070 by artifort

features

Simply slim, clean lines, an elegant base and the single row of buttons as a finishing touch. There is such a thing as timeless design. With its pleasant, slightly raised and not too deep seat, the 070 provides a graceful contrast to all the excessive, soft and low lounge sofas of today.

Recently Artifort added new options to the iconic 070 series by Kho Liang Ie, tailored for the business and residential markets. In addition to the straight sofa with a padded backrest original compositions dating back to 1962 have returned to the collection, including a straight sofa with tabletop, a daybed with optional tabletop and the option of combining these into various configurations.

This gives architects the freedom they need to create inspirational waiting, meeting and lounging areas. The sofa's active seating comfort means that it is even suitable for concentrated work. All you need do is move a worktable up to the sofa in offices, public spaces and at home.

EARF070 070 chair

Product Options

Arm Style	Deep Padded Buttons	Gliders
Y with arms	Y Yes	F Felt Gliders
N without arms	N No	G Gliders, No Felt

beso by artifort

features

Beso, Spanish for 'kiss', is a highly versatile and stylish chair program created by designer Khodi Feiz. The notion of lightness, flexibility and comfort is what striking in this design. The Beso collection includes a Beso chair, a Beso Lounge armchair, a Beso barstool and Beso Table.

We particularly like the juxtaposition between powerful and simplistic in the Beso design, so it works with most decors. In terms of shape and construction, the Beso chair allows for long comfortable dinners with friends and family or brainstorm sessions, without the need to take a break or stretch your legs. You can combine your favourite base with a beautiful fabric, and optional armrests.

F500 by artifort

features

Designer Geoffrey D. Harcourt RDI distinguished himself with this series swivel chairs by the comfort form and striking upholstery. The idea of the F500 armchair originate because the girlfriend of Harcourt RDI like to curl up in cross-leggs. He was fascinated by this very female attitude. The result is the F500 series: an armchair with all comfort of an easy chair, and wide enough to suit an unusual seating position.

These comfortable F 500 shells on a metal base are pleasantly futuristic but, at the same time, nostalgic.

With its extra thick upholstery, the F510 and F512 is an armchair to curl up in and enjoy. Available in a high and a low version. The swivel armchair is available with a disc base, cross base or with a rocking base.

EARF510 500 series rocking chair thick, fixed upholstery
EARF511 500 series lounge chair low swiveling

gap by artifort

features

Meeting and dining chair Gap is a design by Khodi Feiz. The distinctive gap in the fully upholstered shell appears where the seat ends and the back begins. It's this smile-shaped gap that gives the design just that little bit extra, providing more room for the back and guaranteeing comfortable sitting.

Gap is available in various types of bases and can be upholstered in both fabric and leather. Gap adapts effortlessly in various settings such as conference rooms, meeting rooms and restaurants.

jima by artifort

features

Form, function, comfort and detail: the Jima chair by designer Patrick Norguet ticks all the boxes. This sleek, expressive chair will fit seamlessly into different worlds – an office for instance, and a home for sure.

Jima comes in high back and low back versions, and is available in four different bases. The chair comes in an extensive range of fabrics and colours, inviting you to experiment with any interior style.

EARJ jima chair

kalm by artifort

features

Kalm is Artifort's large, new cosy armchair by our French designer Patrick Norguet. It is a sanctuary in its own right, a place to unwind and get comfortable. With Kalm, Patrick Norguet has created an iconic, luxurious and comfortable high-back armchair for your living room or study.

Kalm is not only a beautiful chair that will earn a special place for itself in your home. According to Norguet, it is also 'an expressive armchair that is suitable in any project environment. Several Kalm armchairs grouped together will definitely define a hotel lobby or meeting room and create a distinguished and iconic image.'

Kalm can be combined with a matching footstool, which has an upholstered cushion in the same shape as the cushion in the chair.

mare by artifort

features

With its clean lines and subtle details, the Mare fixed cushion programme is timeless. Typical of René Holten's design is the slit in the centre of the seat and the slender base, which runs from back to front. This gives the sofa a spacious and elegant appearance, particularly in a open space.

Thanks to its wide range of versatile elements, the Mare is a much loved sofa. Opt for a compact, straight sofa (2-, 2.2-, 2.5-, or 3-seater sofa) or a large lounge ensemble ideally suited to both modern and classic interiors. However, the underlying goal of each Mare remains the same: to provide the ultimate in comfort.

nina by artifort

features

A contemporary, luxurious design. Elegant and comfortable. For meeting rooms and dining rooms. The rounded, well-fitted back makes the chair comfortable as active seating or in a more relaxed position.

