expansion casework+

Expansion Casework+ is a versatile solution designed for commercial and institutional environments. Offering the custom, built-in appearance of traditional millwork cabinetry, Casework+'s modular components can be easily relocated and configured for a high level of design flexibility and futureproofed space planning. This adaptability makes it an environmentally sustainable choice, as reusable cabinets reduce material consumption and minimize waste.

PLANNING IDEAS – ALTERNATIVE APPLICATIONS

The variety of Expansion Casework+ cabinet styles, shelving, and cubby options supports creative applications well beyond office kitchens. Custom capabilities allow us to further tailor the casework to client specifications and storage needs. From conference rooms, collaborative work zones, and resource/copy centers to amenity spaces such as reception areas, wellness rooms, and hospitality lounges—even residential applications—Casework+ works where you need it to.

ARCHITECTURAL INTERIORS
healthcare enhancements

The next phase of Architectural Interiors Healthcare combines precision engineering, enhanced functionality, and clean aesthetics to meet the rigorous demands of modern outpatient healthcare environments. Among the enhancements:

- Redesigned ceiling extrusions with tailored gaskets improve sound control, minimize dust and germ accumulation, and enhance cleanability.
- The integrated plumbing module introduces a double-wall assembly that seamlessly supports plumbing needs along the entire wall length.
- ADA-compliant glass insert doors support accessibility, while an enhanced door increment system provides precise fit and gap closures in varied site conditions, even when wall levelers are raised.
- Cabinet storage has been reimagined for double-sided mounting on a single wall, maximizing utility.
- A newly expanded finish palette broadens design possibilities for welcoming, contemporary healthcare spaces that reinforce a sense of wellness.

- 01 Ceiling Extrusion
- 02 Plumbing Integration
- 03 Glass Insert Door

STUDIO TK

modus maluma

A first introduction from Studio TK's partnership with Modus in Somerset, United Kingdom, Maluma is a joyful sectional seating system. Each seat consists of a circular seat with a rounded backrest and can be connected to its neighbour to create bead-like strings of seating. When linked, seats can be repositioned by plus or minus 30 degrees around their center point, enabling a myriad of moveable configurations. Arrange in serpentine waves, intimate rings, or more

regimented, linear forms—whatever suits the space. An optional attached tabletop and backless seat add further variety to the array of shape-making possibilities. Designed for easy disassembly and material reclaim at end of life, all components—from the FSC-certified spruce plywood frame to the Polygood plastic tabletop—are fully recyclable.

STUDIO TK

modus art, arne, and abe

A trio of cork tables with sections removed to allow for storage, Art, Abe and Arne have much in common but perform distinctly different roles. Art is the smallest and functions best as a side table, its angled cutout is perfect for a book or two. Abe works well as an end table, with a horizontal storage section. The largest, Arne, is happiest as a coffee table, with a concentric cutout ideal for magazines. When grouped together, the tables each take on their own character, similar yet individual, like a group of close relatives.

STUDIO TK

modus bob

Bob is a characterful stool with a softly rounded base and a comfortably concave seat. Two finger holes allow easy lifting and moving. Whether on its own or in a crowd, this multiuse stool acts as an endearing companion in a wide variety of spaces.

To craft these pieces, Modus sources 100% recycled cork—a highly renewable, low carbon, and biodegradable natural material—from the waste produced in the manufacture of wine bottle corks. They offer an eco-conscious choice at the end of life, too, as the material can be recycled anew or composted back into the environment.

STUDIO TK
point long island

Studio TK's partnership with Spanish firm POINT expands the walls of the traditional office with two collections of contract-grade lounge seating (and design-matched occasional tables) rated for outdoor environments.

POINT Long Island is a versatile modular collection that includes a lounge chair, settee, sofa, and sectional components. Defined by straight lines and a timeless silhouette, Long Island adds inviting elegance indoors or out. Deep seats and thick cushions encourage a relaxed mood while offering quality comfort and support. When specified for outdoor use, cushions are outfitted with water barriers and a choice of 30 textile patterns and colourways from Luum and Sunbrella designed for UV resistance and durability.

STUDIO TK
point origin

Featuring simple lines and discreet curves, POINT Origin suits both casual indoor and outdoor settings. The collection includes lounge chairs, two-seat and three-seat sofas, and matching occasional tables. Sofas can be used individually, or be grouped with single-arm sofas to create larger configurations or L-shaped arrangements. Despite the minimalistic appearance, the furniture is exceptionally comfortable. When specified for outdoor use, Origin's thick foam cushions are equipped with water barriers and covered in a choice of 30 UV-resistant and weatherproof fabrics from Luum and Sunbrella. The sturdy aluminum frames of the chairs and sofas are stackable, requiring minimal storage space when temperatures drop.

LUUM evolutionary forces

12

LUUM
evolutionary forces

Evolutionary Forces is a collection of five textiles by Suzanne Tick inspired by the natural cycle of evolution. Featuring new types of recycled materials, an expanding range of multicolour textures, and indoor/outdoor upholstery and drapery with an emphasis on luxury performance—this collection opens up new ways to use the Luum line. Evolutionary Forces' organic approach to pattern brings colour, texture, and comfort to the forefront, grounding spaces in a renewed focus on wellness.
