HIDDEN TREASURES REVEALED

070

product description

Simply slim, clean lines, an elegant base and the single row of buttons as a finishing touch. There is such a thing as timeless design. With its pleasant, slightly raised and no too deep seat, the 070 provides a graceful contrast to all the excessive, soft and low lounge sofas of today.

oracle

product description

Oracle is a tactile modular meeting solution for open-plan spaces. The ‘room within a room’ booth provides an informal semi-private comfortable meeting space for activity based workers. With its versatile configurations it can be used as a quiet harbor to get away from your desk, or as a meeting/collaboration space for 2-6 occupants. The high back design creates the sense of a mini-environment acting as a divider from the outside world, we have also added a porthole vision feature that enables you to discreetly see if the booth/pod is occupied. Also included within the range are a number of work surfaces/desk tops (along with provision for power) that can be substituted for sofa elements to provide hot desking or touchdown spaces for transient workers.

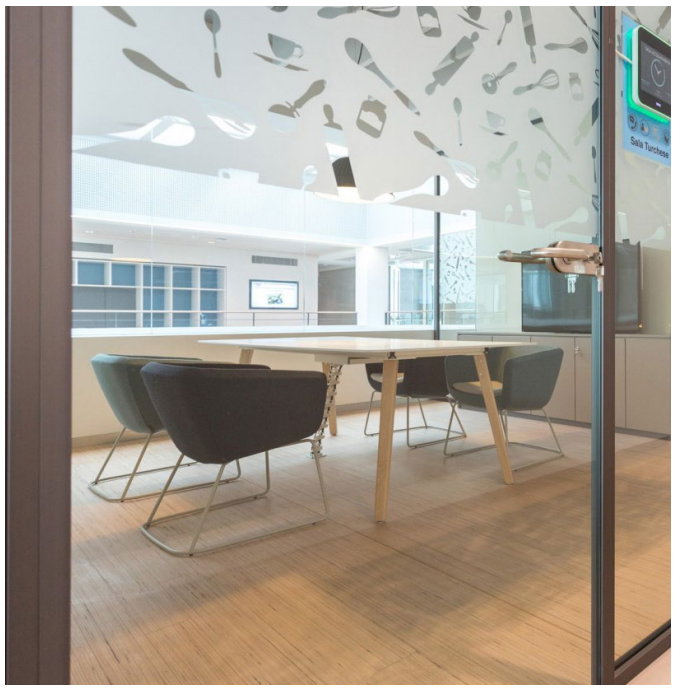
arca

lounge



teknion

arca

product description

Coming from Studio Orlandini's inspiration, Arca defines a new concept of armchair for lounges and waiting areas, available in 3 backrest heights, which can be combined to many base typologies. The standard option, with low backrest, is ideal for quick waiting areas, large meeting rooms, while the medium back option, with backrest cushion, gives more prestige and comfort to the armchair. The High version gives the unique touch of design to this collection, with its embracing backrest for a break of full relax. Arca perfectly traces the new concept of "Smart Lounge", where waiting moments become great occasions for reflection, working or relaxing on the web; all versions of Arca can indeed be equipped with a large writing tablet, swivel around the arm.

teknion

f500

lounge

teknion

f500

product description

Designer Geoffrey D. Harcourt RDI distinguished himself with this series swivel chairs by the comfort form and striking upholstery. The idea of the F500 armchair originate because the girlfriend of Harcourt RDI like to curl up in cross-leggs. He was fascinated by this very female attitude. The result is the F500 series: an armchair with all comfort of an easy chair, and wide enough to suit an unusual seating position.

kalm

product description

Kalm is Artifort's large, new cosy armchair by our French designer Patrick Norguet. It is a sanctuary in its own right, a place to unwind and get comfortable. With Kalm, Patrick Norguet has created an iconic, luxurious and comfortable highback armchair for your living room or study.
Kalm is not only a beautiful chair that will earn a special place for itself in your home. According to Norguet, it is also 'an expressive armchair that is suitable in any project environment. Several Kalm armchairs grouped together will definitely define a hotel lobby or meeting room and create a distinguished and iconic image.'

jima

product description

Form, function, comfort and detail: the Jima chair by designer Patrick Norguet ticks all the boxes. This sleek, expressive chair will fit seamlessly into different worlds – an office for instance, and a home for sure.
Particularly noteworthy is the single, flowing line running from the top of the back, via the arms to the bottom of the seat. This makes it appear as if the seat cushion is locked in an embrace, providing flexibility and maximum comfort. Jima comes in high back and low back versions, and is available in four different bases. The chair comes in an extensive range of fabrics and colours, inviting you to experiment with any interior style.

mare

product description

A sleek coffee table for a sleek sofa. The Mare T is developed especially as table to match sofas of the Mare sofa program (Mare loose cushion and Mare fixed cushion). Typical of this design is the slender base, which runs from back to front. Mare T is available with a square or rectangular table top. The top is veneered or solid oak and the base is made of polished stainless steel or powder coated.

beso

product description

The Beso Table collection matches the Beso chair programme, consisting of a series of tables with rectangular or round tops with an elegant and sculptural base. Clever positioning of the four table legs Clever positioning of the four table legs mean users have considerable freedom of movement, creating extra chair space along the long side or at the head of the table. The construction beam matches the table top or the colour of the base and provides the accent and character of the design. The metal legs swing open to the left and right of the beam, so the construction supports the table well.

dock

product description

Table with frame and lamps
Dock is a stylish long wooden table with a steel frame that runs above the table. Several lamps can be attached to the frame. The combination of the frame and the lamps above the table creates an intimate atmosphere.

Table with lights
Dock is ideal as a table in a library or landing table in an office. For example in a building where no lamps can be attached to the ceiling. Or high industrial areas where the lighting is not sufficient. The first stylish black Dock tables already shine in the offices of the Port House in Antwerp. “As the name suggests, the table is inspired by a jetty”, explains designer Kurt van Overbeke. “Dock is designed for the Antwerp Port House. The company is responsible for mooring boats from all over the world. Mooring is also the function that Dock has within the office. A place where people come to start their workday. The first start-up meeting.

teknion

confair

product description

Confair folding tables make versatile usage of cleverly designed conference and meeting areas child's play. Only one single person is required to set up and rearrange the movable folding tables – without any tools, releasing or unlocking procedures or special skills involved. Snap connectors allow the tables to be linked in any direction. If partitions are used to divide up rooms, conference or project work tables can be transformed into a large conference layout in no time.

teknion

timetable

work

teknion

timetable

product description

Timetable's table tops flip up in one easy step and the foot sections turn inward in the process. As a result, they're easy to move from room to room and nest very compactly into one another. Intuitive handling, exceptional quality and a strong aesthetic inspire a change of methods and save resources, time and space. The exceptionally hard-wearing Timetable Smart with its power solutions has uncovered further usage potential and found its way into hot desking, training and project spaces. The frame design of its big brother (Timetable Shift) means it can be combined perfectly with Confair folding tables and Logon tables. The U-shaped aluminum profile to help connect the legs also provides a spacious cable channel at the same time. Timetable comes in lots of different formats, shapes, edges and surfaces.

wing

work

teknion

wing

product description

WING is a table created for working areas, but it can also fit inside a home-office or domestic environment. It is characterized by a wooden frame inspired by the sawhorse of the working tables, and the rounded shape of the top with its contemporary lines. Defined by great flexibility, WING can be completed with acoustic panels, a brass reading lamp and wooden or metal trays that are installed on the large central channel through a magnetic fixing system. Power supply and cable management are allocated on the same central channel.