The round chair fits the contour of the human body. As a result, both an active and relaxed sitting position can be adopted. Available in four versions.

EARNA nina chair 4 legged

Product Options

Base Height		Felt Gliders		Base Finishes		Upholstery Finishes

pala by artifort

features

Pala is a fully upholstered armchair on a pedestal designed by Italian designer Luca Nichetto. The design follows the shape of a human body and combines Artifort's heritage with a contemporary approach. The striking Pala works well in homes, hotels, waiting areas and lounges.

This modern and characteristic armchair invites you to leave everyday hustle and bustle for what it is. It's a place to relax and take time for yourself. The armchair can be complemented with a matching footstool and a matching side table, and also stands fine on its own.

shark by artifort

features

Shark is a model that acquired its name because its profile resembled that of the feared predator. However, you have nothing to fear from this shark. On the contrary. It's an extremely comfortable chair to sit on. Sturdy with extra back support. A delightful chair for a long evening around the table, or for a productive meeting.

segis

hotel by segis

features

Hotel is a modular seating system characterized by a strong expressive versatility conceived for fluid, linear, and angular combinations. Comfortable pieces designed for enjoyable relaxation and conviviality. The collection includes two and three seater sofas plus an armchair; armrest options include an upholstered armrest in two sizes and a tablet arm for computer or other support. Joining tables between the seats or multifunctional tables complete the collection.

true design

arca by true design

features

Coming from Studio Orlandini's inspiration, Arca defines a new concept of armchair for lounges and waiting areas, available in 3 backrest heights, which can be combined to many base typologies. The standard option, with low backrest, is ideal for quick waiting areas, large meeting rooms, while the medium back option, with backrest cushion, gives more prestige and comfort to the armchair. The High version gives the unique touch of design to this collection, with its embracing backrest for a break of full relax. Arca perfectly traces the new concept of "Smart Lounge", where waiting moments become great occasions for reflection, working or relaxing on the web; all versions of Arca can indeed be equipped with a large writing tablet, swivel around the arm.

hive by true design

features

10 years after its debut in the market as an executive office chair and waiting armchair, Hive has been revisited and redesigned to adapt to the new needs of the lounge, waiting and hospitality segment. The new polyurethane shell is available in chair and armchair version with double backrest height. The design is characterized by the pronounced lines of the compact armrest and the stitching that shapes the backrest in a vertical direction. It is available with a solid wood 4 legs base or with a 4-spoke steel swivel base.

millepiedi by true design

features

Millepiedi is characterized by a modern and minimal design and develops a concept of functionality and flexibility in a wide range of configurations and dimensions. The contemporary design develops in a wide range of configurations and dimensions a conceptual idea based on functionality and flexibility, combined with high end details. The importance of the quality is translated into a vibrant union of design and craftsmanship experience, enhanced by a constant research in details and finishings.

not by true design

features

A wide shell embraces the seat in a warm embrace. The seams define the soft lines, giving it an elegant and versatile look. Suitable for conference hall and relax spaces of hotel and domestic environment. The NOT family, characterized by a wide seat shell and an elegant shape, introduces 2 new versions: the Lounge, wider and more comfortable, and the Mini, providing a more compact shell and new bases to open the use of this products to new environments.

oracle by true design

features

Oracle is a tactile modular meeting solution for open-plan spaces. The 'room within a room' booth provides an informal semi-private comfortable meeting space for activity based workers. With its versatile configurations it can be used as a quiet harbor to get away from your desk, or as a meeting/collaboration space for 2-6 occupants. The high back design creates the sense of a mini-environment acting as a divider from the outside world, we have also added a porthole vision feature that enables you to discreetly see if the booth/pod is occupied. Also included within the range are a number of work surfaces/desk tops (along with provision for power) that can be substituted for sofa elements to provide hot desking or touchdown spaces for transient workers.

artifort

beso by artifort

features

The Beso Table collection matches the Beso chair programme, consisting of a series of tables with rectangular or round tops with an elegant and sculptural base.

Clever positioning of the four table legs Clever positioning of the four table legs mean users have considerable freedom of movement, creating extra chair space along the long side or at the head of the table. The construction beam matches the table top or the colour of the base and provides the accent and character of the design. The metal legs swing open to the left and right of the beam, so the construction supports the table well.

clarion by artifort

features

The Clarion dining table is composed as a medly that creatively combines two archetypal trumpet bases and a steel tube, together capable of supporting a table top. The central position of the round base gives your maximum freedom of movement.

