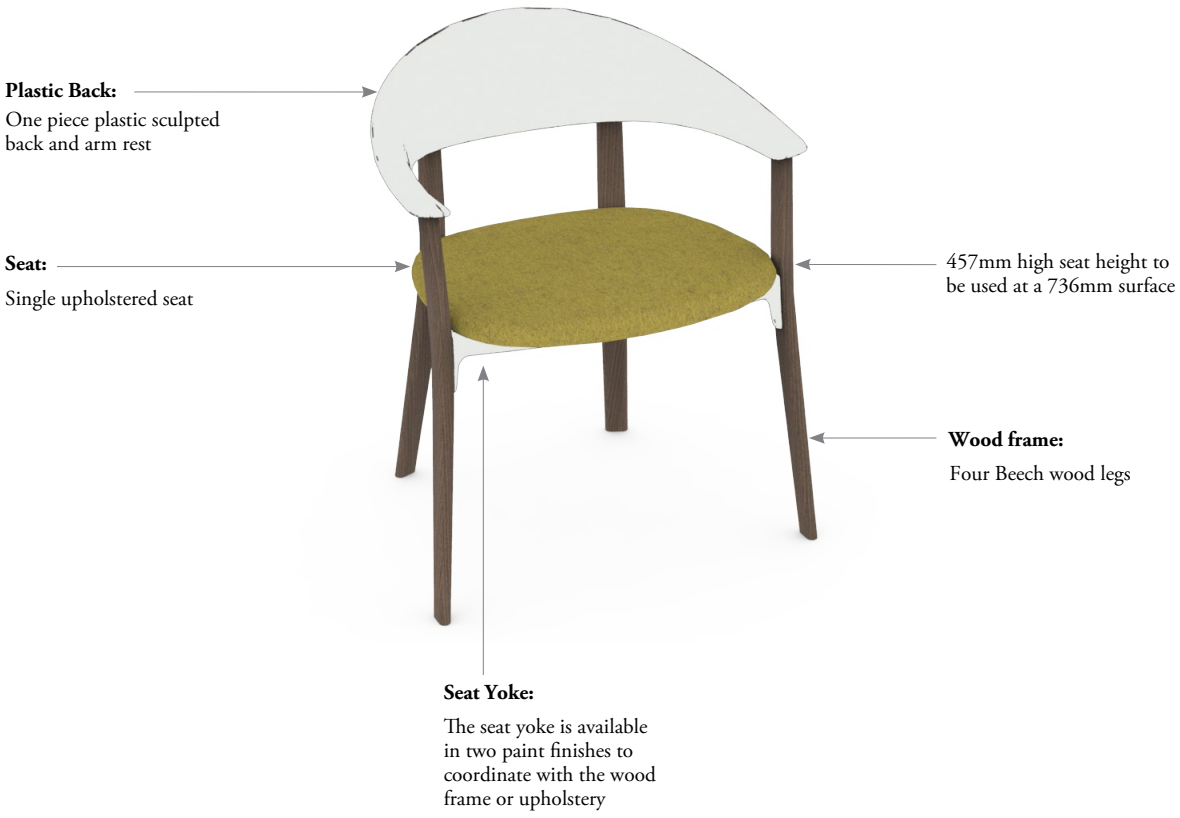
zones arm chair overview

Zones Arm Chairs are a new-fashioned interpretation of an old-world wood chair. The one-piece, plastic, sculpted back elegantly twists to form armrests that connect to the Beech wood legs without visible fasteners. The signature curved legs of the Zones Arm Chairs coordinate with the Stools, Canteen Tables, Easel, Coat Rack and other products in the extensive Zones collection.

MZNMGZ



The following finishes are available on Zones Arm Chair, 4-Wood Legs, Plastic Back.

