banqs additions

Banqs now offers a complete seating system that supports all planning applications from perimeter and open planning to cluster planning.

Launched in 2019, the Banqs collection was designed to create linear seating, hubs and booths in corporate, educational and public settings. Banqs offered the opportunity to convert existing, but under-used real estate, into attractive multi-use spaces that could remain active throughout the day, including cafeterias, lounge areas, spaces adjacent to workstations and along perimeter walls.

With the emergence of new work styles, hybrid work spaces and the untethered worker, Banqs has expanded its offering with new seating and table modules that support a wider range of work-based activities with an emphasis towards focused modes of work – from individual focus work to meetings/collaboration between 4-6 people.

New modules include Solo Focus Alcoves and Occasional Tables offered with an optional mounted screen, ideal for connecting sofas or to enclose an end of run. These new units expand planning styles to include pinwheel and cluster applications.

With a comprehensive offering of sofas, screens and tables, Banqs can now facilitate activity including in-person collaboration/connecting, spur-of-the-moment socializing, solo focus, and those in-between moments to relax.

Key Features:

- Provides shared access to personal space for focus work in public and corporate settings
- Enables adaptive planning applications where units can be clustered together for space efficiency or used to create individual hubs for touch-down work
- With the addition of a 44-inch-high screen, Banqs offers a full spectrum of low, medium and high levels of visual, acoustic and spatial privacy
- Solo Focus Alcoves feature a tethered cushion and are available in two different sizes – Standard and Wide
 - Standard size features integrated worksurface options in the form of a side table, box storage and boomerang
 - Wide size features integrated worksurface options as a single- or double-tier side table
- Repositionable Coat Hook provides convenient access to store personal items when touching down and offers a sense of personal space
- Fabric grade selections from 11-20 are now available in addition to the current grade 1-10 selections, providing more design possibilities
- Ganging Kit enables screen sharing for cost efficiency
- Integrated power and USB-A and -C modules in table worksurfaces provide easy and convenient access to users (including upgrade to existing units)

expansion cityline additions

Inspired by the definitive patterns of the urban landscape, Expansion Cityline was conceived from the concept of planning for a workplace as diverse and dynamic as a modern city. As with urban growth, Expansion Cityline continues to expand its offering with the addition of the EZ Fence and a new Upper Structure – infusing a new design approach to workspace planning.

EZ Fence

The EZ Fence is a simplified version of the existing Expansion Cityline fence, specifically designed for fence applications. Its enhanced aesthetic and minimal hardware allow for a quicker install and more competitive price point, making it an attractive solution for both designers and installers.

Upper Structure

The addition of the Upper Structure offers extended planning possibilities. Mounted on the EZ Fence, the Upper Structure provides space division up to 66 inches high. Unique Lift and Drop Tiles install without tools and allow for personalization of the workspace using diverse materials including Felt, Markerboard and Cork.

Featuring the unique Expansion Cityline signature leg design, the Upper Structure helps to delineate space into zones while maintaining a consistent design language. As a multi-functional product, it can be used on workstations or as a freestanding space divider. The Upper Structure accepts storage units and shelves to create a functional space, and can be used as a media centre with meeting tables to create dynamic collaborative areas.

With the addition of the EZ Fence and Upper Structure, Expansion Cityline offers a comprehensive fence solution creating a spectrum of applications from simple power distribution to multi-functional space division.

zones updates

Zones is a comprehensive series of furniture products that transforms the office, challenging convention and changing the way people experience work. Soft forms and a mix of materials and textures, including the inherent warmth of wood, emphasize a domestic mood that helps people feel at home in the office.

Wood is featured throughout Zones, ensuring strength and sustainability while conveying beauty, craft and humanity. The combination of wood with other materials, and Zones' soft harmonious design, creates a visual and tactile harmony that expresses the

domesticity and materiality of the collection. A new mid-tone wood stain – Pecan Beech – is now available, providing a range of wood stain options from light to dark.

Zones Freestanding Screens create functional and aesthetically pleasing ways to define and divide space, fostering dynamics and interaction on either side. A new Hinged Screen is added to the collection, providing users the opportunity to adjust the angle of privacy required.

While each element of the collection works in concert with other pieces, Zones also blends with other furniture. The simplicity of Zones allows individual pieces to create fluid work areas that exist in between high-density spaces. To optimize this integration aesthetically, many Zones products are now available in all Teknion paint colors and worksurface finishes.

Other new products within the offering include a new Small Side Table in the attractive wood style of the existing coffee tables; and a power option for the popular Zones Ledge Tables.

architectural complements
acoustics

Well balanced acoustics are a critical aspect of an enjoyable work environment and employee well being. Articulate and Clarify – additions to the Architectural Complements series – are two new acoustic treatments that help achieve this balance.

Articulate and Clarify are designed to reduce reverberation in a space while adding an artistic element to conventional walls. By reducing reverberation, speech clarity is improved, benefiting both the sound quality of meetings and the ability for individuals to focus on critical tasks.

Both products are highly versatile in their ability to create unique compositions and invite creative exploration. Articulate accomplishes this with single 18" x 18" acoustic tiles that can be placed in either a square or diamond orientation. Depth and dimension can be added by utilizing one of three bracket options that allow a tile to be placed either flush, tilted or offset from the wall. These options also add the ability to layer tiles, providing additional visual interest.

Clarify also offers a high degree of composition options but with a different approach, offering 18 different panel sizes that can be placed in either landscape or portrait orientation. The panels can be combined to form large integrated compositions, or placed individually for a wide range of creative possibilities. Both Clarify and Articulate utilize select Luum fabrics to add elements of color, texture and pattern to each composition.

libelle seating

Libelle, Dutch for “dragonfly”, is a functional, yet whimsical, seating collection including: a pouf, a low-back lounge chair, and an innovative lounge chair with privacy. Designer Khodi Feiz created Libelle to deliver a personal escape while accommodating small collaborative interactions.

The Libelle lounge with privacy back incorporates a transparent knit mesh to offer solitude for both

personal escapes and impromptu small meetings, delivering visual privacy without obstructing the workplace landscape. An optional tablet arm is a versatile addition that enhances functionality and can be retro-fitted to either the left or right side. The casual yet sophisticated style of Libelle is ideal for today’s flexible work environment.

santé seating

The French celebrate by saying, “À votre santé” or “to your health.” Award-winning designer Patrick Norguet created a level of elegance with his latest project, Santé. A series of versatile side chairs and stools, Santé brings an assortment of seating possibilities that work in a variety of settings across the office. Simple yet smart, Santé is light and agile for movement and is comfortable for long-term work, meetings or just relaxing.

Available in multiple seating options and a large array of finishes, the collection is adaptable for an extensive range of customization, eliminating the “institutional” feel of café-style seating. Santé projects a lifestyle-oriented sensibility that softens the office landscape and expresses a more casual work culture.

accent paint

accent paint refresh

Driven by industry trends and fashion, the Accent paint finish category has been refreshed with new colors. Coordinating colors work with the Luum textiles offering and allow for more color layering.

- Soft Gold, Atmosphere, Blush and Herbal – from the Emote product line – extend color application and planning opportunities
- The addition of TK Sunburst, TK Hunter and TK Radioactive enhances product blending with Studio TK

- The addition of Ink Blue and Brickstone coordinate with new Smooth Felt colors
- Existing Butternut, Blue Sage and Signal Red colors are maintained within the Accent paint collection, which now comprises 12 colors