The milled edge table top of Clarion is available in various shapes: round, oval or boat-shaped. The Clarion program is compromised of conference tables, dining tables, bistro tables, counter and bar tables and a series of lower tables. Clarion offers multiple options in size, colour, materials and finishes. Combine Clarion with an elegant chair, an inviting barstool or even with luxurious conference armchairs.

mare by artifort**features**

A sleek coffee table for a sleek sofa. The Mare T is developed especially as table to match sofas of the Mare sofa program (Mare loose cushion and Mare fixed cushion). Typical of this design is the slender base, which runs from back to front.

Mare T is available with a square or rectangular table top. The top is veneered or solid oak and the base is made of polished stainless steel or powder coated.

features

The Pala T side table by designer Luca Nichetto is a modern design that combines well with the Pala armchair and Pala P ottoman. The design combines Artifort's upholstery expertise with a contemporary approach. Characteristic of this series is the fully upholstery of the base with a richness of detail. The decorative stitching follows the flowing lines of the design.

The Pala T side table has a solid oak table top.

dock by lande

features

Table with frame and lamps

Dock is a stylish long wooden table with a steel frame that runs above the table. Several lamps can be attached to the frame. The combination of the frame and the lamps above the table creates an intimate atmosphere.

Table with lights

Dock is ideal as a table in a library or landing table in an office. For example in a building where no lamps can be attached to the ceiling. Or high industrial areas where the lighting is not sufficient. The first stylish black Dock tables already shine in the offices of the Port House in Antwerp. "As the name suggests, the table is inspired by a jetty", explains designer Kurt van Overbeke. "Dock is designed for the Antwerp Port House. The company is responsible for mooring boats from all over the world. Mooring is also the function that Dock has within the office. A place where people come to start their workday. The first start-up meeting.

segis

boom by segis

features

Boom Collection brings together in a single series the iconic tables in their round, square and rectangular versions. Base, column and top can be round or square and combine with each other without constraints. Tops are available in various materials and sizes; bases and columns in high-strength steel may be in powder coat, chrome, or brushed stainless. The height can be fixed or adjustable with gas lift. Essential and extremely functional, Boom is perfect for both performing and comfortable spaces.

studio tk

rec by studio tk

features

Designed by Christophe Pillet, Rec worktables are inspired by the raw, rectangular worktable from the industrial age. Rec creates high work postures ideal for today's social spaces. Rec worktables provide compelling high work settings for the more active worker and creative types – those who need to sit or stand and accomplish solo, heads-down work. Rec supports applications that serve both perimeter and open space planning, for personal touchdown, quick gatherings, and longer-term collaborative work scenarios.

Rec worktables are offered in three popular heights. Two top styles in multiple sizes are available in linoleum, laminate, and veneer. Three base styles are offered in a wide variety of powder coat finishes.

true design

wing by true design

features

WING is a table created for working areas, but it can also fit inside a home-office or domestic environment. It is characterized by a wooden frame inspired by the sawhorse of the working tables, and the rounded shape of the top with its contemporary lines. Defined by great flexibility, WING can be completed with acoustic panels, a brass reading lamp and wooden or metal trays that are installed on the large central channel through a magnetic fixing system. Power supply and cable management are allocated on the same central channel.

wilkhahn

confair by wilkhahn

features

Confair folding tables make versatile usage of cleverly designed conference and meeting areas child's play. Only one single person is required to set up and rearrange the movable folding tables – without any tools, releasing or unlocking procedures or special skills involved. Snap connectors allow the tables to be linked in any direction. If partitions are used to divide up rooms, conference or project work tables can be transformed into a large conference layout in no time.

timetable by wilkhahn

features

Timetable's table tops flip up in one easy step and the foot sections turn inward in the process. As a result, they're easy to move from room to room and nest very compactly into one another. Intuitive handling, exceptional quality and a strong aesthetic inspire a change of methods and save resources, time and space. The exceptionally hard-wearing Timetable Smart with its power solutions has uncovered further usage potential and found its way into hot desking, training and project spaces. The frame design of its big brother (Timetable Shift) means it can be combined perfectly with Confair folding tables and Logon tables. The U-shaped aluminum profile to help connect the legs also provides a spacious cable channel at the same time. Timetable comes in lots of different formats, shapes, edges and surfaces.