Plastic Back Finish:

Greystone | Crisp Grey

Seat Yoke Metal Finish:

Greystone | Crisp Grey

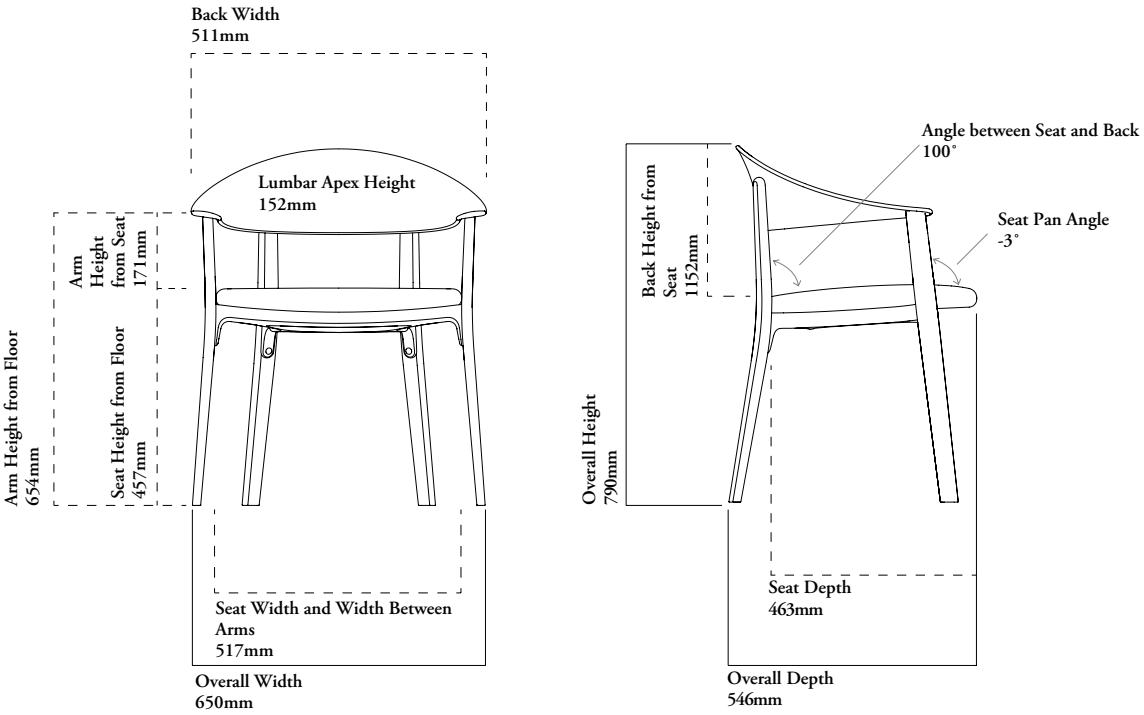
Wood Frame Finish:

Greystone Beech | Natural Beech

zones arm chair dimensions & material requirements

• Zones Arm Chairs have been designed and tested for users weighing up to 300 lbs

WEIGHT	
Zones Arm Chair, 4-Wood Legs, Plastic Back	17 lbs



COM/COL Material Requirement

More yardage may be required depending upon the upholstery pattern, repeat, directionality and pattern matching. Leather yield varies from 60-80% and may be affected by the quality of the COL including location and quantity of blemishes, size and shape of hide. The size of the sewing pattern and the number of units ordered may also impact yield. Always round-up to the next hide.

	SINGLE UPHOLSTERED	
	COM [yards]	COL [sq. ft]
Zones Arm Chair	3/4	4.4

zones side chair overview

The Zones Side Chair is a familiar form that integrates within traditional hospitality settings and contemporary, corporate collaborative or workshop spaces. The simple, one-piece, plastic back invisibly connects to the Beech wood legs. The footprint of the Side Chair is more compact than the Arm Chair.

