PRICE & PRODUCT GUIDE. 39

what are modular cabinets?

what are modular cabinets?

The Modular Cabinets collection offers easy-to-specify and easy-to-assemble products designed for a broad range of applications such as healthcare, mail room, lunch room and more.

The Modular Cabinets collection comprises three lines of storage cabinets: Wall Cabinets, Base Cabinets and Storage Cabinets. A variety of accessories are also offered to complete the installation of the cabinets.

how to plan wall cabinets

Steps given below should be followed when planning with Wall Cabinets.

- ❗ You should verify the exact wall dimensions before choosing the cabinet widths
- The overall depth of the cabinet includes the Wall Support
- Two Wall Supports must be specified for 24" to 36" high cabinets and one Wall Support for 15" high cabinets
- It is the responsibility of the installer to securely attach Wall Supports to the wall; additional wall reinforcement is not required when using Wall Supports

Step 1: Place the first cabinet in the opposite corner

Step 2: Arrange remaining cabinets along the wall

Step 3: Finish the row with a corner cabinet (only one opening door) and start the new row with an adjacent cabinet. Choose the cabinet dimensions so that you do not see more than 3" of the fixed panel

Step 4: Fill the other wall with cabinets. Leave a gap between 1" and 6" at the end as installer can cut to fit within wall conditions

- ❗ Wall Cabinets can be installed on Altos Walls, except the Corner Wall Cabinets (RHWCD and RHWCDG)
- Individual cabinet width must be the same as Altos Wall Fascia

- Total width of cabinets mounted on both sides of the Altos Wall must not exceed the width of the wall
- Contact Teknion for other specific restrictions

how to plan base cabinets

Steps given below should be followed when planning with Base Cabinets.

- ❗ You should verify the exact wall dimensions before choosing the cabinet widths
- Base Cabinets are predrilled on the sides for a more stable assembly when installing two or more cabinets together

Step 1: Place the first cabinet in the opposite corner

Step 2: Arrange remaining cabinets along the wall

Step 3: Finish the row with a corner cabinet (only one opening door) and start the new row with an adjacent cabinet. Choose the cabinet dimensions so that you do not see more than 3" of the fixed panel

NOTE:

Some base cabinets (RHBD, RHBRC, RHBW, RHBCP and RHBASD) **cannot** be used to start a new row adjacent to a Corner Cabinet

Step 4: Fill the other wall with cabinets. Leave a gap between 1" and 6" at the end as installer can cut to fit within wall conditions

how to plan storage cabinets

Storage Cabinets must be installed adjacent to Base Cabinets and not perpendicular.

❗ Storage Cabinets are predrilled on the sides for a more stable assembly when installing two or more cabinets together

how to plan accessories

Fill the gap with a Side Filler (RHAFS). Exact dimension to be cut on site for perfect adjustment with wall

NOTE:

If the gap is more than 6", you can use a Metal or Laminate End Panel (RHAEP or RHALEP) to aesthetically cover the side of the cabinet and wall support

Fill the gap with a Side Filler (RHAFB). Exact dimension to be cut on site for perfect adjustment with wall

NOTE:

You must cover all Base Cabinets with Countertops
