architectural complements

personalize & enhance

Architectural Complements is a program for elements that can be used to enhance and augment existing wall systems within Teknion Architectural Interiors portfolio. It consists of small curated programs, creating a streamlined, centralized environment for specification and application knowledge. Teknion Architectural Complements is positioned to continuously expand to respond to the ever-changing needs of designers and interior spaces.

acoustic program features

productivity & well being

- The acoustic program consists of sound absorbing panels and tiles that mount to conventional construction. Sound absorption improves acoustic clarity within group meetings and teleconferencing situations, while increasing concentration during critical tasks.

softer, textured spaces

- The acoustic program leverages existing Teknion & Luum fabric lines, adding visual comfort to rooms with multiple hard surfaces. The variety of textural and color opportunities can further enhance the quality of any interior space.

compositional freedom

- Mounting directly to building surfaces gives the acoustic program the ability to place and orient fascias with a high degree of flexibility and creativity. The wide array of possible compositions is further enhanced by the ability to mix and match finishes.

specifications – articulate

sizing and shape

- 1 tile
- 18" w x 18" h (square)
- 25" 7/16 w x 25" 7/16" h (diamond)

wall application

- Diamond or Square
- Flush, Offset, Tilted brackets
- Layered and non-layered placement
- Drywall construction

materials & performance

- 0.95-1.10 NRC
- Recycled acoustic cotton and fiberglass core
- Panel fabrics (select offering)

specifications – clarify

sizing and shape

- Landscape:
24"- 96" width and 24"- 48" height in 12" increments (height cannot exceed width)
- Portrait:
24"- 96" height and 24"- 48" width in 12" increments (width cannot exceed height)

wall application

- Independent or Integrated
- Drywall construction

materials & performance

- 0.90 NRC
- Recycled acoustic cotton and fiberglass core
- Tackable surface
- Architectural and Panel fabrics

markerboard program features

flexible

- The markerboard program is a flexible product offering allowing for specification at the planning stages of a project or later on as a retrofit option, giving you options to decide when and where to add it to your space.

complement

- Specific size and orientations of the markerboard can integrate with various walls and existing product lines which include drywall, Altos walls and the POD Room applications.

adaptable

- The markerboard accommodates a broad range of aesthetic, size, color and frame finish options. The program consists of the two distinct options of frameless and framed. The back painted glass, trims and framing can be coordinated to match existing site color and finish palettes.

specifications

sizing and orientation

Landscape and Portrait orientations

- Landscape sizes:
36"H x 36"W, 36"H x 48"W, 36"H x 72" W,
48"H x 72"W, 48"H x 90"W (nominal)
- Portrait sizes:
48"H x 36" W, 72"H x 36"W, 72"H x 48"W (nominal)

applications

- Altos
- Drywall
- POD Room (select sizes)
- WithIn - Infills

materials & accessories

- Markerboard - 6mm Glass
- Framed and Frameless
- Magnetic surface
- Markerholder - optional 4x dry erase markers and brush

finish options

- Frame or Trim (Frameless) - Foundation, Mica, and Accent paint
- Backpainted Glass - Standard colors and Accent color match (select options)
- Markerholder - Foundation, Mica, and Accent paints
- Marker Brush -Solid Maple handle and Natural Wool Felt brush pad.

mullion program features

universal

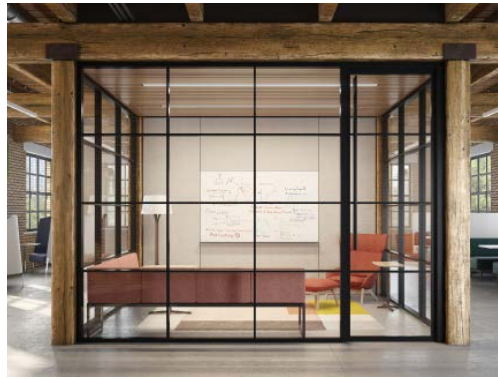

- Mullions are simple, non-structural trim elements that can be surface-applied to glass. This construction approach allows mullions to have a wide application across all of Teknion storefronts, including Optos, Focus and Tek Vue.

flexible

- Mullions can be applied to new and existing storefront installations. Cut on site from 10' lengths, these trim elements can easily respond to any on-site discrepancies for ultimate flexibility.

bespoke

- Mullions bring a customized look and feel to typical glazing construction. An array of vertical and horizontal pattern can be created, tailored to suit any business or a specific brand.

specifications

sizing

- Cut on site from 120" lengths
- 1" x 1" Mullion (overall assembly with glass)
- 4" x 1" Mullions (overall assembly with glass)

wall application

- 1" x 1" Mullion: Optos, Focus, Tek Vue, WithIn
- 4" x 1" Mullion: Optos and Focus
- Single Glazed Fascias
- 10mm or 12mm glass

door application

- 1" x 1" Mullion: Optos, Focus and Tek Vue
- Framed, Single Glazed Door Leafs
- 10mm or 12mm glass
