pod

comfort & privacy

POD (Privacy on Demand) is a family of products that are designed for occasional short-duration privacy from the open plan. It supports technology and helps shape an environment where people want to work and where they feel comfortable and connected. POD's freestanding design enables relocation and independence from building architecture meeting company needs as they evolve.

Consisting of Tek Booth, Tek Work and Tek Room, both solutions work together to create a diverse range of small-scale private environments. POD is backed by Teknion's impressive finish program to allow endless color palette combinations that suit any environmental aesthetic.

tek booth features

individual privacy
• Tek Booth is designed to support the individual when focus, privacy and comfort are needed from the open-plan environment. Hard external surfaces ensure sound isolation, while fabric and microperforated fascias on the interior minimize sound reflectivity.

fine-tuned interior
• Tek Booth's interior fully integrates power, technology and ergonomics for an overall intuitive experience. Equipped with an angled worksurface, power receptacles and a motion sensor that activates a dimmable task light and ventilation fans, Tek Booth is a space to feel comfortable and connected.

space efficiency
• Tek Booth's small footprint allows for seamless integration into any environment. Its minimal size can be easily multiplied on various floor plans, ensuring office productivity is fully optimized.

specifications

sizing & orientation
• 48" W x 48" D x 90"H high exterior dimensions
• 40" W x 40" D x 86"H high interior dimensions
• Left or right orientation available

frame, door & interior metal finishes
• Ebony or Anthracite

corner trim metal finishes
• Painted Mica, Accent and Foundation

exterior fascias
• Fascia Laminate, Flintwood and Backpainted Glass

interior fascias
• Tackable fabric fascias are compatible with Teknion's Architectural fabrics program
• Base and ceiling microperforated metal fascia

worksurface finishes
• Foundation Laminate and Flintwood

door offering
• Framed Pivot Door (10mm clear tempered)
• Closer with hold open device or automated operator with hand activator
• Magnetic catch

glass fascia options
• Double glazed 6mm tempered glass
• Clear and Frosted finishes

electrics & technology
• Occupancy sensor
• Two ceiling fans rated at 58 CFM each
• Power duplex and USB-A/USB-C
• Fully dimmable task light
• Base feed and ceiling feed available
• Plug-in and hardwired electrics

grain & material direction
• Vertical grain direction
• Off-the-bolt fabric direction