MZNMCZ

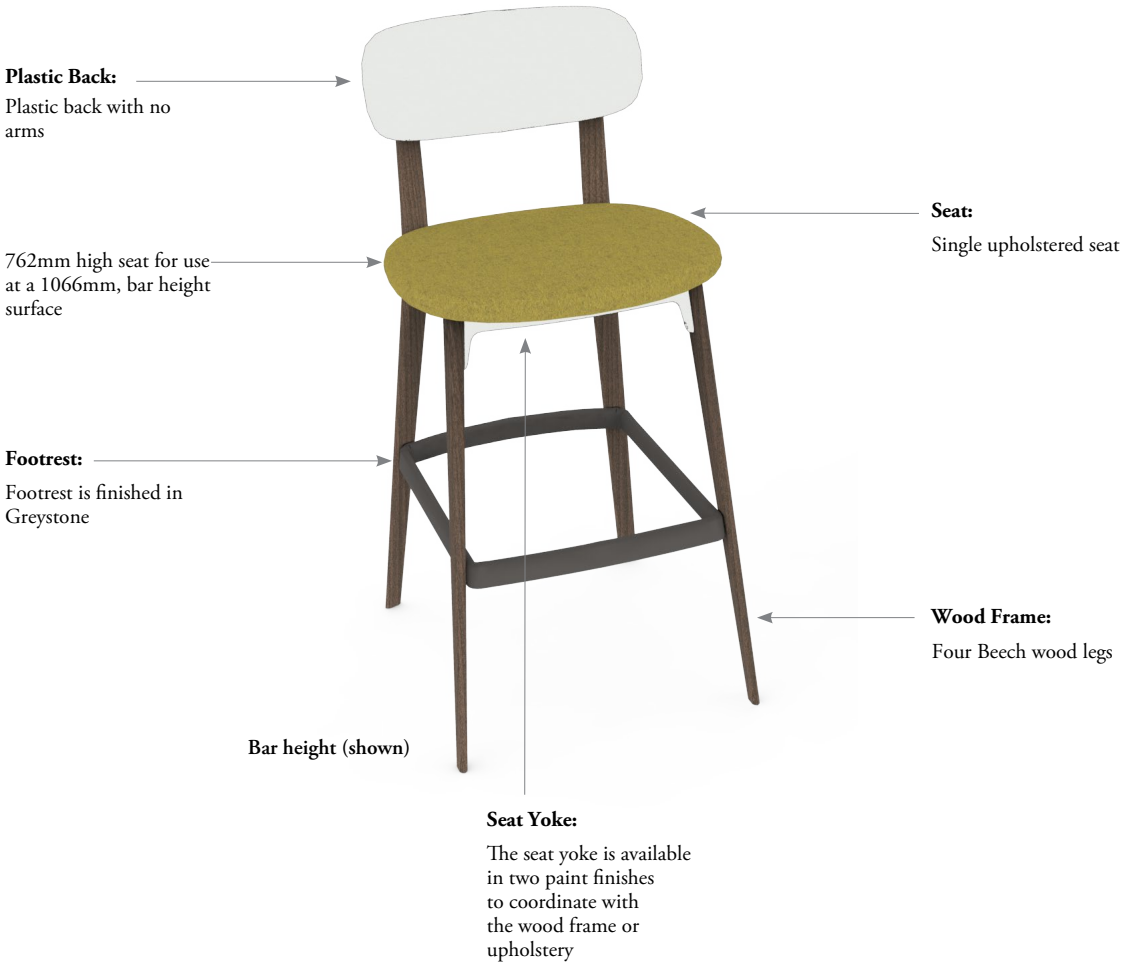
zones side stool overview

Zones expands the visual language of the Side Chair to Side Stool for 914mm high counter and 1066mm high bar use. Side Stools facilitate a new trend in blending seating heights - providing a more casual ambiance and varied topography across a floor plan. Side Stools also feature the simple, one-piece, plastic back which invisibly connects to the Beech wood legs.

MZNMDZ



The following finishes are available on Zones Side Stools, 4-Wood Legs, No arms, Plastic Back.

Plastic Back Finish:

Greystone | Crisp Grey

Seat Yoke Metal Finish:

Greystone | Crisp Grey

zones bench overview

Zones Bench with Back illustrates a movement to a shared economy and ethos. Each bench seats 2 people and is crafted with 4-legged Beech wood frames and an upholstered seat. Integrated Beech plywood backs provide support and comfort during discussions or mingling, and their large radius-ends are friendly for side-sitters.

Shared benches around a Workshop Table convey a sense of community and act as a natural humanizing touch point. Zones Bench – No Back, 4-Wood Legs, Upholstered (MZNMAU) is for 2 people and provides an even more pure, informal, multi-directional solution than a bench with a back.

zones club chair overview

Zones Club Chairs are a collection within a larger collection. There are four variations that integrate with the aesthetic and materiality range of the full Zones collection of Tables, Seating and Enclosures while simultaneously answering different functional seating needs for focused and collaborative spaces. Club Chairs provide designers additional freedom to select multiple coordinating seating solutions across a floorplate.

