features & benefits

teknion

Teknion has partnered with Wilkhahn to offer the Wilkhahn Occo chair by Teknion. Wilkhahn Occo, whose name suggests inviting, curvilinear and open forms, is a collection of casual multi-purpose chairs perfect for spaces ranging from cafés, to informal places for meet-ups, to use in conference rooms. The chair's flexing plastic shell with cut-out form and varying material thicknesses ensures comfort.

Designed by Jehs+Laub, the collection combines versatility and a selection of design options with a clear and immediately identifiable design language. Chair base options include four metal legs or a dynamic five-star base on casters. Legs are finished in Black, Cool Grey or White. Optional plastic shell colors and an optional upholstered seat pad or fully upholstered shell interior are available.
