sliding doors

Altos offers sliding doors in a selection of styles with a range of lock/handle hardware, available for both Portrait and Landscape applications. A solid side panel can be used with all door styles to accommodate wires and switches for electrics and lighting.

door features

- Available in 1-inch increments to accommodate ceiling heights between 8 and 10 feet
- Standard soft close/open mechanism slows doors as they open/close to dampen sound and enhance safety
- Seals on all sides minimize sound transmission

- 10mm thick ($\frac{3}{8}$ " nominal thickness) glass leaf
- $1\frac{3}{4}$ " thick solid leaf
- Doors can be specified for an interior or exterior mount, and slide open left or right
- Floor and ceiling pulls are available with locking, non-locking and ADA thumbturn options
- Jambs are available in square and round styles

door finishes

- Glass - clear or frost; tempered or tempered-laminated
- Solid - laminate or veneer
- Door Handles - brushed stainless steel or painted
- Door Jambs/Components - clear anodized or painted

sliding door features

01 glass sliding door trolley cover & stopper

The door trolley includes a safety retainer contained within its housing; the door stop for the soft open/close mechanism is positioned on the rail.

02 glass sliding door stopper & door seal

To maximize acoustic privacy, sliding doors include integrated vertical and horizontal seals. The vertical rubber seal and stopper captures the door when closed and the horizontal seals consist of a brush seal at the header and a brush seal at the base.

03 ceiling pull locking mechanism

Ceiling pulls feature a 1-inch tubular steel pull with patch cover that locks into the jamb. It configures to ceiling heights in 1-inch increments and is available with a standard lock and ADA lock options.

04 locking floor pull

Floor pulls feature a 1 $\frac{3}{8}$ " tubular steel pull with an integrated lock that can be retrofitted. At 48 inches long, they include an ADA thumbturn and are available in stainless steel or black painted matte.

05 ceiling pull for glass sliding door double

An Adams Rite lock in a plated finish accommodates a range of cylinders. Includes 1-inch tubular steel pulls.

06 floor pull ADA thumbturn

An ADA thumbturn is standard for all floor locking pulls.

07 sliding door interior view

Doors can be specified for an interior or exterior mount, and slide open left or right. Sliding door components comprise a rail, jamb kit, door leaf and handle. The header contains plumb adjustment capabilities for easy installation. Doors can be serviced without the need for disassembly.

swing doors

Altos swing doors include hinged and pivot doors in a selection of styles, finishes and handles. Full- and segmented-height doors are available in glass, solid and solid with glass insert options as both single or double leaf.

door features

- Full-height doors are available for ceiling heights of 88 to 120 inches in 1-inch increments
- Segmented-height doors are fixed at 84 inches and can be used for ceiling heights of 88 to 120 inches in 1-inch increments
- Solid and Glass Transoms are available for use above segmented-height doors

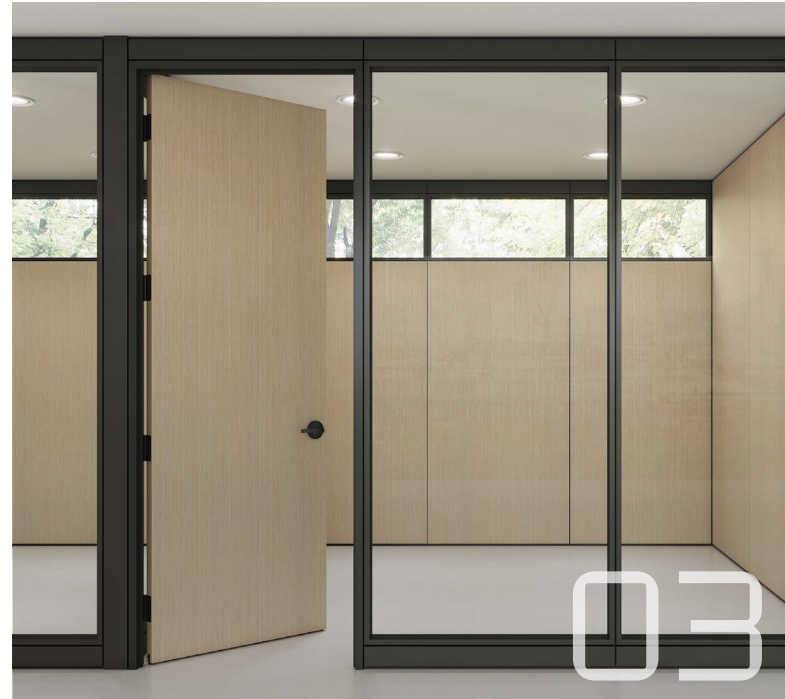

- To prevent wall damage, swing doors include a base-mounted door stop
- To minimize sound leakage, doors are available with an optional drop seal
- 10mm thick (3/8" nominal thickness) glass leaf
- 1 3/4" thick solid leaf
- 180-degree door swing
- Optional 10-inch high ADA kickplate

door finishes

- Glass - clear or frost; tempered or tempered-laminated
- Solid - laminate or veneer
- Door Handles - brushed stainless steel or painted
- Door Jambs/Components - clear anodized or painted

swing door features

01 mortise lock

Mortise lock is available with a basic turn as well as an ADA thumbturn. Finishes include satin chrome or matte black.

02 door stop

To prevent wall damage, swing doors include a door stop that can be mounted to the floor or fascia base behind the door.

03 pivot door handle

Saturn and Jupiter handles are available in an anodized finish that matches the frame. Sleek pivot handles have no exposed fasteners.

04 door pivot (interior view)

Pivot doors mount off the interior vertical jamb at two pivot points, levelling vertically within the Altos framework.

05 pivot door adjustable door closer/door stay

Pivot doors are available with an optional concealed door closer, featuring adjustable closing speed and a maximum 110-degree opening range. A hold-open feature is included with the closer mechanism.

06 door hinge

Hinge doors are hinged off the interior vertical frame rather than mounting to the floor, and feature integrated seals for improved acoustic performance.

07 kick base

An optional 10-inch-high integrated ADA kickplate is available for glass pivot doors and glass hinged doors.