MZNSC

- The Club Chair with 4-Wood Legs is a more traditional soft-seating solution for guests or groups but has elegant, forward-thinking leg details. Use within the Zones environment or as a guest chair in a private office

The following finishes are available on Zones Club Chair with 4-Wood Legs.

Seat Yoke Metal Finish:

Greystone | Crisp Grey

Wood Frame Finish:

Greystone Beech | Natural Beech

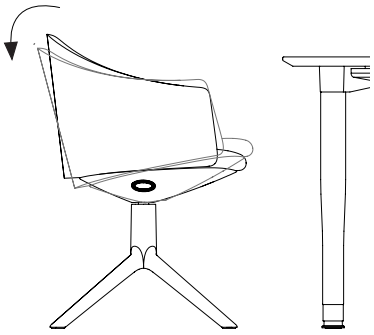
zones club chair adjustments & features

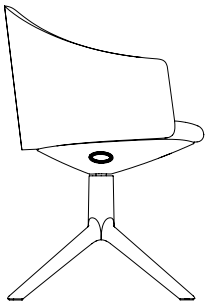
The following Zones Club Chairs are available with individual height adjustment ranges and swivel-tilt mechanism.

SWIVEL-TILT	SEAT HEIGHT-ADJUSTMENT

Zones Club Chair Swivel-Tilt with 4-Prong Base

- Available with self return swivel feature to facilitate ease of use and organization
- Offered with a fixed angle of 95˚ between the seat and the back with a swivel-tilt mechanism which provides an 8˚ recline from the pivot-point located below the seat
- To actively recline, securely sit on the seat with two feet on the floor and lean backwards

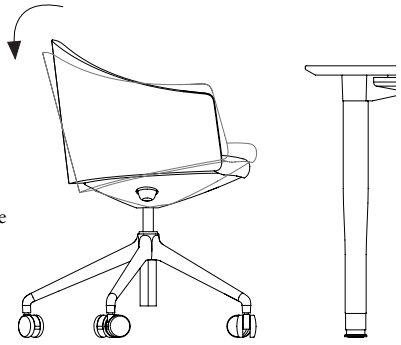




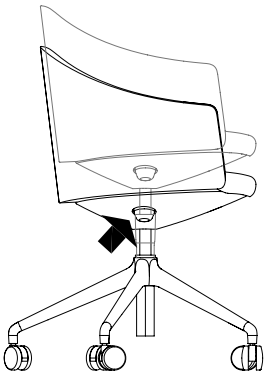
Fixed Height

Zones Club Chair and Stool Swivel-Tilt with 5-Star Base

- Offered with a fixed angle of 95˚ between the seat and the back with a swivel-tilt mechanism which provides an 8˚ recline from the pivot-point located below the seat
- To actively recline, securely sit on the seat with two feet on the floor and lean backwards



- Available with 4" of seat height adjust-ability
- Seat height can be adjusted by pushing inward on the button below the seat on the right hand side. When this button is pushed, the weight of the body will cause the seat to lower, and releasing it stops the seat at the desired height. Pushing inward on the button with no weight on the seat allows it to rise



zones solo lounge chair overview

Like us, Zones Solo Lounge Chairs can work alone or with others in their group. Their fluid upholstered form and slight angular recline provide a fresh perspective outside of our box, a zone in which we can think, read, write and discuss. The top-wrapped headrest on the High-Back version pillows the head while the optional, fixed, loop metal armrests envelop and support us. The Low-Wide Back model has a lower profile which is more ideal for areas where open sight lines are preferred.

MZNSX

Single Upholstered Seat:

Cushioned headrest on High-Back version provides additional comfort and privacy. Low-Wide Back version is appropriate in public spaces where lower sight-lines are required.

Profiled form provides 112° angle between seat and back for a more casual, reclined posture.

Swivel-Tilt mechanism with self-return facilitates ease of use and organization of space. Provides 8° of recline from the pivot-point below the seat.
